Practical Chess Endings Aug 08 2020 An updated edition of Paul Keres' classic endgame instructor, designed specifically for practical players with over 500 extra diagrams to facilitate learning and memorisation of critical lines of endgame play. It is an essential practical book, for all chess players, from one of the world's greatest grandmasters. Keres remained an elite grandmaster throughout his life and is widely regarded as one of the s strongest ever players not to have won the world chess champion. His book is a comprehensive guide to the precise handling of all basic endgame positions. It features logical step-by-step explanations of procedures required to obtain the best possible results from frequently occurring queen, rook, bishop, knight and pawn endings. It includes commentaries on the final stages of selected tournament games, which demonstrate the art of favourable transposition from complex to clear-cut endgames.

New York 1927 Jan 13 2021 Alekhine's Controversial Masterpiece Finally in English! For decades, Alexander Alekhine's account of New York 1927 was at the top of the list of works that should have been rendered into English but unaccountably were not. This is unlike any other tournament book ever written. Not only do you have one of the greatest annotators of all time rendering some brilliant analysis, but he melds it with an exceptional agenda, an anti-Capablanca agenda. And since he wrote it after defeating Capablanca in their marathon match, he sounds like a sore loser who became a sore winner. So, this is just a mean-spirited book, right? Nothing of the sort. Alekhine goes beyond elaborate move analysis and offers deep positional insights and psychological observations. Nikolai Grigoriev, in his foreword to the 1930 Russian edition of this book, pointed out how Alekhine broke new ground by underlining the critical moments of each game. Why Alekhine's work was published in German, in Berlin in 1928, and not in English, is unclear. But now, after more than 80 years, it's finally available to the largest audience of chessplayers. It's about time.

Key to Salvation & the Lamp of Souls May 17 2021 This is the first English translation of Miftah al-falah, a thirteenth century Sufi text, written by Ibn Ata Allah, one of the great masters of the Shadhili Sufi order. It is considered to be one of his most important works because it sets out the principles of actual Sufi mystical practices, shedding light on the sacred invocations, and associated practices, such as the spiritual retreat. Written in a clear, lucid style, it offers a glimpse into the Sufi world of the 7th Islamic century and allows us to see almost at first hand how the novice was guided by the Sufi Shaykh and, above all, the purpose and preparation involved in engaging in the invocation, dhikru'llah. Ibn Ata' Allah sets out to define it, to explain its nature and power, to show its results and to prove that it is part of the Prophet's Sunna, or practice. The author goes to great lengths to point out many Qur'anic verses where dhikru'llah is mentioned and cites many noted authorities.

The Chess Attacker's Handbook Jul 27 2019 Life is too short to play boring chess! That's the mantra of the two young authors of this book, and as you read their energetic and insightful words, you may find yourself caught up in their enthusiasm for direct attacking play. Their over-the-board successes are not based on mere bravado or trickery, but on a profound understanding of the chessboard struggle and thought process. Song and Preotu consider the role of manoeuvring and prophylactic thought, and examine attacks in the endgame, as well as more standard topics such as play on colour complexes and when and how to launch the pawns in an all-out assault. And because life's too short to read a boring chess book, the text is packed with advice, study suggestions and anecdotes as well as quotes and references to philosophy and other 'real-world' topics. Their examples are drawn from their own practice and their supergrandmaster trainer, as well as modern classics and older gems. Most of their material you will not have seen before; the rest you will not have seen explained this way before. The authors are the two highest-rated Canadian juniors. Razvan Preotu earned the Grandmaster title in 2016 at the age of 17. The most notable result during his meteoric rise was at the 2016 Calgary International, which he won outright ahead of a strong international field including five GMs. Michael Song became an International Master by winning the North American Under-18 Championship. He has represented Canada many times, winning a bronze medal at the 2011 World Youth Championship. His coach is super-grandmaster Evgeny Bareev.

Risk & Bluff in Chess Apr 15 2021 You cannot win in chess without taking risks. Winning requires courage and psychology. No matter how deep you calculate, there always comes a point where you have to deal with uncertainties and take a decision. What is carefully calculated risk, and what is bluff? And why were famous players like Lasker and Tal so successful with both? They realized that chess is not a science. Emotions also play a role behind the board. If you can guess what your opponent is feeling and thinking, you are ahead of him. When your main aim is to derail your opponent's calculation by weaving a web of deception, you engage in the highest form of risk: bluff. Renowned chess coach Vladimir Tukmakov has played against, and worked with, quite a few chess greats. Many of them told him frankly about their thoughts and feelings during crucial games. These stories became the foundation of a collection of more than 100 practical ways that masters and grandmasters have used to push beyond the limits of calculation and take a deliberate risk. It works – even at the highest level! Tukmakov shows how to trick your opponent into believing your bluff. After studying this book, with its many fascinating and often funny examples, you will think twice before wasting an opportunity to do what even the greatest players do: bluff your way to victory!

Modern Chess Formula - The Powerful Impact of Engines Jul 19 2021 One, and sometimes more engines, toil without rationing electricity, sometimes checking on their master's ideas or more often showing their own evaluations and recommendations on screen with each conclusion supplemented by an exact numeric equivalent. There is no arguing with such an expert. Is it even necessary? He, as the almighty judge, knows all and can answer any question. All that is needed is patience. During a mutual training session, a young player who is currently one of the top in the world, asked Garry Kasparov: "How did you evaluate positions in the past?" After all standard evaluations like "better" or "worse" are too vague and cannot begin to satisfy a modern professional. The very question feels like a giant gap between the approach to solving chess problems then and now. Intuition and improvisation are gradually phased out by exact knowledge and calculation. So far this has only become fully evident in the opening. More than anything else it has become opening preparation which has made the biggest fundamental change to professional chess. So now let us peer behind the curtain!
