**The Explorer's Roadmap to National-Socialism** Mar 27 2022 Whilst terms such as Lebensraum are commonly associated with National-Socialist ideology of the 1930s and 40s, ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics. Focusing on one of the most influential figures within this group, Sven Hedin, this is the first study that systematically connects the geographic community to the intellectual history of the development of National-Socialist ideology and genocidal practices. The book demonstrates how colonial, racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin. In Germany, Britain, France, and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians. Whilst this influence was to become

most visible within Hitler's Germany, the debates were not by any means restricted to or even originated in, Germany. Germany was the home of some of the most prominent geographers, but this scientific community had a tradition of international debate and exchange with especially British, French and Russian geographic societies and institutions. Many issues that were later discussed and championed by National-Socialist ideology were aired and debated in this international setting - raising important questions about the international character and impact of National-Socialism. Tracing the intellectual history of the international geographic community and its relationship to National-Socialism, this study provides an assessment of Hedin's close involvement with the Nazi elite as a culmination of decades of political and scientific work. In so doing the book uncovers a long ignored or overlooked important connection between exploration, geographers, and genocide. *Focus on Earth Science - California Edition* Feb 11 2021

**The Psychedelic Explorer's Guide** Aug 20 2021 Psychedelics for spiritual, therapeutic, and problem-solving use • Presents practices for safe and successful psychedelic voyages, including the benefits of having a guide and how to be a guide • Reviews the value of psychedelics for healing and self-discovery as well as how LSD has facilitated scientific and technical problem-solving • Reveals how

microdosing (ultr-low doses) improve cognitive functioning, emotional balance, and physical stamina • This year 600,000 people in the U.S. alone will try LSD for the first time, joining the 23 million who have already experimented with this substance Called “America’s wisest and most respected authority on psychedelics and their use,” James Fadiman has been involved with psychedelic research since the 1960s. In this guide to the immediate and long-term effects of psychedelic use for spiritual (high dose), therapeutic (moderate dose), and problem-solving (low dose and microdose) purposes, Fadiman outlines best practices for safe, sacred entheogenic voyages learned through his more than 40 years of experience--from the benefits of having a sensitive guide during a session (and how to be one) to the importance of the setting and pre-session intention. Fadiman reviews the newest as well as the neglected research into the psychotherapeutic value of visionary drug use for increased personal awareness and a host of serious medical conditions, including his recent study of the reasons for and results of psychedelic use among hundreds of students and professionals. He reveals new uses for LSD and other psychedelics, including microdosing, extremely low doses, for improved cognitive functioning and emotional balance. Cautioning that psychedelics are not for everyone, he dispels the myths and misperceptions about psychedelics circulating in textbooks and clinics as well as on the internet. Exploring the life-

changing experiences of Ram Dass, Timothy Leary, Aldous Huxley, and Huston Smith as well as Francis Crick and Steve Jobs, Fadiman shows how psychedelics, used wisely, can lead not only to healing but also to scientific breakthroughs and spiritual epiphanies.
