Elwha Nov 03 2022 [CLICK HERE](#) to download the first chapter from *Elwha: A River Reborn* (Provide us with a little information and we'll send your download directly to your inbox) A compelling exploration of one of the largest dam removal projects in the world—and the efforts to save a stunning Northwest ecosystem * Co-published with The Seattle Times * 125 color photographs, including rare historic images * Dam removal started in September 2011 while restoration work continues today In the fall of 2011, the Times was on hand when a Montana contractor removed the first pieces from two concrete dams on the Elwha River which cuts through the Olympic range. It was the beginning of the largest dam removal project ever undertaken in North America—one dam was 200 feet tall—and the start of an unprecedented attempt to restore an entire ecosystem. More than 70 miles of the Elwha and its tributaries course from the mountain headwaters to clamming beaches on the Strait of Juan de Fuca. Through interviews, field work, archival and historical research, and photojournalism, The Seattle Times has explored and reported on the dam removal, the Elwha ecosystem, its industrialization, and now its renewal. *Elwha: A River Reborn* is based on these feature articles. Richly illustrated with stunning photographs, as well as historic images, graphics, and a map, *Elwha* tells the interwoven stories of this region. Meet the Lower Elwha Klallam tribe, who anxiously await the return of renowned salmon runs savored over the generations in the stories of their elders. Discover the biologists and engineers who are bringing the dams down and laying the plan for renewal, including an unprecedented revegetation effort that will eventually cover more than 700 acres of mudflats. When the dam started to come down in Fall 2011—anticipated for more than 20 years since Congress passed the Elwha Restoration Act—it was the beginning of a \$350 million project observed around the world. *Elwha: A River Reborn* is inspiring and instructive, a triumphant story of place, people, and environment striving to come together. Winner of the Nautilus Awards 2014 "Better Books for a Better World" Silver Award!

Classic Japanese Motorcycle Guide Oct 22 2021 This is the definitive guide to identifying, buying and riding Japanese bikes from the 1960s to the early 1990s, concentrating on mainstream, affordable models from the 'big four': Honda, Kawasaki, Suzuki and Yamaha. Fully illustrated in color throughout, the book provides a brief history of the Japanese motorcycle industry, its post-war rise and displacement of traditional British, European and American marques. Specific bikes are then grouped and discussed in detail, providing an essential reference for buyers and enthusiasts alike.

Seducing the Demon Nov 30 2019 Erica Jong's memoir—a national bestseller—was probably the most wildly reviewed book of 2006. Critics called it everything from "brutally funny," "risqu? and wonderfully unrepentant," and "rowdy, self-deprecating, and endearing" to "a car wreck."* Throughout her book tour, Jong was unflappably funny, and responded to her critics with a hilarious essay on NPR's All Things Considered, which is included in this paperback edition. In addition to prominent review and feature coverage, Jong was a guest on Today and Real Time with Bill Maher. Even Rush Limbaugh flirted with Jong on his radio program: "I think she wants me. I think she's fantasizing about me." Love her, hate her, Jong still knows how to seduce the country and, most important, keep the pages turning.

Top Dead Center Jul 19 2021 Kevin Cameron is one of the most widely read motorcycle journalists in the world—for reasons that this collection makes immediately and undeniably clear. Here are the feature articles and columns that have made Cameron a must-read for motorcycle aficionados: stories of the racing life; interviews with top-notch racers; profiles of builders and engineers (like John Britten); accounts of changes in the racing world; analyses of riding techniques and winning technology; reports of races; and popular pieces about engine and suspension theory. With short introductions to each piece, Cameron puts his on-the-spot writing on motorcycle racing into context, and offers a quick, clear history of the best on bikes.

Japan's Motorcycle Wars May 17 2021 For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

Life, in No Particular Order Dec 12 2020 This is the history of my family, spanning several generations. Their stories encouraged me to write these memoirs. When young men were leaving Transylvania by the thousands. Once Transylvania was a part of Hungary, but now is the possession of Romania. The men were either seeking asylum from ethnic persecution or seeking to provide a future for their families. There was a brief period of calm between the time of the Hungarian Revolution, the plague of 1918, and World War 1. Joseph Melics got caught up in the fervor of emigrating to seek a better life for his young family. Leaving his pregnant wife and his daughter, he left with their blessing. It was a dangerous risk. It would be his last chance knowing that there would soon be another war. Leaving everything he knew and loved, he immigrated to Canada with \$25 in his pocket. Two years later he was reunited with wife, Elizabeth and daughter Margaret. He never had the opportunity to see his youngest daughter, Sari who died in infancy. Another war was looming. It was now or never.

The Virgin of Small Plains May 05 2020 January 1987, Small Plains, Kansas. On the night of the decade's worst blizzard, a boy discovers the naked corpse of a beautiful girl. No-one can identify her, so the people of the town bury her with a gravestone marked with the date and 'Peace Be Unto You'. Seventeen years later, the mysterious dead girl - the 'Virgin of Small Plains' - has inspired a local myth. In the two decades since her death, strange miracles have visited those who faithfully tend her grave; some believe her spirit can cure deadly illnesses, while others credit her with the town's economic prosperity. Word of the legend spreads and Small Plains becomes a haven for an onslaught of spiritual seekers and the terminally ill, all hoping the Virgin will answer their prayers. When the mysterious Mitch Newquist reappears and a vengeful tornado devastates Small Plains, the truth begins to emerge.. What really happened seventeen years ago? Why did Mitch suddenly disappear the same night the Virgin's body was found - abandoning his first love, Abby Reynolds? And why are some of the town's leading citizens so determined that the truth remain buried?

The Longest Ride Jan 01 2020 For his eighth birthday, Emilio Scotto received a World Atlas. Promptly he announced his plan to make a route that would pass through all the countries of the world, a route he named BLUE ROAD ONE. When, some years later, he found himself astride a black 1100 Honda Gold Wing motorcycle, Blue Road One beckoned, and Scotto set off on a journey that would last more than a decade, take him virtually everywhere in the world, and land him in the Guinness Book of World Records. This is his story, a thrill ride that begins in his native Argentina, crosses Panama in the tumultuous time of Noriega, Mexico in the midst of an earthquake, and finds him broke in L.A. where, in a chance meeting, Muhammad Ali gives him fifty dollars and a signed book. Breaching the Iron Curtain, crossing the Berlin Wall at Checkpoint Charlie, being blessed by the Pope, set upon by cannibals in Sierra Leone, fleeing Somalia on a freighter, Scotto's adventures would be unbelievable if they weren't true. His tale of touring the world from Tunisia to Turkey, Petra to Afghanistan, Yugoslavia to Singapore, traveling miles enough to take him to the moon and back, is unlike any ever told. Come along, for the ride of a lifetime.

Influencing Human Behavior Jul 27 2019 2021 Reprint of the 1925 Edition. Facsimile of the original edition and not reproduced with Optical Recognition Software. A class of educators, social workers, lawyers, and businesspeople at the New School for Social Research asked Mr. Overstreet to tell them "How human behavior can actually be changed, in the light of the new knowledge

gained through psychology." He obliged, and the present book is his lectures, refined, amplified, and chastened by class discussion. Mr. Overstreet has achieved something of a triumph in the field of popularization. His book is readable and shrewd. This has become a classic of applied psychology and methods for influencing human behavior.

Motorcycle Jun 17 2021 An essential design history of the motorcycle, featuring all of the classic icons from the late-19th-century pioneers to present-day marques (see overleaf for a detailed contents list). Within chronological, thematic chapters, Walker writes engagingly, setting each motorcycle within its historical context and outlining the key technological and aesthetic innovations that made the model unique. He explains the impact of each on future bike design, accompanying each model with specifications. An easily navigated cross-referencing system allows comparison with other motorcycles in the marque and relevant related topics. Walker also considers vital technological and social themes that encouraged the cross-fertilization of design ideas and stimulated progression. This book is the most comprehensive document of world-wide bike design ever published. No motorcycle enthusiast can afford to go without this definitive design history.

Analog Fundamentals May 29 2022 Analog Fundamentals: A Systems Approach provides unique coverage of analog devices and circuits with a systems emphasis. Discrete linear devices, operational amplifiers, and other linear integrated circuits, are all covered with less emphasis on the individual device, and more discussion on how these devices are incorporated into larger circuits and systems.

Top Gear: My Dad Had One of Those Jul 07 2020 Good old Dad and his good old Dad's car. As solid and dependable as the man himself, if a little less balding, Dad's car was almost a member of the family, whisking you to exciting days out, or just to visit boring relatives in distant parts of the country to the chant of 'are we nearly there yet?' Like the man behind the wheel, Dad's car made you feel safe and secure, because it was as reassuring and sensible as he was. Maybe in an idle moment Dad dreamt of driving something rakish and fast, just like in idle moments he dreamt that your Mum was Twiggy, but the demands of family life meant soft tops, hard suspension and anything even remotely sporty were off the cards. Even anything less than four doors would have been wildly hedonistic. But although the family car may not have been the very essence of rock 'n' roll, Dad was proud of it. Spanning the 1950s to the '80s, this is a celebration of the heyday of the Dad car. From much loved family workhorses like the Ford Cortina and Vauxhall Viva to the rakish excitement and playground kudos of the Rover 3500 and Citroen CX, all the great Dad cars are here. Reflecting a time before people carriers and lifestyle off roaders, when the nearest thing to an airbag was hiding behind your fat brother, this is a celebration of simple, honest cars that were as flawed and as loveable as your Dad himself.

Social Work in Europe Sep 20 2021 It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

Manufacturing Facilities Design and Material Handling Oct 02 2022 This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

Plug-in Hybrids Jun 05 2020 A politically polarized America is coming together over a new kind of car—the plug-in hybrid that will save drivers money, reduce pollution, and increase US security by reducing dependence on imported oil. Plug-in Hybrids points out that, where hydrogen fuel-cell cars won't be ready for decades, the technology for plug-in hybrids exists today. Unlike conventional hybrid cars that can't run without gasoline, plug-in hybrids use gasoline or cheaper, cleaner, domestic electricity—or both. Although plug-in hybrids are not yet for sale, demand for them is widespread, coming from characters across the political spectrum, such as: • Chelsea Sexton, the automotive insider: working for General Motors, Sexton fought attempts to destroy the all-electric EV1 car and describes how car companies are resisting plug-in hybrids—and why they'll make them -anyway. • Felix Kramer and the tech squad: Kramer started a nonprofit organization using the Internet to tap into a small army of engineers who built the first plug-in Prius hybrids. • R. James Woolsey, former CIA director and national security hawk: seeing the end of oil supplies looming, Woolsey is demanding plug-in hybrids to wean us from petroleum. Cautioning that the oil and auto companies know how to undermine the success of plug-in car programs to protect their

interests, the book gives readers tools to ensure that plug-in hybrids get to market—and stay here.

The Museum's Borders Jan 25 2022 The Museum's Borders demonstrates that museum practices are deeply entangled in border making, patrol, mitigation and erasure, and that the border lens offers a new tool for deconstructing and reconfiguring such practices. Arguing that the museum is a critical institution for the operation of knowledge-based democracies, Knell investigates how they have been used by scientists, art historians and historians to construct our bordered world. Examining the role of museums in the Windrush scandal in Britain, the exclusion of Black artists in America, ideological and propaganda discourses in Europe and China, and the remembering of contested pasts in the Balkans, Knell argues for the importance of museums in countering unethical, nationalistic, post-fact political discourse. Using the principles of Knell's 'Contemporary Museology', The Museum's Borders considers the significance of the museum for societies that wish to know and remember in ways that empower citizens and build cohesive societies. The book will be of great interest to students and academics engaged in the study of museums and heritage, art history, science studies, cultural studies, anthropology, memory studies and history. It is required reading for museum professionals seeking to adopt non-discriminatory practices.

Personalized Learning in Gifted Education Feb 23 2022 Gifted students can exhibit extreme variance in both their abilities and their interests, yet they are often treated within schools as one homogeneous, specialized population. Personalized Learning in Gifted Education helps educators strengthen their differentiation of both instruction and services for advanced students. This book: • helps educators develop the specific gifts and talents of the gifted students they serve • includes a year-long plan for professional learning communities seeking to transform their programs • demonstrates how educators can utilize the wealth of data they have at their disposal • provides a rationale and blueprint for a stronger, more personalized approach to gifted education • offers suggestions for both elementary and secondary schools. Recommendations center around five features of personalized learning: personalized learning plans, project- or problem- based learning, competency-based progression through the curriculum, criterion-referenced assessments, and multi-year mentoring.
