Defy Not the Heart Jan 14 2021 The first book in the Shefford series from #1 New York Times bestselling author of historical romance, Johanna Lindsey. Reina seethes with rage over her fate: taken captive by the knight Ranulf -- a golden giant of a man -- who has pledged to deliver her to the nuptial bed of the despised Lord Rothwell. She will never accept such bondage -- and Reina offers herself to her kidnapper instead, offering to make Ranulf a great lord...if he agrees to wed her. But the brave knight desires much more than a marriage of convenience from this proud, headstrong lady who treats him with scorn yet makes his blood run hotter than liquid fire. She must come to him of her own free will -- or Ranulf will take her. For the passion that consumes them both cannot long be denied -- even though graver peril surely awaits them on the heart's trail to a destiny and turbulent love.

Allied Torpedo Boats May 18 2021 "An inspirational/enjoyable book with excellent representations of a wide variety of [Motor Torpedo Boats] by various modelers in a variety of scales."—ModelGeek The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeler through a brief history of the subject class, highlighting differences between sisterships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring color profiles and highly detailed line drawings and scale plans. The modeling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references—books, monographs, large-scale plans and relevant websites. This volume follows the format of the highly successful Flower Class Corvettes where the extent has been doubled to include far more detailed drawings of the many different designs of British MTBs and US PT-boats, including their fittings, sensors and weapons. "The content is packed with information that makes you want to turn a page, from the history of torpedo boats from 1915-1945, which then goes on to model products, showcase, construction, aftermarket products for scales 1-1200 to 1-100... Dynamics of Contact-Induced Language Change Jul 20 2021 Open publication The volume deals with previously undescribed morphosyntactic variations and changes appearing in settings involving language contact. Contact-induced changes are defined as dynamic and multiple, involving internal change as well as historical and sociolinguistic factors. A variety of explanations are identified and their relationships are analyzed. Only a multifaceted methodology enables this fine-grained approach to contact-induced change. A range of methodologies are proposed, but the chapters generally have their roots in a typological perspective. The contributors recognize the precautionary principle: for example, they emphasize the difficulty of studying languages that have not been described adequately and for which diachronic data are not extensive or reliable. Three main perspectives on contact-induced language change are presented. The first explores the role of multilingual speakers in contact-induced language change, especially their spontaneous innovations in discourse. The second explores the differences between ordinary contact-induced change and change in endangered languages. The third discusses various aspects of the relationship between contact-induced change and internal change.
