Artificial Knowing Aug 24 2019 In Artificial Knowing, Alison Adam boldly challenges the Artificial Intelligence (AI) view of the world which prescribes the masculine as the norm and excludes other knowers and knowledge, specifically women. Adam fills a large gap in science and technology studies by showing us how gender is inscribed in AI-based computer systems. By locating feminist theory in relation to science and technology studies, Adam argues that feminist epistemology, in its treatment of the knowing subject and the nature of knowledge, rationality and language, can make a serious contribution to and provide a richer critique of AI.

Counterintelligence Jun 22 2019 The United States Marine Corps is the largest such force on the planet, and yet it is the smallest, most elite section of the U.S. military, one with a long and storied history and current operations that are among the most sophisticated in the world. Here, in the most current version of the manual used by the Corps itself, is the guidebook used by the service in its counterintelligence support of the Marine airground task force. Learn about: . how counterintelligence (CI) supports strategic, operational, and tactical levels of war . the command structure of Marine CI organizations . how intelligence missions are planned and operatives deployed . the operation of such activities as mobile and static checkpoints, interrogation, and surveillance . counterintelligence training . and much, much more. Military buffs, wargamers, readers of espionage thrillers, and anyone seeking to understand how American armed services operate in the ever-changing arena of modern warfare will find this a fascinating and informative document.

OpenVMS Operating System Concepts Jul 28 2022 OpenVMS Operating System Concepts, Second Edition

uses a new approach to explain the OpenVMS operating system. Combining discussions of operating system theory with examples of its applications in key OpenVMS operating system facilities, the book provides a thoughtful introduction for application programmers, systems managers, and students. The books shows how OpenVMS system services can tap the power of operating system facilities to perform critical tasks on behalf of applications. It has been updated for OpenVMS and gives program examples in C. · Updated for OpenVMS · Shows program examples in C

1,001 Komputer Answers from Kim Komando Sep 05 2020 Kim Komando--one of the best-known personalities in the computer industry--answers the top 1,001 questions asked by over 12 million people throughout the country--questions they ask her everyday. All facets of the computer are covered from modems to sound cards--no question is too simple or silly. CD-ROM is filled with every single question in the book in a hyper-text format.

Medication Mathematics Sep 25 2019 This resource for student nurses contains clinically-oriented dosage calculations. It is divided into modules with categories such as intravenous therapy calculations and paediatric dosage calculations. Refers to medications and equipment commonly used in Australia, with drug information conforming to Australian standards. The author has 20 years experience in the nursing profession and is involved in nursing education at Curtin University of Technology.

Intelligent Tutoring Systems Nov 27 2019 ITS 2000 is the fifth international conference on Intelligent Tutoring Systems. The preceding conferences were organized in Montreal in 1988, 1992, and 1996. These conferences were so strongly supported by the international community that it was decided to hold them every two years. ITS'98 was organized by Carol Redfield and Valerie Shute and held in San Antonio, Texas. The program committee included members from 13 countries. They received 140 papers (110 full papers and 30 young researchers papers) from 21 countries. As with any international conference whose proceedings serve as a reference for the field, the program committee faced the demanding task of selecting papers from a particularly high quality set of submissions. This proceedings volume contains 61 papers selected by the program committee from the 110 papers submitted. They were presented at the conference, along with six invited lectures from well known speakers. The papers cover a wide range of subjects including architectures for ITS, teaching and learning strategies, authoring systems, learning environments, instructional designs, cognitive approaches, student modeling, distributed learning environments, evaluation of instructional systems, cooperative systems, Web based training systems, intelligent agents, agent based tutoring systems, intelligent multimedia and hypermedia systems, interface design, and intelligent distance learning.

MVS Answer Book Mar 12 2021 An essential guide for all MVS system and application programmers, this handbook will help programmers to assess their current knowledge of MVS and increase their understanding of large systems and principles. It will also help them learn more about the problems and needs common to MVS installations and to review a range of important large-system topics.

100 Questions & Answers About Lymphoma Aug 29 2022 Written by oncology experts with over 20 years of experience, 100 Questions and Answers About Lymphoma, Second Edition provides authoritative answers to your questions on lymphoma. Featuring the information you need in one concise, easy-to-read volume, 100 Questions and Answers About Lymphoma, Second Edition is an invaluable resource for newly diagnosed patients, survivors, friends or relatives of either. Now, in its Second Edition, this newly updated text features information on the latest, cutting-edge treatments and medication, Hodgkin's and Non-Hodgkin's lymphoma, natural killer cells, T-cell lymphoma, autoimmune diseases, and much more! Comprehensive, insightful, compact, 100 Questions and Answers About Lymphoma, Second Edition is an essential guide for anyone coping with the physical and emotional turmoil of this disease. Features and benefits: Concise, easy-to-read paperback book Provides both the patient and health professional's perspective on the non-professional caregiver caring for a cancer patient Written by an authoritative author team Practical answers to your questions about treatment options, quality of life, caregiving, sources of support, and much more Covers risks factors, management, and psychosocial issues

Search User Interfaces Jul 24 2019 The truly world-wide reach of the Web has brought with it a new

realisation of the enormous importance of usability and user interface design. In the last ten years, much has become understood about what works in search interfaces from a usability perspective, and what does not. Researchers and practitioners have developed a wide range of innovative interface ideas, but only the most broadly acceptable make their way into major web search engines. This book summarizes these developments, presenting the state of the art of search interface design, both in academic research and in deployment in commercial systems. Many books describe the algorithms behind search engines and information retrieval systems, but the unique focus of this book is specifically on the user interface. It will be welcomed by industry professionals who design systems that use search interfaces as well as graduate students and academic researchers who investigate information systems.

Cognitive Systems Oct 31 2022 Design of cognitive systems for assistance to people poses a major challenge to the fields of robotics and artificial intelligence. The Cognitive Systems for Cognitive Assistance (CoSy) project was organized to address the issues of i) theoretical progress on design of cognitive systems ii) methods for implementation of systems and iii) empirical studies to further understand the use and interaction with such systems. To study, design and deploy cognitive systems there is a need to considers aspects of systems design, embodiment, perception, planning and error recovery, spatial insertion, knowledge acquisition and machine learning, dialog design and human robot interaction and systems integration. The CoSy project addressed all of these aspects over a period of four years and across two different domains of application – exploration of space and task / knowledge acquisition for manipulation. The present volume documents the results of the CoSy project. The CoSy project was funded by the European Commission as part of the Cognitive Systems Program within the 6th Framework Program.

Artificial Intelligence and Education: Learning environments and tutoring systems Oct 26 2019

Environmental Solidarity Jun 26 2022 The past few decades have seen the beginnings of a convergence between religions and ecological movements. The environmental crisis has called the religions of the world to respond by finding their voice within the larger Earth community. At the same time, a certain religiosity has started to emerge in some areas of secular ecological thinking. Beyond mere religious utilitarianism, rooted in an understanding of the deepest connections between human beings, their worldviews, and nature itself, this book tries to show how religious believers can look at the world through the eyes of faith and find a broader paradigm to sustain sustainability. It proposes a model for transposing this paradigm into practice, so as to develop long-term sustainable solutions that can be tested against reality.

KI 2004: Advances in Artificial Intelligence Aug 05 2020 KI2004wasthe27theditionoftheannualGermanConferenceonArti?cialInt- ligence, which traditionally brings together academic and industrial researchers from all areas of AI and which enjoys increasing international attendance. KI 2004 received 103 submissions from 26 countries. This volume contains the 30 papers that were?nally selected for presentation at the conference. The papers cover quite a broad spectrum of "classical" subareas of AI, like na- ral language processing, neural networks, knowledge representation, reasoning, planning, and search. When looking at this year's contributions, it was exciting to observe that there was a strong trend towards actual real-world applications of AI technology. A majority of contributions resulted from or were motivated by applications in a variety of areas. Examples include applications of pl- ning, where the technology is being exploited for taxiway tra?c control and game playing; natural language processing and knowledge representation are enabling advanced Web-based information processing; and the integration of - sults from automated reasoning, neural networks and machine perception into robotics leads to signi?cantly improved capabilities of autonomous systems. The technical programme of KI 2004 was highlighted by invited talks from outstanding researchers in the areas of automated reasoning, robot planning, constraintreasoning, machinelearning, andsemanticWeb:Jorg·Siekmann(DFKI andUniversityofSaarland, Saarbruc·ken), MalikGhallab(LAAS-CNRS, Toulouse), Franco ı is Fages (INRIA Rocquencourt), Martin Riedmiller (University of - nabru·ck), andWolfgangWahlster(DFKIandUniversityofSaarland, Saarbruc·ken). Their invited papers are also presented in this volume

Information Systems and Technologies for Enhancing Health and Social Care Jul 04 2020 "This book provides the latest and most relevant research on the understanding, expansion, and solutions on technologies used for improvements in the health and social care field"--Provided by publisher.

Core Concepts of Accounting Information Systems Aug 17 2021 This book is entirely up to date to reflect recent changes in technology and AIS practive. Covers such subjects as EDI, reengineering, neural networks, client/server, computer security, and events accounting.

Core Concepts of Accounting Information Systems Feb 08 2021 Knowing how an accounting information systems gather and transform data into useful decision-making information is fundamental knowledge for accounting professionals. Mark Simkin, Jacob Rose, and Carolyn S. Norman's essential text, Core Concepts of Accounting Information Systems, 13th Edition helps students understand basic AIS concepts and provides instructors the flexibility to support how they want to teach the course.

Come to Your Senses Jun 14 2021 In this newly revised edition of the award-winning Come to Your Senses: Demystifying the Mind-Body Connection, Dr. Stanley Block offers his Ten-Day Plan to optimize your life -- a breakthrough program that has helped people all over the world heal from post-traumatic stress syndrome, combat trauma, substance abuse, mental illness, pain, and depression. The easy-to-apply method uses Identity System "resting" techniques that enable you to recognize and defuse the self-defeating mental tug-of-war that exists in all of us. Learn how stress, fear, and thought activate the sympathetic nervous system with increased tension, pain, insomnia, anxiety, and depressive symptoms. By literally "coming to your senses" of taste, touch, smell, sight, and sound, you begin to control negative responses, free yourself from a paralyzed state of mind, and live a happy, balanced life. The response is amazing because the results are immediate -- ten days is all it takes -- Dr. Block's techniques take no time out of a busy schedule, they are simply incorporated into whatever activity you are engaged. Bridging the Identity System empowers you to work from your own strength and wisdom to deal with situations that arise in your life.

Sintering of Ceramics Nov 19 2021 Sintering of Ceramics provides the only comprehensive treatment of the theories and principles of sintering and their application to the production of advanced ceramics with the required target microstructure. Stemming from the author's bestselling text, Ceramic Processing and Sintering, this book includes additional material selected

LSAT Decoded (PrepTests 72-81) Jan 10 2021 DECODE THE QUESTIONS. DEFEAT THE LSAT. The Princeton Review's LSAT Decoded series is the perfect companion for LSAC's Official LSAT PrepTest® books. LSAC provides the real exams but no accompanying answer explanations; we skip the question stems but provide valuable, step-by-step solutions for every one of the 1000+ questions on those tests. Armed with explanations, you can start to understand why you got an LSAT question wrong—and feel confident about when you're getting them right. By working through each question methodically, you'll: ● learn how the test-writers think, and how to outthink them; ● start to pinpoint the argument types that consistently trip you up, and learn the best ways to handle them; ● train yourself to swiftly and effectively build diagrams for tricky Logic Games. With the test-conquering tips and strategies found in LSAT Decoded's explanations, you'll finally be able to decipher the secret language of this notoriously difficult

exam. This book is intended to be used as a companion to the LSAC-issued 10 Actual, Official LSAT PrepTests Volume VI™: PrepTests 72–81, which contains real tests administered from June 2014 to June 2017. The full text of the PrepTests and individual PrepTest questions are not included in this book.
