International Conference on Dependable Systems and

Networks Dec 01 2019 Annotation These proceedings from a

June 2002 conference present new results from research and

experiences in areas including hardware architecture and design,

distributed computing, security and intrusion tolerance, software

techniques, dependability modeling and evaluation, and

networking. Other themes include failure detectors, Internet

performance and dependability, and measurement and analysis of

distributed systems. Specific topics include an adaptive

decomposition approach for the analysis of stochastic Petri nets,

self-organizing systems with self-diagnosability, process modeling

to support dependability arguments, and secure intrusion-tolerant

replication on the Internet. Work from the conference reflects an

increased emphasis in the field on systems design and

implementation. There is no subject index. Annotation
