Writers are Readers Nov 01 2022 In *Writers Are Readers*, the mutually supportive roles of reading and writing are made visible through the idea of "flipsides;" how a reader's insights can be turned around to provide insights into his own writing, and vice versa. Lester and Reba's trademark engaging style is woven throughout chapters full of sample lessons, student writing samples, and recommended

texts for maximizing the flipped concept across the year. "Leading the student to understand what he did as a reader can become a lens that brings into focus what the writer had to do before a reader ever saw the page," they write. Discover fresh new ways to turn reading strategies into writing opportunities that your students will be excited about and deeply understand.

The Roeper School May 15 2021 How can we design schools that energetically promote intellectual development while also attending to

the social, emotional, and ethical growth of students? In today's frenzied climate of accountability driven school reform it is difficult to establish anything more than achievement of superficial knowledge and skill. Fortunately, there is a vibrant example of holistic, student-centered education that engenders dynamic, multidimensional student growth. The Roeper School enables students to develop strong intrinsic motivation as they discover aspirations and develop talents consistent with those aspirations. Simultaneously, from a very young age students take considerable responsibility for their own actions and for the processes that go on in their school. Following the Roeper philosophy each student generates a long-term sense of purposeful direction, a strong sense of intrapersonal awareness, impressive creative and critical thinking skills, and a finely tuned sense of ethical responsibility. Upon graduation Roeper students are well prepared to find or create highly productive niches in the world of work and rewarding personal lives while serving as mature, ethical citizens of a complex, 21st-century, globalized society. This book includes descriptions of the multidimensional education the Roeper School provides. The perspectives in the volume are diverse, coming from leading researchers and theorists in the field of gifted education as well as teachers, administrators, alumni, and current students from the school itself. Overall, the book provides a beacon of hope for 21st-century education.

Standardized Childhood Sep 18 2021 A array of childcare and preschool options blossomed in the 1970s as the feminist movement spurred mothers into careers and community organizations nurtured new programs. Now a small circle of activists aims to bring more order to childhood, seeking to create a more standard, state-run preschool system. For young children already facing the rigors of play dates and harried parents juggling the strains of work and family, government is moving in to standardize childhood. Sociologist Bruce Fuller traveled the country to understand the ideologies of childhood and the raw political forces at play. He details how progressives earnestly seek to extend the rigors of public schooling down into the lives of very young children. Fuller then illuminates the stiff resistance from those who hold less trust in government solutions and more faith in nonprofits and local groups in contributing to

the upbringing of young children. The call for universal preschool is a new front in the culture wars, raising sharp questions about American families, cultural diversity, and the appropriate role of the state in the lives of our young children. *Standardized Childhood* shows why the universal preschool movement is attracting such robust support—and strident opposition—nationwide.
