Light of the Moon May 28 2022 In wartime France an English SOE and a German Abwehr officer fall in love - with consequences neither could have foreseen... I thought loving someone was simple. It isn't. Glorious, yes. Painful, yes. Unforgettable, yes. Simple, no. It took me the war to find out... Evelyn St. John has been parachuted into France to link up with the Resistance and to work undercover. Paul von Hoch's brief, as a member of German Intelligence, is to track down enemy spies. When Evelyn and Paul meet and fall in love, their feelings for one another are fierce, but can never be uncomplicated. And when the battle lines shift, and patriotism gives way to deeper truths, they will both face the gravest of challenges. [Apollo Expeditions to the Moon](#) Oct 21 2021 This special edition of Apollo Expeditions to the Moon, an official NASA publication, commemorates the fiftieth anniversary of the July 20, 1969, Moon landing with a thrilling insider's view of the space program. Essays by participants — engineers, astronauts, and administrators — recall the program's unprecedented challenges. Written in direct, jargon-free language, this compelling adventure features more than 160 dazzling color photographs and scores of black-and-white illustrations. Insights into management challenges as well as its engineering feats include contributions from Michael Collins, Buzz Aldrin, Alan Shepard, and other astronauts; NASA administrator James E. Webb; Christopher C. Kraft, head of the Mission Control Center; and engineer Wernher von Braun. Their informative, exciting narratives explore the issues that set the United States on the path to the Moon, offer perspectives on the program's legacy, and examine the particulars of individual missions. Journalist Robert Sherrod chronicles the selection and training of astronauts. James Lovell, commander of the ill-fated Apollo 13, recounts the damaged ship's dramatic return to Earth. Geologist and Apollo 17 astronaut Harrison Schmitt discusses the lunar expeditions' rich harvest of scientific information. These and other captivating firsthand accounts form an ideal introduction to the historic U.S. space program as well as fascinating reading for all ages. This new expanded edition includes a chronology of the Apollo project, additional photographs, and a new Introductory Essay by historian Paul Dickson that offers a modern retrospective of the Moon landing, discussing its place in the world of space exploration and its impact on American history and culture.

[Fly Me to the Moon](#) Mar 02 2020 When a leaf falls on a windy day, it drifts and tumbles, tossed every which way on the breeze. This is chaos in action. In Fly Me to the Moon, Edward Belbruno shows how to harness the same principle for low-fuel space travel—or, as he puts it, "surfing the gravitational field." Belbruno devised one of the most exciting concepts now being used in space flight, that of swinging through the cosmos on the subtle fluctuations of the planets' gravitational pulls. His idea was met with skepticism until 1991, when he used it to get a stray Japanese satellite back on course to the Moon. The successful rescue represented the first application of chaos to space travel and ushered in an emerging new field. Part memoir, part scientific adventure story, Fly Me to the Moon gives a gripping insider's account of that mission and of Belbruno's personal struggles with the science establishment. Along the way, Belbruno introduces readers to recent breathtaking advances in American space exploration. He discusses ways to capture and redirect asteroids; presents new research on the origin of the Moon; weighs in on discoveries like 2003 UB313 (now named Eris), a dwarf planet detected in the far outer reaches of our solar system—and much more. Grounded in Belbruno's own rigorous theoretical research but written for a general audience, Fly Me to the Moon is for anybody who has ever felt moved by the spirit of discovery.

[The Man Who Went to the Far Side of the Moon](#) Jun 24 2019 Presents a biography of the astronaut, Michael Collins, who circled the moon in the Apollo 11 space capsule while his colleagues Neil Armstrong and Buzz Aldrin landed the lunar module and walked on the moon.

[The Moon Book](#) Apr 26 2022 A guide to conscious living through the moon and her phases, incorporating wellness rituals, spellwork, and witchcraft for the modern seeker. We all know the moon. We all have a relationship with it. The earliest people obeyed her orbit, timed their months and holidays and celebrations and agriculture to the moon; the echoes of that system are still visible today, though the connection to the moon is often forgotten. Sarah Faith Gottesdiener is the leader of a movement to remind us of that lineage, guiding our rhythms and our sleep, our energy and our emotions, reminding us of our humanity and our magic. In her self-published Many Moons Workbooks and Lunar Journals, as well as her sold-out classes, she has guided over 50,000 readers to a deeper relationship with the moon, and through it, with themselves. This evergreen book will be an informative and comprehensive guide to lunar living, incorporating radical, self-empowering, and magical tools and resources for the beginner and experienced lunar-follower alike. Depending on where we are in our lives, depending on what we are feeling or what is happening around us, the moon allows us a space to invite ritual into our daily lives. The Moon Book will provide a framework on how to utilize the entire lunar cycle holistically, while offering ways for the reader to develop a personal relationship with their own cycles—energetic, personal, and emotional—through the lens of the moon's phases.

[Daughter of the Moon Goddess \(The Celestial Kingdom Duology, Book 1\)](#) Aug 19 2021 The bestselling debut fantasy inspired by the legend of the Chinese moon goddess. A young woman's quest to free her mother pits her against the most powerful immortal in the realm, setting her on a dangerous path where those she loves are not the only ones at risk... *THE INSTANT TOP 5 SUNDAY TIMES BESTSELLER*

[The Moon](#) May 04 2020 The more we know about the Moon, the more evidence we have that it is an artificial creation. Who made such a grandiose creation and for what purpose? If it is all for us, who are we and why are we so important to have this colossal project executed just for us? The issue of the real nature of the Moon cannot be separated from the issue of us people and our essence, our origin and the true history of planet Earth, together with the alien influence. There is, of course, the issue as to why the truth of its artificial creation is being hidden away from the public view, and it is always needlessly stressed and suggested that it is "the Earth's NATURAL satellite". All these issues have been grouped together here into one perfectly logical whole, together with all the arguments from the sphere of astrophysics, astropsychology, karmic psychology and esoteric spiritual development. This unity is self-revealing, all the answers are given and they are, by no means, imposed. Those answers reveal your very essence. You will be able to recognize them to the point you are ready to know yourself, same as always when the fundamental existential issues are in focus. Your view on the Moon, this world and people will never be the same. In this book, you will discover the answers to these questions: Unknown Facts about the Moon The Story of the Incarnation of Human Souls and Why They Happen The Influence of the Moon on the Soul Solar and Lunar Cults The Influence of the Moon in Astropsychology Lilith - The Black Moon - That, too, Exists Liberation from the Influence of the Moon and much, much more! Getting to know the real nature of the Moon will prove to be difficult for you to remain the same. Get it now.

[Atlas of the Moon](#) Jan 24 2022 Explores the observable parts of the moon, with maps of seventy-six sections of the near side of the moon, with place-names and their coordinates [Marketing the Moon](#) Oct 01 2022 One of the most successful public relations campaigns in history, featuring heroic astronauts, press-savvy rocket scientists, enthusiastic reporters, deep-pocketed defense contractors, and Tang. In July 1969, ninety-four percent of American televisions were tuned to coverage of Apollo 11's mission to the moon. How did space exploration, once the purview of rocket scientists, reach a larger audience than My Three Sons? Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience? In Marketing the Moon, David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history: the selling of the Apollo program. Primed by science fiction, magazine articles, and appearances by Wernher von Braun on the "Tomorrowland" segments of the Disneyland prime time television show, Americans were a receptive audience for NASA's pioneering "brand journalism." Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel—through press releases, bylined articles, lavishly detailed background materials, and fully produced radio and television features—rather than push an agenda. American astronauts, who signed exclusive agreements with Life magazine, became the heroic and patriotic faces of the program. And there was some judicious product placement: Hasselblad was the "first camera on the moon"; Sony cassette recorders and supplies of Tang were on board the capsule, and astronauts were equipped with the Exer-Genie personal exerciser. Everyone wanted a place on the bandwagon. Generously illustrated with vintage photographs, artwork, and advertisements, many never published before, Marketing the Moon shows that when Neil Armstrong took that giant leap for mankind, it was a triumph not just for American engineering and rocketry but for American marketing and public relations.

[Man on the Moon](#) Feb 10 2021 2017 is the 15th anniversary of the creation of Bob, Man on the Moon, celebrate with this anniversary edition. Enjoy the stunning artwork Simon Bartram has become famous for. Bob is everyone's favourite man on the moon; follow him on his daily adventures. Bob has a special job - looking after the moon. He keeps it clean and entertains passing space tourists as well as giving guided tours. He knows everything about the moon and that there is definitely no such thing as aliens!

[The Moon](#) Apr 14 2021 A Sunday Times must read book of 2019 'An out-of-this-world read ... brilliant and compelling. Morton is a high-octane British science journalist, and every chapter is littered with material that strikes, amazes or haunts ... this is a book filled not just with a lifetime's knowledge of its subject but with a lifetime's suppressed excitement.' James McConachie, Sunday Times Every generation has looked up from the Earth and wondered at the beauty of the Moon. 50 years ago, a few Americans became the first to do the reverse - with the whole world watching through their eyes. In this short but wide-ranging book, Oliver Morton explores the history and future of humankind's relationship with the Moon. A counterpoint in the sky, it has shaped our understanding of the Earth from Galileo to Apollo. Its gentle light has spoken of love and loneliness; its battered surface of death and the cosmic. For some, it is a future on which humankind has turned its back. For others, an adventure yet to begin. Advanced technologies, new ambitions and old dreams mean that men, women and robots now seem certain to return to the Moon. What will they learn there about the universe, the Earth and themselves? And, this time, will they stay?

[The Value of the Moon](#) Nov 21 2021 While the Moon was once thought to hold the key to space exploration, in recent decades, the U.S. has largely turned its sights toward Mars and other celestial bodies instead. In The Value of the Moon, lunar scientist Paul Spudis argues that the U.S. can and should return to the moon in order to remain a world leader in space utilization and development and a participant in and beneficiary of a new lunar economy. Spudis explores three reasons for returning to the Moon: it is close, it is interesting, and it is useful. The proximity of the Moon not only allows for frequent launches, but also control of any machinery we place there. It is interesting because recorded deep on its surface and in its craters is the preserved history of the moon, the sun, and indeed the entire galaxy. And finally, the moon is useful because it is rich with materials and energy. The moon, Spudis argues, is a logical base for further space exploration and even a possible future home for us all. Throughout his work, Spudis incorporates details about man's fascination with the moon and its place in our shared history. He also explores its religious, cultural, and scientific resonance and assesses its role in the future of spaceflight and our national security and prosperity. [Dark Side of the Moon](#) Jun 04 2020 Discusses the myths constructed by the Eisenhower, Kennedy, and Johnson administrations that were used to exploit American fears of what Russians would do in space.

[The Hare and the Moon](#) Dec 31 2019 An exquisite, full colour country almanac by artist Catherine Hyde, following the phases of the moon and a hare's journey throughout the twelve

months of the year in a lyrical tribute to the natural world. Waking from the winter solstice a hare begins her journey. Through the landscape and its changing seasons, moving in harmony with the moon. Atmospheric and gorgeous paintings show the hare running in January, watching in February, leaping in March, until it comes full circle, sleeping in December. Twelve double page paintings of the hare's journey are accompanied by full pages of art, showing a tree, a flower and a bird for each month of the year. This rich celebration of flora, fauna and country life includes hawthorn and cowslips, swallows, blackbirds, buzzards and owls, harebells, holly, olive, rowan, poppies and much more. Tidbits of text - folklore, fairytale, myth and legend complement the art complete this desirable gift book. This richly illustrated ebook is made in a fixed format layout to preserve the integrated text and colour images. Recommended devices that support this file include iPad, iPhone, Google Nexus and Kobo Arc. Please note that Fixed-layout ePUB 3 files are not currently supported on Amazon Kindle devices or B&N's NOOK.

Night of the Moon Oct 28 2019 Now in paperback, this sweet tale follows Yasmeen, a seven-year-old Pakistani-American girl, as she celebrates the Muslim holidays of Ramadan, "The Night of the Moon" (Chaand Raat), and Eid. With lush illustrations that evoke Islamic art, this beautiful story offers a peek into modern Muslim culture—and into the ancient roots of its most cherished traditions.

Trials of the Moon Sep 19 2021 The 'creation myths' of modern witchcraft and Paganism were decisively toppled at the turn of this century in Ronald Hutton's celebrated book, *Triumph of the Moon*. But did Hutton topple more than just myths? Are some truths also hidden in the rubble? Did paganism really die out centuries ago? Was witchcraft really no more than a fantasy? Were the Gods of Wicca really born out of the Romantic movement? Did Gerald Gardner lie about his initiation into witchcraft? Ben Whitmore has retraced many of Hutton's steps, critically evaluating the evidence, and he now suggests that the truth may be quite different and even more fascinating. Drawing on a wealth of scholarly material, Whitmore demonstrates that the field of Pagan history is anything but barren ground - it is rich and fertile, and we have barely begun to cultivate it.

Why Does the Earth Need the Moon? Sep 27 2019 Explore the science behind more than 200 questions about our planet. DK's exciting new Earth encyclopedia answers children's biggest, and weirdest, geography questions, covering volcanoes, earthquakes, oceans, and more! Did you know that the Earth's biggest waterfall is underwater, or that mountains grow? This children's book, ideal for ages 6-8, will help inquisitive minds find out the answers to all the questions they may have, and some they hadn't thought of yet! Can you freeze in a desert? Can humans make it rain? Is there life on moss? Covering amazing landforms, deep-sea wonders, and awesome weather, *Do You Know About Earth?* helps children get to grips with the massive topic that is our planet. Important issues such as global warming and plastics in the ocean are introduced alongside key geography topics so that children can learn all about how nature works, and discover what we can do to keep the Earth healthy. Get your children learning with this amazing Earth book, which is packed with fantastic facts for curious minds.

A Slice of the Moon Jul 06 2020 "Because of the potato me and my family left our home and travelled 6,000 miles to find a new life. . . Slim Hannigan and her family are poor but happy. Theirs is a life filled with love and laughter - and a pet pig called Hamlet. But things change overnight, and suddenly they find themselves facing hunger and danger like they have never known. . . So they leave their village in Ireland to journey to America where, they hope, family and fortune await them. Slim soon finds herself living a life that feels just like one of those far-fetched stories her Da has always told. Can one brave girl keep her family together no matter what is thrown at them. . . ?"

The Book of the Moon Feb 22 2022 The Book of the Moon is an absorbing, clear account of all things lunar. It is divided up into the following chapters: Facts and Figures; The Astronomers, their Charts, Maps and Instruments; Astronauts and Moon Missions; Gods and Myths; Astrology and Magic; Medicine; Miscellany.

Two Sides of the Moon Jan 12 2021 A dual portrait of American astronaut Dave Scott and Soviet cosmonaut Alexei Leonov discusses how their ground-breaking careers reflected one of the Cold War's most heated competitions, describing the Apollo Soyuz Test Project that marked the beginning of their decades-long friendship. Reprint. 15,000 first printing.

The Moon and Sixpence Nov 09 2020 Charles Strickland, a conventional stockbroker, abandons his wife and children for Paris and Tahiti, to live his life as a painter. Whilst his betrayal of family, duty and honour gives him the freedom to achieve greatness, his decision leads to an obsession which carries severe implications. Inspired by the life of Paul Gauguin, *The Moon and Sixpence* is at once a satiric caricature of Edwardian conventions and a vivid portrayal of the mentality of a genius.

Transformers Dark of the Moon Aug 07 2020 As scientists still struggle to understand the alien technology discovered on the far side of the moon during the 1969 moon mission, the Autobots and Decepticons contend to discover the secrets of the craft that might tilt the war in their favor.

Why I Love The Moon Sep 07 2020 Featuring children's own words along with heart-warming pictures, this book is a perfect celebration of all that's magical about the moon!

How High The Moon Nov 29 2019 Boston was nothing like South Carolina. Up there, colored folks could go anywhere they wanted. Folks didn't wait for church to dress in their fancy clothes. Fancy was just life. Mama was a city girl. . . and now I was going to be one too. It's 1944, and in a small Southern town, eleven-year-old Ella spends her summers running wild with her cousins and friends. But life isn't always so sunny. The deep racial tension that simmers beneath their town's peaceful facade never quite goes away, and Ella misses her mama - a beautiful jazz singer, who lives in Boston. So when an invitation arrives to come to Boston for a visit Ella is ecstatic - and the trip proves life-changing in more ways than one. For the first time, Ella sees what life outside of segregation is like, and begins to dream of a very different future. But her happiness is shattered when she returns home to the news that her classmate has been arrested for the murder of two white girls - and nothing will ever be the same again. A beautifully written and deeply moving story about finding and fighting for your place in the world.

Faces of the Moon Jul 30 2022 Do you wonder, when you see the Moon, at dusk, or dawn, or midday noon, just why her face is curved, or round, or why she sometimes can't be found? Why does the Moon seem to change shape from night to night? What's really going on up there in the sky? Innovative die-cuts and playful poetry introduce the names and shapes of the lunar phases to explain the role light and shadow play in this transformation. This eloquent introduction will fascinate young astronomers everywhere. Pair with the Moon Gazer's Wheel for a unique and educational gift.

Full Moon Mar 14 2021 Selected from photographs taken by Apollo astronauts during the moon expeditions, an array of 145 images offers a composite space voyage to Earth's satellite, from liftoff to moon landing to return home

How Apollo Flew to the Moon Dec 23 2021 Stung by the pioneering space successes of the Soviet Union - in particular, Gagarin being the first man in space, the United States gathered the best of its engineers and set itself the goal of reaching the Moon within a decade. In an expanding 2nd edition of *How Apollo Flew to the Moon*, David Woods tells the exciting story of how the resulting Apollo flights were conducted by following a virtual flight to the Moon and its exploration of the surface. From launch to splashdown, he hitches a ride in the incredible spaceships that took men to another world, exploring each step of the journey and detailing the enormous range of disciplines, techniques, and procedures the Apollo crews had to master. While describing the tremendous technological accomplishment involved, he adds the human dimension by calling on the testimony of the people who were there at the time. He provides a wealth of fascinating and accessible material: the role of the powerful Saturn V, the reasoning behind trajectories, the day-to-day concerns of human and spacecraft health between two worlds, the exploration of the lunar surface and the sheer daring involved in traveling to the Moon and the mid-twentieth century. Given the tremendous success of the original edition of *How Apollo Flew to the Moon*, the second edition will have a new chapter on surface activities, inspired by reader's comment on Amazon.com. There will also be additional detail in the existing chapters to incorporate all the feedback from the original edition, and will include larger illustrations.

Back to the Moon Oct 09 2020 A scientist's inspiring vision of our return to the Moon as humanity's next thrilling step in space exploration just over half a century since Neil Armstrong first stepped foot on the lunar surface, a new space race to the Moon is well underway and rapidly gaining momentum. Laying out a vision for the next fifty years, *Back to the Moon* is astrophysicist Joseph Silk's persuasive and impassioned case for putting scientific discovery at the forefront of lunar exploration. The Moon offers opportunities beyond our wildest imaginings, and plans to return are rapidly gaining momentum around the world. NASA aims to build a habitable orbiting space station to coordinate lunar development and exploration, while European and Chinese space agencies are planning lunar villages and the mining of precious resources dwindling here on Earth. Powerful international and commercial interests are driving the race to revisit the Moon, but lunar infrastructures could also open breathtaking vistas into the cosmos. Silk describes how the colonization of the Moon could usher in a thrilling new age of scientific exploration, and lays out what the next fifty years of lunar science might look like. With lunar telescopes of unprecedented size situated in permanently dark polar craters and on the far side of the Moon, we could finally be poised to answer some of the most profound questions confronting humankind, including whether we are alone in the Universe and what our cosmic origins are. Addressing both the daunting challenges and the immense promise of lunar exploration and exploitation, *Back to the Moon* reveals how prioritizing science, and in particular lunar astronomy, will enable us to address the deepest cosmic mysteries.

Footprints on the Moon Jul 18 2021 On July 20, 1969, at 3:16 p.m., Commander Neil Armstrong brought the lunar module, Eagle, to a safe landing on the Moon. Millions of television viewers on Earth watched breathlessly as he then became the first man to set foot on the Moon. This amazing achievement was years, even centuries, in the making. The Moon and the heavens have intrigued mankind since ancient times. FOOTPRINTS ON THE MOON chronicles the spirit and determination of visionaries from Galileo to John F. Kennedy, whose dream of reaching the Moon was finally and superbly realized through the efforts of the Apollo missions. With a compelling and thoroughly researched text, the great vision of the scientists, engineers, and astronauts who struggled to make the dream a reality is brought into sharp focus. The book brings to light great triumphs and tragedies. Readers will learn about the years of determination, experimentation, and risk that gave rise to many space explorations, including 17 Apollo missions. Today the Moon is less of a mystery than in ancient times, but it is still a wonder. Breathtaking photographs--many from NASA--portray the indescribable beauty of outer space, the Moon, and the wonder of mankind's inspiring vision.

To the Moon! Apr 02 2020 The exciting and inspiring true story of Apollo 8, the first crewed spaceship to break free of the Earth's orbit and reach the moon, by the best-selling author of *Apollo 13*. What's more exciting than spaceships and astronauts? How about a spaceship carrying the first astronauts ever to see the moon firsthand--on Christmas! The year was 1968, and the American people were still reeling from the spacecraft fire that killed the Apollo 1 crew a year earlier. On top of that, there were rumors that the Russian cosmonauts were getting ready to fly around the moon. NASA realized that they needed to take a bold step--and that they needed to take it now. They wanted to win the space race against Russia and hold true to President Kennedy's promise to put a man on the moon by the end of the decade. So in a risky move, a few days before Christmas of that year, they sent Frank Borman, Jim Lovell, and Bill Anders to the moon! This book about the exciting and inspiring true story of Apollo 8, the first crewed spaceship to break free of Earth's orbit and reach the moon, tells the story of these three brave men, the frantic rush to get their rocket ready, and the journey that gave the American people--and the world--a new look at the planet we live on and the corner of space we inhabit. Filled with the science and training required to put a person into space, and every detail of what it's like to live in a spaceship for days on end (including what happens when astronauts need to use the bathroom), this book is sure to leave kids clamoring for a spot on the next mission to outer space.

Shadow of the Moon Jun 16 2021 M. M. Kaye, author of *The Far Pavilions*, sweeps her readers back to the vast, glittering, sunbaked continent of India. *Shadow of the Moon* is the story of Winter de Ballesteros, a beautiful English heiress who has come to India to be married. It is also the tale of Captain Alex Randall, her escort and protector, who knows that Winter's husband to be has become a debauched wreck of a man. When India bursts into flaming hatreds and bitter bloodshed during the dark days of the Mutiny, Alex and Winter are thrown unwillingly together in the brutal and urgent struggle for survival.

The Moon Book Mar 26 2022 Among the significant additions to the book's contents is a guide to sites on the internet, which in recent years has opened up vast resources for skywatchers.

Book of the Moon Jun 28 2022 For thousands of years, the Moon has been the one thing in the night sky that everyone anywhere on our planet recognises. Trace the story of the Moon around the world and through history, from ancient legends about its creation, to its first sighting through a telescope, right up until the Apollo 11 mission and the first Moon landing in

1969.

Secrets of the Moon Aug 26 2019 *Secrets of the Moon: Understanding and Analysing the Lunar Surface* provides a unique account of the origin of key features on the lunar surface. Containing historical accounts and the latest observations from the field, in addition to exciting data from the Apollo manned missions, it describes the development of our current understanding of our Moon. It also explores the fracturing of the Moon, a topic not explored in other literature in the area, and contains a statistical treatment of the smaller craters of the Moon, as well as a geological treatment of the larger craters. This moderately technical account is designed to clarify and update the general thinking on the nature and origin of the most important lunar surface features for both undergraduate and research students. It may also be read by the professional scientist, especially the astronomer and the geologist who has found little time to study the Moon's topography, in addition to the lunar amateur astronomer and even the dedicated layman with a keen interest in lunar science. The book excludes nearly all mathematical symbols in order to remain accessible to those without a formal education in the area. **Key Features:** Authored by an expert in the area Presents a comprehensive account of the lunar surface, from historical observations to the NASA Apollo manned missions and the latest observations and data in the field Includes a statistical and geological treatment of the craters Dr. Gilbert Fielder is Reader Emeritus at Lancaster University, United Kingdom. He performed extended teaching at Lancaster University on Planetary Science and introduced a new degree course on Remote Sensing. Prior to this, he was Principal Investigator in NASA's Heat Capacity Mapping Programme, while continuing to head the Lunar and Planetary Unit at Lancaster until retirement. Dr. Fielder has authored several books, and presented many BBC and ITA television news programmes, as well as popular programmes with Sir Patrick Moore (on the BBC's "The Sky at Night") and, on the occasion of the first landing of astronauts on the Moon, with David Frost as Chairman in a special programme.

The Sky at Night: Book of the Moon - A Guide to Our Closest Neighbour Nov 02 2022 How well do you know our closest neighbour? Featured on BBC Radio 4 Saturday Live and BBC Breakfast The moon has fascinated humankind since the beginning of history. But far from being just a big rock out in space, the Moon has a phenomenal power over the earth, with its ability to create great waves, dictate the length of the day and summon the seasons. It is a key player in the story of our planet. In this unique celebration of the Moon, lunar expert and space scientist Dr Maggie Aderin Pocock takes readers on a journey through the Moon's past, present and future. She uncovers the way the Moon has captured our imaginations, contemplates how it was formed, and uncovers why we need the Moon to protect our fragile earth. Drawing on the latest scientific research, she then looks forward to what might be to come - will we return to the moon or will it become a launch pad to go into the great unknown? Filled with fascinating facts and anecdotes, and written with warmth and passion, *The Book of the Moon* is for scientists and stargazers alike. You'll never look at our closest neighbour in the same way again.

Tarot by the Moon Dec 11 2020 The energy of the moon has an undeniably powerful influence--on people, on plants and animals, and on the cycles and rhythms of the world. This book provides month-by-month tarot spreads, spells, rituals, and information--all of which are designed to help you manifest the changes and outcomes you want to see for yourself and your community. Author Victoria Constantino provides guidance for the ideal time, day of the week, or moon phase that best supports the specific spiritual work that you want to focus on. Explore spells and practices for cutting cords, house clearing and blessing, summoning a new career opportunity, finding your spirit animal, and many others. Delve into tarot with spreads for relationship renewal, connecting with your higher self, letting go, tapping into your potential, and more. Filled with hands-on practices to help you address dozens of different purposes and needs, *Tarot by the Moon* is a masterful guide to creating positive transformation with the cyclical magical energies that play such a powerful role in our lives.

The Value of the Moon Jan 30 2020 While the Moon was once thought to hold the key to space exploration, in recent decades, the U.S. has largely turned its sights toward Mars and other celestial bodies instead. In *The Value of the Moon*, lunar scientist Paul Spudis argues that the U.S. can and should return to the moon in order to remain a world leader in space utilization and development and a participant in and beneficiary of a new lunar economy. Spudis explores three reasons for returning to the Moon: it is close, it is interesting, and it is useful. The proximity of the Moon not only allows for frequent launches, but also control of any machinery we place there. It is interesting because recorded deep on its surface and in its craters is the preserved history of the moon, the sun, and indeed the entire galaxy. And finally, the moon is useful because it is rich with materials and energy. The moon, Spudis argues, is a logical base for further space exploration and even a possible future home for us all. Throughout his work, Spudis incorporates details about man's fascination with the moon and its place in our shared history. He also explores its religious, cultural, and scientific resonance and assesses its role in the future of spaceflight and our national security and prosperity. **Gardens of the Moon** Aug 31 2022 Vast legions of gods, mages, humans, dragons and all manner of creatures play out the fate of the Malazan Empire in this first book in a major epic fantasy series *The Malazan Empire* simmers with discontent, bled dry by interminable warfare, bitter infighting and bloody confrontations with the formidable Anomander Rake and his Tiste Andii, ancient and implacable sorcerers. Even the imperial legions, long inured to the bloodshed, yearn for some respite. Yet Empress Laseen's rule remains absolute, enforced by her dread Claw assassins. For Sergeant Whiskeyjack and his squad of Bridgeburners, and for Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. But Darujhistan, last of the Free Cities of Genabackis, yet holds out. It is to this ancient citadel that Laseen turns her predatory gaze. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... Conceived and written on a panoramic scale, *Gardens of the Moon* is epic fantasy of the highest order--an enthralling adventure by an outstanding new voice. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Secrets of the Moon May 16 2021 We are all familiar with our sun signs, but this book focuses on the new astrology and, in particular, the fascinating study of the moon's north nodes that, when used in conjunction with your sun signs, can provide a detailed picture of your soul's true path, your spiritual quest in life. This handy dip-in, dip-out book features in detail each of the moon's north nodes, or soul signs, which are the gateway to divine inspiration and show where in your life you can move along most easily and, ultimately, how to feel fulfilled. Each north node is explained in great detail and has a list of approaches, talents, interests, challenges, and potential pitfalls as well as an affirmation to help you focus on your own special attributes. You will also be able to discover your most successful career paths and the most rewarding activities and approach to life you can take based on your unique astrological makeup."

The Man in the Moon Jul 26 2019 In the first book of a multibook series, find out how a round, jolly baby became the great white hope of the Milky Way—and ringleader of the Guardians of Childhood. Up there in the sky. Don't you see him? No, not the moon. The Man in the Moon. He wasn't always a man. Nor was he always on the moon. He was once a child. Like you. Until a battle, a shooting star, and a lost balloon sent him on a quest. Meet the very first guardian of childhood. MiM, the Man in the Moon.
