A Thousand Bayonets Jun 24 2019 Upon returning from Afghanistan, journalist John Webster discovers a gang war in his backyard. Now he must find a way to survive in this Canadian warzone—or die in the crossfire. John Webster has seen the terrible things human beings can do. He's an experienced investigative journalist, recently returned from the war in Afghanistan. John saw hell over there; he looked death straight in the face. He is glad to be back to the normalcy of his Canadian home—that is, until he realizes there is a war brewing in his own backyard, and “peace” is a word no longer spoken. John gets caught up in the battle between two of the most powerful and murderous criminal gangs in the city. Using what he learned on the foreign battlefields, he stays alive, despite the price on his head. The only way to save his own life is to find the man responsible for the brutal neighborhood bloodshed. When the police slap a subpoena on him, though, John finds his only solace on the streets. Suddenly, John is back in a warzone, fighting for his life. Will he be able to stop the bloodthirsty crime lords? The flashbacks to Afghanistan threaten to pull John into darkness. Soon, the past and present collide, and he can't tell which way is up or down. The need for redemption may be stronger than the need for survival as John Webster finds himself on his most dangerous assignment yet.

Popular Science Jul 26 2019 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

User Unfriendly Apr 26 2022 We've all been there. Seduced by the sleek designs and smart capabilities of the newest gadgets, we end up stumped by their complicated set-up instructions and exasperating error messages. In this fascinating history, Joseph J. Corn maps two centuries of consumer frustration and struggle with personal technologies. Aggravation with the new machines people adopt and live with is as old as the industrial revolution. Clocks, sewing machines, cameras, lawn mowers, bicycles, electric lights, cars, and computers: all can empower and exhilarate, but they can also exact a form of servitude. Adopters puzzle over which type and model to buy and then how to operate the device, diagnose its troubles, and meet its insatiable appetite for accessories, replacement parts, or upgrades. It intrigues Corn that we put up with the frustrations our

technology thrusts upon us, battling with the unfamiliar and climbing the steep learning curves. It is this ongoing struggle, more than the uses to which we ultimately put our machines, that animates this quizzical study. Having extensively researched owner's manuals, computer user-group newsletters, and how-to literature, Corn brings a fresh, consumer-oriented approach to the history of technology. User Unfriendly will be valuable to historians of technology, students of American culture, and anyone interested in our modern dependency on machines and gadgets.
