*A View of Sir Isaac Newton's Philosophy* Apr 27 2020 A celebrated work in the history of science and a monument of British book design. First book to be printed in Caslon's Great Primer Roman

*A House Called Askival* Dec 04 2020 An elegant, moving and heartfelt love letter to the sights, sounds and tastes of northern India told through the enthralling story of the troubled relationship between a father and daughter stretching from Partition to the present day. James Connor is a man who, burdened with guilt following a tragic event in his youth, has dedicated his life to serving India. Ruth Connor is his estranged daughter who, as a teenager, always knew she came second to her parents' missionary vocation and rebelled, with equally tragic consequences. After 24 years away, Ruth finally returns to Askival, the family home in Mussoorie, a remote hill station in the Northern State of Uttarakhand, to tend to her dying father. There she must face the past and confront her own burden of guilt if she is to cross the chasm that has grown between them. In this extraordinary and assured debut, Merryn Glover draws on her own upbringing as a child of missionary parents in Uttarakhand to create this sensitive, complex, moving and epic journey through the sights, sounds and often violent history of India from Partition to the present day. 'An original and engaging story. Glover understands houses are never just houses. Askival will break your heart.' Cynthia Rogerson, author of *I Love You, Goodbye* and *If I Touched the Earth*

*The Conductors* Aug 12 2021 A compelling debut by a new voice in fantasy fiction, *The Conductors* features the magic and mystery of Jim Butcher's *Dresden Files* written with the sensibility and historical setting of Octavia Butler's *Kindred* introducing Hetty Rhodes, a magic-user and former conductor on the Underground Railroad who now solves crimes in post-Civil War Philadelphia. As a conductor on the Underground Railroad, Hetty Rhodes helped usher dozens of people North with her wits and magic. Now that the Civil War is over, Hetty and her husband Benjy have settled in Philadelphia, solving murders and mysteries that the white authorities won't touch. When they find one of their friends slain in an alley, Hetty and Benjy bury the body and set off to find answers. But the secrets and intricate lies of the elites of Black Philadelphia only serve to dredge up more questions. To solve this mystery, they will have to face ugly truths all around them, including the ones about each other. In this vibrant and original novel, Nicole Glover joins a roster of contemporary writers within fantasy, such as Victor LaValle and Zen Cho, who use speculative fiction to delve into important historical and cultural threads.

*Studyguide for Power System Analysis and Design by Glover, J. Duncan* Jun 22 2022 Never HIGHLIGHT a Book Again Includes all testable terms, concepts, persons, places, and events. Cram101 Just the FACTS101 studyguides gives all of the outlines, highlights, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanies: 9780872893795. This item is printed on demand.

*Outlines and Highlights for Power System Analysis and Design by J Duncan Glover* Apr 20 2022 Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanys: 9780534548841 .

*Design and Technology* Jun 10 2021 *Design and Technology: Preliminary and HSC* is a complete revision of Noel Glover's highly successful *Design and Technology for Senior Students*. This new text provides full coverage of the *Design and Technology Stage 6 Syllabus*. CD-ROM Features Video interviews with design professionals More than 20 templates for students to use when preparing the folio that accompanies the major design project.

*It Didn't Happen* May 29 2020 Laura's brother, Paul, had been missing for 48 hours - he and his erstwhile girlfriend, Melissa. So when he was found, dripping wet and on his own, many people leaped to a natural, unflattering, and very wrong conclusion. But the correct story was so unlikely, and ran counter to so many long-held pre-conceptions, that there is no chance that anyone will believe it. Abducted by aliens? The boy must be hallucinating! Can he pull himself together enough, in his exhausted and shocked state, to delude the police and doctors, and not get arrested for murdering Melissa? His only chance is if Melissa is found safe and well - but he is sure that she elected to stay with the aliens, and not return at all. Can Melissa triumph over her essentially selfish nature, and do the honourable thing?

*Leavin' a Testimony* Mar 07 2021 Portraits from rural Texas.

*The Shriver Report* Apr 08 2021 Facts, figures, and essays on women and poverty by Barbara Ehrenreich, Kirsten Gillibrand, LeBron James, and other high-profile contributors. Fifty years after President Lyndon B. Johnson called for a War on Poverty and enlisted Sargent Shriver to oversee it, the most important social issue of our day is once again the dire economic straits of millions of Americans. One in three live in poverty or teeter on the brink—and seventy million are women and the children who depend on them. The fragile economic status of millions of American women is the shameful secret of the modern era—yet these women are also our greatest hope for change, and our nation's greatest undervalued asset. *The Shriver Report: A Woman's Nation Pushes Back from the Brink* asks—and answers—big questions. Why are millions of women financially vulnerable when others have made such great progress? Why are millions of women struggling to make ends meet even though they are hard at work? What is it about our nation—government, business, family, and even women themselves—that drives women to the financial brink? And what is at stake? To forge a path forward, this book brings together a power-packed roster of big thinkers and talented contributors, in a volume that combines academic research, personal reflections, authentic photojournalism, groundbreaking poll results, and insights from frontline workers; political, religious, and business leaders; and major celebrities—all focused on a single issue of national importance: women and the economy. "A startling wake-up call for policymakers and anyone hoping to survive a culture that siphons wealth upward to a very powerful few." —Booklist Contributors include: Carol Gilligan, PhD \* Barbara Ehrenreich \* Beyoncé Knowles-Carter \* LeBron James \* Anne-Marie Slaughter \* Kirsten Gillibrand \* Hillary Rodham Clinton \* Tory Burch \* Sister Joan Chittister \* Arne Duncan \* Kathleen Sibelius \* Howard Schultz \* and more!

*Concrete Lies & Abstract Truths* Oct 02 2020 As eyes are like windows to the soul, writing is like a door. You get more than a glimpse; you are being invited into a person's innermost thoughts, desires and dreams. Percy Glover has seen and experienced a lot in life, and has proven time and again that

*your current position does not dictate your future success.-- Danielle E. Ward, author of Warning Signs: what every woman should know RFID Essentials Aug 20 2019 Tag Protocols; Protocol Terms and Concepts; How Tags Store Data; GSI SGTIN Encoding; Find the header; Find the partition; Concatenate the header, filter value, and partition; Append the Company Prefix, Item Reference, and Serial Number; Calculate the CRC and append the EPC to it; Singulation and Anti-Collision Procedures; Slotted Aloha; Adaptive Binary Tree; Slotted Terminal Adaptive Collection (STAC); EPC UHF Class I Gen2; Tag memory; Inventory commands; The Select command; Access commands; Tag states; Tag Features for Security and Privacy; Destroying and Disabling Tags.*

*Choosing Children Feb 18 2022 Progress in genetic and reproductive technology now offers us the possibility of choosing what kinds of children we do and don't have. Should we welcome this power, or should we fear its implications? There is no ethical question more urgent than this: we may be at a turning-point in the history of humanity. The renowned moral philosopher and best-selling author Jonathan Glover shows us how we might try to answer this question, and other provoking and disturbing questions to which it leads. Surely parents owe it to their children to give them the best life they can? Increasingly we are able to reduce the number of babies born with disabilities and disorders. But there is a powerful new challenge to conventional thinking about the desirability of doing so: this comes from the voices of those who have these conditions. They call into question the very definition of disability. How do we justify trying to avoid bringing people like them into being? In 2002 a deaf couple used sperm donated by a friend with hereditary deafness to have a deaf baby: they took the view that deafness is not a disability, but a difference. Starting with the issues raised by this case, Jonathan Glover examines the emotive idea of 'eugenics', and the ethics of attempting to enhance people, for non-medical reasons, by means of genetic choices. Should parents be free, not only to have children free from disabilities, but to choose, for instance, the colour of their eyes or hair? This is no longer a distant prospect, but an existing power which we cannot wish away. What impact will such interventions have, both on the individuals concerned and on society as a whole? Should we try to make general improvements to the genetic make-up of human beings? Is there a central core of human nature with which we must not interfere? This beautifully clear book is written for anyone who cares about the rights and wrongs of parents' choices for their children, anyone who is concerned about our human future. Glover handles these uncomfortable questions in a controversial but always humane and sympathetic manner.*

*Hybrid Play Nov 15 2021 This book explores hybrid play as a site of interdisciplinary activity—one that is capable of generating new forms of mobility, communication, subjects, and artistic expression as well as new ways of interacting with and understanding the world. The chapters in this collection explore hybrid making, hybrid subjects, and hybrid spaces, generating interesting conversations about the past, current and future nature of hybrid play. Together, the authors offer important insights into how place and space are co-constructed through play; how, when, and for what reasons people occupy hybrid spaces; and how cultural practices shape elements of play and vice versa. A diverse group of scholars and practitioners provides a rich interdisciplinary perspective, which will be of great interest to those working in the areas of games studies, media studies, communication, gender studies, and media arts.*

*Factory 19 Jul 19 2019 We're told that the future will be brighter. But what if human happiness really lies in the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and begins to unload its cargo on the site of the once famous but now abandoned Gallery of Future Art, known to the world as GoFA. One day the city's residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA's owner, world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He's going to defeat technology's dominance over our lives by establishing a new Year Zero: 1948. Those whose jobs have been destroyed by Amazon and Uber and Airbnb are invited to fight back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. 'Like Orwell, of whom he has written so brilliantly, Dennis Glover's work is charged with courage, intelligence and purpose. He is the complete writer, and one made for our times.' —Don Watson 'Savagely hilarious and unlike anything else you'll read this year. It boils with the anger of the present moment.' —Rohan Wilson*

*Ethics and Humanity May 09 2021 This work pays tribute to Jonathan Glover, a pioneering figure whose thought and personal influence have had a significant impact on applied philosophy. The papers collected here address topics to which Glover has contributed.*

*Tabu Search Jun 29 2020 Faced with the challenge of solving hard optimization problems that abound in the real world, classical methods often encounter great difficulty - even when equipped with a theoretical guarantee of finding an optimal solution. Vitrally important applications in business, engineering, economics and science cannot be tackled with any reasonable hope of success, within practical time horizons, by solution methods that have been the predominant focus of academic research throughout the past three decades (and which are still the focus of many textbooks). The impact of technology and the advent of the computer age have presented us with the need (and opportunity) to solve a range of problems that could scarcely have been envisioned in the past. We are confronted with applications that span the realms of resource planning, telecommunications, VLSI design, financial analysis, scheduling, space planning, energy distribution, molecular engineering, logistics, pattern classification, flexible manufacturing, waste management, mineral exploration, biomedical analysis, environmental conservation and scores of others.*

*Power System Analysis and Design, SI Edition Sep 25 2022 Today's readers learn the basic concepts of power systems as they master the tools necessary to apply these skills to real world situations with POWER SYSTEM ANALYSIS AND DESIGN, 6E. This new edition highlights physical concepts while also giving necessary attention to mathematical techniques. The authors develop both theory and modeling from simple beginnings so readers are prepared to readily extend these principles to new and complex situations. Software tools and the latest content throughout this edition aid readers with design issues while reflecting the most recent trends in the field. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.*

*Black Star Jan 05 2021 Stranded on an alien planet, two astronauts must battle deadly elements and each other to recover a reserve shuttle built for one Black Star is a debut graphic novel by Eric Anthony Glover, based on his original unproduced screenplay, and illustrated by Arielle Jovellanos. In the future, interstellar travel is past its prime and sending shuttles beyond our solar system—even for vital scientific research—is a life-threatening gamble. However, in order to retrieve samples of an alien flower that may hold the key to saving countless lives, Harper North and her crew of scientists must journey to Eleos, a dangerous planet in deep space. But as they approach Eleos, their ship is caught in an asteroid storm and as it hurtles towards the surface, its reserve shuttle detaches, landing over 100 kilometers away. When the rest of the crew perishes in the burning wreckage of the ship, North races towards the rescue shuttle built for one, hoping to fulfill their mission and survive. But North isn't alone: The team's wilderness expert is still alive and hell-bent on hunting North down and claiming the shuttle for herself. Now, North has no choice but to reach the shuttle first—and fast. The fuel is leaking. Her GPS battery is dying. And the planet's deadly seasonal change is coming. As she battles the flora and fauna and tries to elude her ruthless former crew mate, North will find the cost of survival is dear . . . Will she be willing to pay that price?*

*Power System Analysis and Design Nov 22 2019 Examine the basic concepts behind today's power systems as well as the tools you need to apply your*

newly acquired skills to real-world situations with *POWER SYSTEM ANALYSIS AND DESIGN, 7th Edition*. The latest updates throughout this new edition reflect the most recent trends in the field as the authors highlight key physical concepts with clear explanations of important mathematical techniques. New co-author Adam Birchfield joins this prominent author team with fresh insights into the latest technological advancements. The authors develop theory and modeling from simple beginnings, clearly demonstrating how you can apply the principles you learn to new, more complex situations. New learning objectives and helpful case study summaries help focus your learning, while the updated PowerWorld Simulation works seamlessly with this edition's content to provide hands-on design experience. WebAssign for Glover/Overbye/Sarma's *Power System Analysis and Design, 7th Edition*, helps you prepare for class with confidence. Its online learning platform for your math, statistics, science and engineering courses helps you practice and absorb what you learn.

*Power System Analysis and Design Aug 24 2022* The new edition of *POWER SYSTEM ANALYSIS AND DESIGN* provides students with an introduction to the basic concepts of power systems along with tools to aid them in applying these skills to real world situations. Physical concepts are highlighted while also giving necessary attention to mathematical techniques. Both theory and modeling are developed from simple beginnings so that they can be readily extended to new and complex situations. The authors incorporate new tools and material to aid students with design issues and reflect recent trends in the field. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

*Continuous Integration Feb 24 2020*

*Advancing a Design Approach to Enriching Public Mobility Sep 01 2020* This book examines research at the intersection of design and public mobility from both an academic and practice perspective. An eclectic collection of projects and topics not normally found in the mainstream literature on transportation, from implementing gender-sensitive design to examining how to reconceptualize future public interactions with mobility. The book brings together leading thinkers in design and mobility from around the world and from different modal perspectives sharing insights into how we navigate the emerging public mobility landscape. This collection is valuable for transport operators and practitioners seeking to better understand the impact design can have on public mobility and innovate in a rapidly changing operational environment.

*Savage Love Mar 27 2020* An Amazon.ca Best Book of 2013 A Globe and Mail Top 100 for 2013 A Quill & Quire Best Book of 2013 Longlisted, Frank O'Connor International Short Story Award Savage Lovemarks the long-awaited literary return of one of Canada's most lauded and stylistically brilliant authors. Slyly holding forth with subversive wit, Glover skewers every conventional notion we've ever held about that cultural & emotional institution of love we are instructed to hold dear. Peopled with forensic archaeologists, members of ancient tribes, horoscope writers, dental hygienists, butchers -- Glover's stories are of our time yet timeless; spectacular fables that stand in any era, any civilization. Whether we be sexually ambiguous librarians or desperadoes of the most despicable kind, Glover exposes the humanity lurking behind our masks, and the perversities that underlie our actions. Absurd, comic, dream-like, deeply affecting (on the molecular level): these stories revel in inventiveness yet preserve a strict adherence to the real. Glover directs his focus to moments when things seem too incredible to be supported, pointing us to truths that exhibit human nature in contexts we all recognize. Savage Lovemarks the return of a master, with laugh-out-loud stories of the best kind, often completely unexpected, rife with moments of tragedy or horror. This is Douglas Glover country, and we are all willing visitors.

*Digital Communications Jan 25 2020* Digital communications is the foundation of modern telecommunications and digital signal processing. The second edition of *Digital Communications* is updated to include current techniques and systems used in the rapidly expanding field of fixed and mobile communications. The text has comprehensive coverage of digital communications without going into unnecessary detail or irrelevant topics. Its main aims are to develop the mathematical theory behind signal processing and use this knowledge to develop fixed and mobile data communications systems. This text is geared towards students who already have a technical understanding of electrical engineering from their introductory years at university and who wish to focus on digital communications. It covers everything these students will need to know, including modern techniques.

*Did I Say That Out Loud? Sep 13 2021* 'Joyous, wise, reassuring and laugh-out-loud funny. I love these two women so much.' Elizabeth Day 'I can say with full confidence that Jane Garvey and Fi Glover are the two funniest women on planet earth right now.' Dolly Alderton 'A book like no other. Honest and very, very funny. Some bits made me want to cheer - a sentence on parenting teenage girls was so good I may get it tattooed on myself, possibly in Hebrew.' Sara Cox 'You'll laugh, you'll nod your head so vigorously in agreement that you'll end up with whiplash and you'll buy a copy of this book for all your friends for Christmas. If you loved the late, great Victoria Wood, then you'll love Fi and Jane too.' Red magazine Award-winning broadcasters Fi Glover and Jane Garvey don't claim to have all the answers (what was the question?), but in these hilarious and perceptive essays they take modern life by its elasticated waist and give it a brisk going over with a stiff brush. They riff together on the chuff of life, from pet deaths to broadcasting hierarchies, via the importance of hair dye, the perils and pleasures of judging other women, and the perplexing overconfidence of chino-wearing middle-aged white men named Roger. *Did I Say That Out Loud?* covers essential life skills (never buy an acrylic jumper, always decline the offer of a limoncello), ponders the prudence of orgasm merchandise and suggests the disconcerting possibility that Christmas is a hereditary disease, passed down the maternal line. At a time of constant uncertainty, what we all need is the wisdom of two women who haven't got a clue what's going on either.

*Power System Analysis Oct 22 2019* This updated edition includes: coverage of power-system estimation, including current developments in the field; discussion of system control, which is a key topic covering economic factors of line losses and penalty factors; and new problems and examples throughout.

*Power System Analysis and Design, SI Edition Jul 23 2022* Examine the basic concepts behind today's power systems as well as the tools you need to apply your newly acquired skills to real-world situations with *POWER SYSTEM ANALYSIS AND DESIGN, SI, 7th Edition*. The latest updates throughout this new edition reflect the most recent trends in the field as the authors highlight key physical concepts with clear explanations of important mathematical techniques. New co-author Adam Birchfield joins this prominent author team with fresh insights into the latest technological advancements. The authors develop theory and modeling from simple beginnings, clearly demonstrating how you can apply the principles you learn to new, more complex situations. New learning objectives and helpful case study summaries help focus your learning, while the updated PowerWorld Simulation works seamlessly with this edition's content to provide hands-on design experience. WebAssign for Glover/Overbye/Sarma's *Power System Analysis and Design, SI, 7th Edition*, helps you prepare for class with confidence. Its online learning platform for your math, statistics, science and engineering courses helps you practice and absorb what you learn.

*Man of Iron Dec 16 2021* The enthralling Sunday Times-bestselling biography of the shepherd boy who changed the world with his revolutionary engineering and whose genius we still benefit from today 'A biography of great verve ... brings back to vivid life a man who should never have been forgotten' Andrew Marr 'An evocative biography of Britain's greatest civil engineer ... Glover catches the thrill of Telford's engineering quite beautifully' Guardian Thomas Telford's name is familiar; his story less so. Born in 1757 in the Scottish Borders, his father died in his infancy, plunging the family into poverty. Telford's life soared to span almost eight decades of gloriously obsessive, prodigiously productive energy. Few people have done more to shape our nation. A stonemason turned architect turned engineer, Telford invented the modern road, built churches, harbours, canals, docks, the famously vertiginous Pontcysyllte aqueduct in Wales and the dramatic Menai Bridge. His constructions were the greatest in Europe for a thousand years, and - astonishingly - almost everything he ever built remains in use today. Intimate, expansive and drawing on contemporary accounts, *Man of*

*Iron is the first full modern biography of Telford. It is a book of roads and landscapes, waterways and bridges, but above all, of how one man transformed himself into the greatest engineer Britain has ever produced.*

*Canon of Design May 21 2022 There's nothing more important to the future of your artwork than to educate and nurture the unique talent you were born to share with the world. The Canon of Design represents artistic integrity, and enables you to leave your mark on this earth as one of the most talented visual communicators ever known. Learn the language of design to stand with the great masters and reflect the beauty prominently found in nature. This field manual is written to you, for you, and will help shorten your journey to achieving artistic excellence!*

*Power System Analysis and Design Jul 11 2021 A text with emphasis on the design of power systems. The authors use their extensive teaching experience to present methods of power system analysis and design, with thorough coverage of basic theory.*

*Dynamic Symmetry Jul 31 2020 Serious visual artists can now easily understand and apply the secret geometry that masters used to create remarkable art. Superior mathematical skills aren't required because there are hundreds of excellent step-by-step diagrams to explain everything with simplicity. Learn how the ancient and modern masters used dynamic symmetry to promote unity, movement, rhythm, and strength. These qualities, along with many others, allowed their art to have visual clarity, impact, and stand the test of time. This is an essential book for painters, photographers, sculptors, and cinematographers that hold composition and design with a high priority. For far too long, artists have been stuck with the basic tools of artistic composition, like the rule of thirds and leading lines. Unfortunately, we're incapable of reaching the master level if all we know are the basics. Powerful tools like dynamic symmetry and other composition techniques have been kept a secret from all of us. It's time to learn of them, push past any plateau that stands in our way, and finally unlock our true potential!*

*Masterpiece Feb 06 2021 Art, fashion, fame and sex - artist Esther Glass has it all. That is, until a ghost from her past threatens to destroy her perfect life. Trying to cover her tracks, Esther goes for ultimate sensation, selling herself as a living work of art. She takes the international art scene by storm, performing as the female sitters inside seven great paintings. But underneath the surface the cracks start to show as Esther is forced to reconcile a very private history with a very public life. Fast-paced, smart and scintillating, Masterpiece gives the reader a rare glimpse into a closed world.*

*Control of Uncertain Systems: Modelling, Approximation, and Design Mar 19 2022 This Festschrift contains a collection of articles by friends, co-authors, colleagues, and former Ph.D. students of Keith Glover, Professor of Engineering at the University of Cambridge, on the occasion of his sixtieth birthday. Professor Glover's scientific work spans a wide variety of topics, the main themes being system identification, model reduction and approximation, robust controller synthesis, and control of aircraft and engines. The articles in this volume are a tribute to Professor Glover's seminal work in these areas.*

*Thrust Sep 20 2019 A laugh-out-loud visual history of the strangest piece of men's clothing ever created: the codpiece. The codpiece was fashioned in the Middle Ages to close a revealing gap between two separate pieces of men's tights. By the sixteenth century, it had become an upscale must-have accessory. This lighthearted, illustrated examination of its history pulls in writers from Rabelais to Shakespeare and figures from Henry VIII to Alice Cooper. Glover's witty and entertaining prose reveals how male vanity turned a piece of cloth into a bulging and absurd representation of masculinity itself. The codpiece, painted again and again by masters such as Titian, Holbein, Giorgione, and Bruegel, became a symbol of royalty, debauchery, virility, and religious seriousness—all in one. Centuries of male self-importance and delusion are on display in this highly enjoyably new title. Glover's book moves from paintings to contemporary culture and back again as it charts the growing popularity of the codpiece and its eventual decline. The first history of its kind, this book is a must-read for art historians, anthropologists, fashion aficionados, and readers looking for a good, long laugh.*

*Power System Analysis and Design Oct 26 2022 Today's readers learn the basic concepts of power systems as they master the tools necessary to apply these skills to real world situations with POWER SYSTEM ANALYSIS AND DESIGN, 6E. This new edition highlights physical concepts while also giving necessary attention to mathematical techniques. The authors develop both theory and modeling from simple beginnings so readers are prepared to readily extend these principles to new and complex situations. Software tools and the latest content throughout this edition aid readers with design issues while reflecting the most recent trends in the field. *Solutions Manual to Accompany Power System Analysis and Design Nov 03 2020*

*The Last Man in Europe Jun 17 2019 'Rivetingly told . . . a terrifically assured hybrid of fiction and life-writing' – New Statesman 'Dennis Glover's pacy novelisation of Orwell's life takes its title from the one Orwell first had in mind for his totalitarian dystopia . . . Glover magically wrings high-stakes drama from the fundamentally undramatic scene of the writer at his desk' – Daily Mail The Last Man in Europe adopts the sound of Orwell so brilliantly . . . anyone with an interest in Orwell will certainly enjoy it' – Orwell Society The Last Man in Europe shows its readers the influences which shaped Orwell's masterpiece, but transcends even that, giving an affecting portrait of the man himself' – The Herald 1947. In a damp, run-down farmhouse on the island of Jura, George Orwell is embarking on his greatest work: Nineteen Eighty-Four. Forty-four years old and suffering from the tuberculosis that will eventually take his life, this book is his legacy – the culmination of a career spent fighting to preserve the freedoms which the wars and upheavals of the twentieth century have threatened. Completing the book is an urgent task – a race against death. Dennis Glover explores the creation of Orwell's final work, which for millions of readers worldwide defined the twentieth century. Simultaneously a captivating drama, a unique literary excavation and an unflinching portrait of a beloved writer, The Last Man in Europe will change the way you understand Nineteen Eighty-Four and George Orwell himself.*

*Rose Wylie: painting a noun... Dec 24 2019 Celebrated British painter Rose Wylie—whose works are at once tactile, cerebral, and humorous—often draws her influence from a wide range of popular culture. Here her newest body of work references memories from her own life and mimics the way memories evolve and change over time. Wylie's source material is culled from the vast visual world around her, ranging from sixteenth-century British estates to Serena Williams and the French Open. While initially these may seem random or aesthetically simplistic, through the nuanced use of humor, language, and compositional structure, Wylie creates wittily observed and subtly sophisticated meditations on the nature of memory, and visual representation itself, in line with the paintings she has become known for over the course of her career. A new essay by art critic Michael Glover explores the remarkable painter whose work has “spark, assurance, brash humor, an extraordinary, freewheeling eclecticism that seems to be just as ready to suck in references to the art of Ptolemaic Egypt and Roman portraiture as to pay homage to the films of Quentin Tarantino and the late paintings of Philip Guston.” Part of David Zwirner Books's Spotlight Series, this book features Wylie's newest paintings and drawings and is published on the occasion of the artist's 2020 solo exhibition of these works at David Zwirner Hong Kong.*
