Backpacker Jan 14 2021 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Critical Thinking: A User's Manual Jun 30 2022 CRITICAL THINKING: A USER'S MANUAL offers an innovative skill-based approach to critical thinking that provides step-by-step tools for examining arguments. Users build a complete skill set by recognizing, analyzing, diagramming, and evaluating arguments. Later chapters encourage application of the basic skills to categorical, truth-functional, analogical and inductive, and causal arguments as well as fallacies. Exercises throughout the book engage readers in active learning, integrate writing as part of the critical thinking process, and emphasize skill transference. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

How to Teach a New Dog Old Tricks Dec 25 2021 Voted the #1 BEST BOOK (1999) by the Association of Pet Dog Trainers - the largest and most influential worldwide association of professional pet dog trainers. Fun training with toys, treats, lures, and rewards. Easy, fun-loving, dog-friendly methods for teaching basic manners off-leash, and for temperament modification and behavior problem troubleshooting. Written from the dog's point of view and emphasizing natural motivational methods to teach your dog to want to do what you want him to do! "How To Teach A New Dog Old Tricks is the best book by dog training's leading genius. The most relevant, important piece ever written on the subject of dog behavior and training. Some fields are lucky enough to be granted a giant: a figure whose contributions inspire awe and are unsurpassable. Ian Dunbar is that in dog behavior. There is no single person on the face of the planet to whom dog trainers and owners (not to mention dogs) owe more."

The Manual of Ideas Dec 01 2019 Reveals the proprietary framework used by an exclusive community of top money managers and value investors in their never-ending quest for untapped investment ideas Considered an indispensable source of cutting-edge research and ideas among the world's top investment firms and money managers, the journal The Manual of Ideas boasts a subscribers list that reads like a Who's Who of high finance. Written by that publication's managing editor and inspired by its mission to serve as an "idea funnel" for the world's top money managers, this book introduces you to a proven, proprietary framework for finding, researching, analyzing, and implementing the best value investing opportunities. The next best thing to taking a peek under the hoods of some of the most prodigious brains in the business, it gives you uniquely direct access to the thought processes and investment strategies of such super value investors as Warren Buffett, Seth Klarman, Glenn Greenberg, Guy Spier and Joel Greenblatt. Written by the team behind one of the most read and talked-about sources of research and value investing ideas Reviews more than twenty pre-qualified investment ideas and provides an original ranking methodology to help you zero-in on the three to five most compelling investments Delivers a finely-tuned, proprietary investment framework, previously available only to an elite group of TMI subscribers Step-by-step, it walks you through a proven, rigorous approach to finding, researching, analyzing, and implementing worthy ideas

Expert Systems in Construction and Structural Engineering Mar 16 2021 Expert Systems in Construction and Structural Engineering is a valuable reference both for researchers interested in the state-of-the-art of civil engineering expert systems, and practitioners interested in exploring the practical applications of this new technology.

Help for Ascension Into the 5th Dimension Oct 30 2019 Earth and her humans are about to complete a dimensional change. This is why the time in which we are now living on Earth is rich in transformation. The Sirians want to help us humans during this important time of transition. We are equal space siblings. With their brief statements, they aim to specifically reach people who do not have the time to deal more intensely with the subject of dimensional change. These are instructions for a time of pervasive changes. We all contribute in the Light of the ONE. We are all connected to each other. Love will keep us together forever.

SystemC Apr 16 2021 This comprehensive survey on the state of the art of SystemC in industry and research is organised into 11 self-contained chapters. Selected SystemC experts present their approaches in the domains of modelling, analysis and synthesis, ranging from mixed signal and discrete system to embedded software.

The Car Hacker's Handbook Jul 28 2019 Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Hope Jul 08 2020 What hope is, what hope isn't, and how to find it in hopeless times. Hope is not optimism. It's not toxic positivity. It's not a promise of future success or progress. And it's definitely not something that can be reduced to a scripty-font platitude on an Instagram post. So what is it? One thing is certain: real hope demands that we do something with it. That we live it out. That we use hope to participate in a bigger story playing out behind the bleak world we see on the news or in our social media feeds every day. It doesn't matter whether you're a person of faith, or someone disillusioned with faith, or someone who hardly ever thinks about faith: if you're a human being who longs for a spiritual counternarrative to live by, this book points to one resilient enough to endure crises and crushing defeats. If you're tired of hearing about some heavenly hereafter amid the pressing need for justice here and now, this is a book about hope for this world—not the next. After exploring what hope isn't and then what it is, MaryAnn McKibben Dana reflects on the surprising place where hope is often found—in the messiness of our imperfect, flawed, beautiful human bodies. In the second half of the book, she talks about making hope real: sharing hope through stories, cultivating hope through simple practices, and nurturing hope in hopeless times—when only real hope can persevere.

A Combined Data and Power Management Infrastructure Oct 03 2022 This book describes the development and design of a unique combined data and power management infrastructure for small satellites. This new edition became necessary because in the frame of the system's impressive evolution from an academic prototype to one of today's most advanced core avionics, many elements were upgraded to their next technology generation and diverse new components complement the upgraded design. All elements are presented in updated respectively new chapters. This modular infrastructure was selected by the Swiss start-up ClearSpace SA for ESA's first mission ClearSpace-1 to remove space debris. Furthermore it is the baseline for the Thai national satellite development program and is used by an increasing number of universities worldwide for research studies.

Image Processing for Broadcast and Video Production May 18 2021 Recent developments in computer visualisation mean that it is now possible to combine computer-generated image sequences with real video, in real time, for broadcast quality production. This will not only revolutionise the broadcast industry, by making "electronic film sets" possible for example, but also has important implications for related fields such as virtual reality, multi-media, industrial vision, and medical image processing. This volume contains papers from the European Workshop on Combined Real and Synthetic Image Processing for Broadcast and Video Production, held in Hamburg, 23-24 November 1994. The papers cover three main aspects of research: hardware, image analysis, and image synthesis, and include several key contributions from the EU RACE II supported MONA LISA (MOdelling NATural Images for Synthesis and Animation) project. The resulting volume gives a comprehensive overview of this important area of research, and will be of interest to practitioners, researchers, and postgraduate students.

Treat Me Like Your Car Jun 18 2021 You know that if you want your car to run smoothly, you have to keep up with the mandatory maintenance. Check the oil every so often, inspect the tires for pressure and wear, get them rotated if they need it, lubricate the locks, and keep up with your car-wash dates. And if you really want to take care of it, have the proper rags and tools on hand to clean off any sudden dirt or fingerprints. Playboy Playmate, Deal or No Deal model, and Hot Laps host Pilar Lastra has rebuilt a 1990 Mustang using just a fifteen-dollar repair manual and junkyard parts. She's not only fluent in hot rod; she also speaks the language of the opposite sex. Think of Pilar as your ultimate translator. In *Treat Me Like Your Car*, she teaches you everything you need to know in order to cruise the lot, avoid the lemons, find your dream car, and enjoy the ride. Full of much-needed advice, hilarious real-life relationship scenarios, and Pilar's unique "Tales from the Passenger's Side," *Treat Me Like Your Car* gives you the tools you need to find and hold a fulfilling relationship. All women (whether they know it or not) want to be treated like your car. *Treat Me Like Your Car* makes it just as easy. A little elbow grease is a small price to pay for a smooth ride.

PC Mag Dec 13 2020 PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

The Healthy Pet Manual Jan 26 2022 Examines the environmental, dietary, and lifestyle-related causes of cancer in pets and how to safeguard their well-being • Cancer is the number one killer of most domestic animals • Includes health care information on dogs, cats, ferrets, rabbits, and guinea pigs • The first consumer-oriented book to assess conventional and alternative treatment options Keeping their pets healthy and happy is the number one priority of pet owners. Having lost four animal companions to cancer, author Deborah Straw became frustrated by the lack of information about what was causing the disease and wanted to know what she could do to treat and prevent it. This thorough and comprehensive guide is the result of her search for answers. It provides readers with the knowledge of how to ward off the unforeseen causes of cancer and protect the safety and health of their pets. Cancer is the number one killer of most domestic animals. This revised and expanded edition of *Why Is Cancer Killing Our Pets?* includes the most up-to-date information on the environmental, dietary, and vaccine-related culprits that may cause cancer in pets and the preventive measures that can be taken against this disease. Readers whose pets have been diagnosed with cancer will benefit from the full spectrum of both conventional and alternative treatments presented in this book—from chemotherapy and laser surgery to herbal therapy, acupuncture, and touch therapy. In addition, readers will find guidance about caring for a sick pet and grieving his or her loss should the pet die. Full of information, options, and support, this is an essential resource for protecting pets.

Sirius Feb 12 2021 This book tells two stories. The first and most obvious is why the star known as Sirius has been regarded as an important fixture of the night sky by many civilizations and cultures since the beginnings of history. A second, but related, narrative is the prominent part that Sirius has played in how we came to achieve our current scientific understanding of the nature and fate of the stars. This is the first book to integrate the cultural history of Sirius with modern astrophysics in a way which provides a realistic view of how science progresses over time.
