Green Careers Jan 10 2021 People of all ages and backgrounds are seeking work in career fields that will help save the planet, yet many people are unaware of the variety of green careers available. This unique career guidance book, based on labor market research, covers green jobs representing almost every area of career interest. The authors' extensive experience in workforce development will help you explore tomorrow's green career options by answering such questions as: What green careers are available? What salary can I expect? What education do I need? What is the demand for this profession? How do I change to a green career? Green Careers offers clear and concise information about the emerging field of environmental jobs. Chapters include: Industry-by-industry overview of green jobs Ninety different occupations in twelve different career groups Over sixty case studies and interviews of people working in green jobs Career planning information Job search resources This book will

appeal to students, career explorers, job seekers, and career and workforce development professionals. It is an indispensable guide for finding a career to feel passionate about and prospering while doing what you love. Jim Cassio is a career and workforce information consultant who has conducted hundreds of workforce studies and published occupational resource books, including Career Pathways Handbook. Alice Rush, MA, MCC, is a certified and registered career counselor and founder of CareerU®—counseling for the public and Fortune 500 companies. She is author of Paid to Play and a part-time faculty member of Folsom Lake College.

Energy and Employment Aug 05 2020 Danube:Future Interdisciplinary School Proceedings 2017 Mar 31 2020 Global change processes, such as climate change, digitalization, migration movements and economic crises, are among the greatest challenges of our time and also shape the Danube macro-region as a specifically

challenging region of Europe. As part of the Danube:Future Interdisciplinary School 2017 in Krems 28 PhD-students and young scientists from Alps-Adriatic Rectors' Conference and the Danube Rectors' Conference universities discussed these questions and developed research proposals within this broad context. These proceedings offer a comprehensive overview of the generated work. The Danube:Future Interdisciplinary School is part of the Capacity Building Module of the Danube:Future project, a Flagship Project of the EUSDR - the European Union Strategy for the Danube Region, in the Priority Area Knowledge Society. Danube:Future is a joint network project of the Alps-Adriatic Rectors' Conference and the Danube Rectors' Conference. It aims at capacity building in the Danube River Basin (DRB) and at providing networking to aid the development common research projects for a sustainable future of the DRB.

"Analyzes effects of the increase in minorities, younger residents, educational levels, and urbanization on the traditionally Republican politics of six states in the Mountain West, comparing changes in voting patterns from 1988 to 2008. Discusses possible ramifications of those changes and the 2010 mid-term elections on the 2012 presidential election"--Provided by publisher.

Green Careers in Energy: State and Federal Workforce Training Jan 22 2022 Looking for information on green career help provided by state and federal workforce training centers? As part of Peterson's Green Careers in Energy, this eBook offers information for the One-Stop Centers for all fifty U.S. states and the District of Columbia, plus a general description of each individual program and workforce development information that each center provides-including resources for finding jobs, writing resumes, and developing interview skills. Simply find your state and you'll uncover a wealth of information, including phone numbers and Web addresses.
[Handbook of Research on Green Technologies for Sustainable Management of Agricultural Resources](#) Aug 24 2019 Green technology is focused on devising environmentally-friendly

(eco-friendly) agricultural practices. It plays a crucial role in dealing with food security issues and reducing the carbon footprint. Green technologies and environmental sustainability are focused on the goals of green technologies, which are becoming increasingly important for ensuring sustainability. The Handbook of Research on Green Technologies for Sustainable Management of Agricultural Resources covers the applications of green technology as well as different eco-friendly technologies for the sustainable management of natural resources. It also explores the timely topic of enhancing crop productivity. It is ideal for agriculturists, farmers, botanists, technologists, policymakers, scientists, academicians, researchers, and students as it covers a variety of concepts such as organic farming and the role of green technologies.

Green Careers in Energy Mar 24 2022
Peterson's Green Careers in Energy pinpoints the best opportunities in the fastest-growing and most promising renewable energy fields-solar, wind, geothermal, and more-with data on the various jobs as well as colleges, organizations, and institutions that offer courses, degrees, certification, and training/retraining. Green Careers in Energy offers inspirational and insightful essays on the importance of sustainability, written by individuals at the forefront of environmental organizations, university sustainability efforts, and college training programs. This eBook also features an exclusive bonus section, "What Is the New Green Economy," which examines the current interest in sustainability and the "New Energy for America" program. Throughout this book, there are energy-related features, including interviews with individuals working in many of these green careers. Other feature articles offer useful tips and advice for a more sustainable life.

Green Careers in Energy: 25 Four-Year Schools with Great Green Energy-Related Programs Oct 19 2021 Looking for a four-year school with great green programs? You're in good company! In a recent survey, 7 out of 10 students stated that they prefer green universities. As part of Peterson's Green Careers

in Energy, this eBook offers profiles on 25 colleges and universities that offer innovative energy-related degree programs and support vibrant on-campus sustainability programs and organizations.

African Energy Road to Recovery Aug 29

2022 Africa's oil and gas industry is facing extraordinary circumstances. An ongoing energy transition and new efforts to decarbonize the world are weighing on oil demand. The shale revolution is exacerbating these pressures. And of course, the COVID-19 pandemic has wrought havoc on markets around the world, accelerating and intensifying existing trends. External headwinds are forcing African petroleum producers to re-examine their strategies. Conventional petroleum resources here should be globally competitive, but growth has lagged because of conditions above the ground, not below. Restrictive fiscal regimes, inefficient and carbon-intensive production, and difficulties in doing business are preventing the industry from reaching its full potential. As companies delay projects and cut costs, planned capital expenditure in 2020-2021 has fallen from \$90 billion pre-COVID-19, to \$60 billion now. To remain competitive, African producers and governments must adapt. But how can they do it when the economic order is being remade? The Road to Recovery addresses these challenges head-on, detailing all of the major challenges facing African oil and gas stakeholders, as well as workable solutions that will keep the industry on a strong and stable growth path. Again and again, our oil and gas sector has proven its resilience and adaptability. The world still needs oil and gas, and Africa still holds enormous untapped potential. The African Energy Chamber will remain a committed partner of choice for the industry as we advance into an uncertain future.

Sustainable Development Handbook, Second Edition Jun 02 2020

Gaining momentum globally, sustainable development is beginning to significantly redefine the policies of corporations and governmental entities. Updated throughout, the second edition of this popular resource includes updates on LEED® measurement and verification and a new chapter on cities and carbon reduction. Clarifying critical issues, this volume examines proven approaches

as well as problems with failed initiatives. In addition to core concepts and trends, it explores specific renewable energy and environmental solutions. It examines global initiatives, local politics, and ways to effectively measure and track progress.

Two-Year Colleges 2012 Sep 25 2019

Peterson's Two-Year Colleges 2012 includes information on more than 1,800 accredited two-year undergraduate institutions in the United States and Canada, as well as some international schools. It also includes detailed two-page descriptions written by admissions personnel. Inside you'll also find: Detailed information on campus setting, enrollment, majors, expenses, student-faculty ratio, application deadline, and contact information. Helpful articles on what you need to know about two-year colleges: advice for adult students on transferring and returning to school ; how to survive standardized tests; what international students need to know about admission to U.S. colleges; how to manage paying for college; and interesting "green" programs at two-year colleges State-by-state summary table allows comparison of institutions by a variety of characteristics, including enrollment, application requirements, types of financial aid available, and numbers of sports and majors offered Informative data profiles for more than 1,800 institutions, listed alphabetically by state (and followed by other countries) with facts and figures on majors, academic programs, student life, standardized tests, financial aid, and applying and contact information Indexes offering valuable information on associate degree programs at two-year colleges and four-year colleges-easy to search alphabetically

Hurricane in a Teacup Jul 04 2020 "The world is ending because of climate change!" Every day we are bombarded with apocalyptic warnings telling us that if we do not change our ways and dismantle our economies, we will destroy the planet. But what if it is all a cynical hoax perpetrated by power-hungry activists and politicians for their own purposes? In this book, James Wright asks that question, joining a multitude of skeptics who challenge the increasingly hysterical claims of "climate fanatics" and the science that supposedly underpins them.

After Sustainable Cities? Mar 12 2021 A sustainable city has been defined in many ways. Yet, the most common understanding is a vision of the city that is able to meet the needs of the present without compromising the ability of future generations to meet their own needs. Central to this vision are two ideas: cities should meet social needs, especially of the poor, and not exceed the ability of the global environment to meet needs. After Sustainable Cities critically reviews what has happened to these priorities and asks whether these social commitments have been abandoned in a period of austerity governance and climate change and replaced by a darker and unfair city. This book provides the first comprehensive and comparative analysis of the new eco-logics reshaping conventional sustainable cities discourse and environmental

priorities of cities in both the global north and south. The dominant discourse on sustainable cities, with a commitment to intergenerational equity, social justice and global responsibility, has come under increasing pressure. Under conditions of global ecological change, international financial and economic crisis and austerity governance new eco-logics are entering the urban sustainability lexicon – climate change, green growth, smart growth, resilience and vulnerability, ecological security. This book explores how these new eco-logics reshape our understanding of equity, justice and global responsibility, and how these more technologically and economically driven themes resonate and dissonate with conventional sustainable cities discourse. This book provides a warning that a more technologically driven and narrowly constructed economic agenda is driving ecological policy and weakening previous commitment to social justice and equity. After Sustainable Cities brings together leading researchers to provide a critical examination of these new logics and identity what sort of city is now emerging, as well as consider the longer-term implication on sustainable cities research and policy.

Empowering Workers to Rebuild America's Economy and Longer-term Competitiveness Jun 22 2019

Education and Skills for Inclusive Growth, Green Jobs and the Greening of Economies in Asia Aug 17 2021 This book presents an overview of the main research findings and case studies concerning education and skills for inclusive growth, green jobs and the greening of economies. Focusing on India, Indonesia, Sri Lanka and Viet Nam, it discusses government and business sector responses to these issues and how Technical and Vocational Education and Training (TVET) systems and institutions are addressing both the renewal of curricula in the context of green growth dynamics, and patterns of training and skills development to meet demands. In addition, the book examines cross-country issues, concerns and prospects regarding education and skills for inclusive growth and green jobs for the four countries. These include critical themes and issues in the selected industry sectors triggering a demand

for green jobs in the region; how industry is responding to those demands; areas impeding the transition from traditional to green practices; the importance of skills development; the role of TVET in addressing industry needs; and reasons for the slow response of TVET to green skills. While other studies conducted in Asia - and internationally - on the same topic have largely relied on secondary sources, this study conducted by the Asian Development Bank and the Education University of Hong Kong (ADB-EdUHK) is unique in that the findings, conclusions and recommendations reported on are based on primary data. As part of the study, TVET providers, business enterprises, policy makers and practitioners were surveyed using questionnaires and face-to-face interviews. In addition, workshops were held in each of the four countries to ascertain the views of key stakeholders in government, nongovernment organisations, members of the international development community, TVET providers and members of the business sector. The book also provides summaries of the case studies undertaken for India, Indonesia, Sri Lanka and Viet Nam.

World Economic Situation and Prospects 2020 Nov 27 2019 This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021.
