Developing Capacity for Community Governance of Natural Resources Theory & Practice Sep 03 2022 Community-based natural resource management (CBNRM) is a compelling concept that combines community custodianship of natural resources with sustainable development and poverty reduction. However, there is a large gap between the conceptual promise and actual performance of CBNRM. CBNRM is complex and challenging, and one of the major challenges is what we call micro-governance how to replace the ubiquitous problem of elite capture within communities with genuine participation and equitable benefit sharing. This book is for people want to understand and implement CBNRM governance more effectively, including graduate students, scholars and practitioners. It is targeted most specifically at the scholar-practitioner who wants to draw upon micro-governance theory to know why and how to work with communities to implement sound local institutions. The perspectives and resources presented have been developed and tested over many years working with CBNRM communities in southern Africa. The book offers convincing evidence for preferring participatory democracy over representational forms of governance, and discusses how to manage the scale paradox that economies and ecologies are better managed at larger scales, but that larger representational institutions invariably forfeit critical public goods like participation and equitable benefit sharing. The books purpose is to provide the reader with the practical tools to operationalize good governance at the village level, in ways that are theoretically sound. It provides the reader with theoretical insights and practical lessons about micro-governance in the context of CBNRM, tools for designing and implementing conceptually rigorous community constitutions that enable communities to govern themselves fairly and effectively, and resources for developing the management and monitoring systems necessary to protect these conditions.

Psychological Testing Jan 15 2021 *Psychological Testing: A Practical Introduction* 4e offers students of psychology and allied disciplines a comprehensive survey of psychometric principles and tests in the major categories of applied assessment. Coverage includes test norms, reliability, validity, and test development, with an entirely new chapter on test fairness and bias. Chapters on assessment of cognitive ability, achievement, personality, clinical instruments, and attitudes provide up-to-date examples of the widely used tests in each category. Recognizing that active engagement maximizes learning, the text presents as an active learning device rather than a reference work. Extensive use of chapter objectives, key point and end-of-chapter summaries, practice problems, applied scenarios, internet-based resources, and statistics skills review enable students to engage more fully with the material for a deeper understanding. Written in a clear, reader-friendly style, the text approaches challenging topics by balancing technical rigor with relatable examples of contemporary applications.

The EFT Manual May 31 2022 This is a new and completely revised edition of the original manual for Emotional Freedom Techniques (EFT), one of the most successful psychology self-help techniques ever developed. Thousands of people tell amazing stories of how it has helped them with psychological problems like anxiety, depression, phobias, and PTSD, as well as physical problems like pain and stress. Author Dawson Church is the best-known researcher in the field, and this manual is based on Clinical EFT, the only version of EFT to be validated in dozens of scientific studies. Step by step, you will learn the "evidence-based" form of EFT used in those studies. You'll discover how you can identify the hidden roots of emotional problems, and how to alleviate them using EFTs "Basic Recipe" as well as advanced techniques. This book shows you how to use Clinical EFT for a variety of common conditions, including pain, fears, addictions and cravings, weight issues, insomnia, and guilt. With the healing keys of EFT, you'll be surprised at how many problems that hold you back can be quickly and easily relieved, opening up new possibilities for your life.

Bookmarks - A manual for combating hate speech online through human rights education Sep 22 2021 The work of the Council of Europe for democracy is strongly based on education: education in schools, and education as a lifelong learning process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the visible tip of the iceberg of intolerance and ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights; Europe needs young people to care and look after human rights, the life insurance for democracy. Bookmarks is published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online. Bookmarks is useful for educators wanting to address hate speech online from a human rights perspective, both inside and outside the formal education system. The manual is designed for working with learners aged 13 to 18 but the activities can be adapted to other age ranges. *Methods in Biotechnology* Feb 25 2022 As rapid advances in biotechnology occur, there is a need for a pedagogical tool to aid current students and laboratory professionals in biotechnological methods; *Methods in Biotechnology* is an invaluable resource for those students and professionals. *Methods in Biotechnology* engages the reader by implementing an active learning approach, provided advanced study questions, as well as pre- and post-lab questions for each lab protocol. These self-directed study sections encourage the reader to not just perform experiments but to engage with the material on a higher level, utilizing critical thinking and troubleshooting skills. This text is broken into three sections based on level – *Methods in Biotechnology*, *Advanced Methods in Biotechnology I*, and *Advanced Methods in Biotechnology II*. Each section contains 14-22 lab exercises, with instructor notes in appendices as well as an answer guide as a part of the book companion site. This text will be an excellent resource for both students and laboratory professionals in the biotechnology field.

New Models of Care for Patients with Severe Mental Illness – Bridging In- and Outpatients Mar 29 2022 Over the past years, psychiatric services have been continuously faced with the challenge of providing comprehensive care to people suffering from severe mental illnesses. Legal and conceptual advances like the UN convention on the rights of persons with disabilities or the concept of recovery have rendered this challenge more actual and urgent than ever. However, psychiatric institutions often show only low levels of cooperation and integration between their different services. Hence, they need to develop new ways of bridging all sectors of care in order to help people most in need on their way to recovery and full inclusion in society. In this research topic, European researchers and clinicians present new ways of dealing with this essential issue by developing strategies and interventions on both institutional and non-institutional levels. The nine contributions of this ebook thus reflect actual clinical and conceptual considerations. They all aim at improving quality of care and providing adequate support to people suffering from severe mental illness.

Treating Alcohol and Drug Abuse Apr 17 2021 What are the most promising strategies to treat alcohol and drug abuse? What are their medical implications? Despite the enormous resources spent on treating alcoholism and drug dependence, there is still no satisfactory evaluation of their effectiveness or of the cost of the different alternatives. Programs designed to treat substance abuse should be built on a foundation of evidence-based knowledge. Yet it is almost impossible to cope with the increasing amount of scientific literature. This book thus represents a guide through the myriads of articles. The most comprehensive scientific review of its kind, it presents the findings from more than 1,600 studies on the effectiveness of different treatments. The work also includes a summary of the methods available to intervene against harmful levels of alcohol, with most of the studies making use of the Diagnostic and Statistical Manual of Mental Disorders (DSM) system. The extensive results are arranged in detailed tables, which may be searched using the accompanying CD-ROM. Also enclosed are a quality checklist and an extensive glossary explaining more than 70 terms. An invaluable tool for medical researchers, clinicians and doctors as well as healthcare providers and insurers, allowing them to save major resources by identifying ineffective treatments and being aware of cost-effective alternatives. With a foreword by Henry R. Kranzler, University of Connecticut, USA.

Small AC Generator Service Volume 1 Ed. 3 Oct 31 2019 Service and maintenance procedures for small generators manufactured before 1990.

Clinical EFT Handbook Nov 12 2020 EFT (Emotional Freedom Techniques or "tapping") is used by an estimated 10 million people worldwide. Yet a lack of standardization has led to a field in which dozens of forms of EFT, with varying degrees of fidelity to the original, can be found. This led to the establishment of Clinical EFT, the form of EFT taught in the original EFT Manual and associated materials, and validated in over 20 clinical trials. In this volume, the most noted scholars, researchers and clinicians in the field compile a definitive outline of the EFT protocol, as it is applied in medicine, psychiatry, psychotherapy, and life coaching. This first volume covers • Biomedical and Physics Principles • Psychological Trauma • Fundamental Techniques of Clinical EFT. This series of handbooks is essential reading for anyone wishing to understand EFT as validated in research, science, and best clinical practice.

Implantable Cardioverter Defibrillator Therapy: The Engineering-Clinical Interface Aug 22 2021 HE IMPLANTABLE CARDIOVERTER DEFIBRILLATOR, or T"ICD," is arguably the most technologically challenging type of therapy that physicians utilize today. At the same time, engineers who design ICDs are being called upon by clinicians to extend even further the technological envelope in quest of building the "ideal" device. To the extent, however, that physicians who utilize ICDs are not sufficiently comfortable with or familiar with the engineering principles that guide ICD function, the full clinical potential of even an ideal device will not be realized. In complementary fashion, engineers require as full an appreciation as possible of the real world "boundary conditions" and clinical impact of various ICD features, if the latter are truly to be perfected. This book is intended to serve as an educational tool to foster mutual understanding and communication among physicians, engineers, and other professionals involved in ICD therapy,

with the ultimate purpose of enhancing patient care. The highly varied backgrounds of such a diverse audience posed obvious challenges in the preparation of this volume. Given the overwhelmingly greater involvement of clinicians in the day-to-day management and follow-up of ICD recipients, we gave high priority to the presentation of oftentimes complex yet relevant engineering concepts in a manner that could be understandable to most clinicians.
