Couchbase Essentials May 28 2022 This book is for those application developers who want to achieve greater flexibility and scalability from their software. Whether you are familiar with other NoSQL databases or have only used relational systems, this book will provide you with enough background to move you along at your own pace. If you are new to NoSQL document databases, the design discussions and introductory material will give you the information you need to get started with Couchbase.

American Jewish Year Book 2016 Jun 16 2021 The American Jewish Year Book, now in its 116th year, is the annual record of the North American Jewish communities and provides insight into their major trends. Part I presents a forum on the Pew Survey, " A Portrait of American Orthodox Jews." Part II begins with Chapter 13, "The Jewish Family." Chapter 14 examines " American Jews and the International Arena (April 1, 2015 – April 15, 2016), which focuses on US– Israel Relations. Chapters 15-17 analyze the demography and geography of the US, Canadian, and world Jewish populations. In Part III, Chapter 18 provides lists of Jewish institutions, including federations, community centers, social service agencies, national organizations, synagogues, Hillels, day schools, camps, museums, and Israeli consulates. In the final chapters, Chapter 19 presents national and local Jewish periodicals and broadcast media; Chapter 20 provides academic resources, including Jewish Studies programs, books, articles, websites, and research libraries; and Chapter 21 presents lists of major events in the past year, Jewish honorees, and obituaries. An invaluable record of Jewish life, the American Jewish Year Book illuminates contemporary issues with insight and breadth. It is a window into a complex and ever-changing world. Deborah Dash Moore, Frederick G. L. Huetwell Professor of History and Judaic Studies, and Director Emerita of the Frankel Center for Judaic Studies, University of Michigan A century from now and more, the stately volumes of the American Jewish Year Book will stand as the authoritative record of Jewish life since 1900. For anyone interested in tracing the long-term evolution of Jewish social, political, religious, and cultural trends from an objective yet passionately Jewish perspective, there simply is no substitute. Reflections on Progress Dec 23 2021 Now, more than ever, the world needs growth-oriented and socially inclusive policymaking. Is the world giving up on the promise of ever-greater prosperity for all, on functioning democratic institutions, and on long-term peace? Is the special set of circumstances that led to the recent rapid growth in emerging markets unlikely to be present in the future? Will the second decade of the twenty first century end with " secular stagnation" ? Does the rise of authoritarianism, populism, and fanatic nihilism—all experienced over the last few years—threaten to unravel what has been built painstakingly since the catastrophe of World War II? Kemal Dervis addresses these and similar questions in this thought-provoking series of essays written for Project Syndicate from 2011 to 2015. The essays are organized in three sections: global economic interdependence, inequality and the political economy of reform, and the specific challenge of Europe. The common theme is the need for growth-oriented and socially inclusive policymaking in an interdependent world. These kinds of policies offer the potential for another wave of unprecedented human progress aided by breathtaking new technologies. However, a huge and destabilizing disruption is possible if policymaking is not globally cooperative and is not focused on inclusion and greater equity. These essays synthesize the experience and analysis of a scholar and policymaker with national, regional, and international experience at the highest levels. Dervis exhibits a passion for combining strongly held values with political feasibility.

Jordan Peele and Keegan-Michael Key Oct 21 2021 From the small screen to the big time, Jordan Peele and Keegan-Michael Key have made waves across the United States and the world. Branching out beyond comedy, the two have been involved in hit feature films, and their innate ability to combine comedy with a sharp sense for social commentary has put them on the path toward continued success in an industry that has not had many African American superstars. Policy analysis of Nationally Determined Contributions in the Europe and Central Asia region Jun 04 2020 This publication has the objective of providing a comprehensive analysis of the key trends in greenhouse gas (GHG) emissions and vulnerability to climate change in the Europe and Central Asia (ECA) region, compiling the most relevant efforts and progress reported by countries in the implementation of mitigation and adaptation goals and measures in recent years. Considering the areas of the FAO mandate, this document aims to provide information with relevance for the agricultural, and land use, land-use change, and forestry (LULUCF) sectors as key contributors to country gross domestic product (GDP) and one of the most vulnerable areas of economic activity to the impacts of climate change. This policy analysis report consists of three main sections that consider the levels of economic development, as well as diverse geopolitical contexts, in the region. To reflect this diversity of country realities, the information is structured and presented by sub-regions, including the Caucasus, Central Asia, (European part of) the Commonwealth of the Independent States and Ukraine 2 (hereinafter referred to as CIS), EU27+ UK, 3 European Free Trade Association (EFTA), and Southeastern Europe (SEE).

Programmatic Advertising Aug 31 2022 This fundamental guide on programmatic advertising explains in detail how automated, data-driven advertising really works in practice and how the right adoption leads to a competitive advantage for advertisers, agencies and media. The new way of planning, steering and measuring marketing may still appear complex and threatening but promising at once to most decision makers. This collaborative compendium combines proven experience and best practice in 22 articles written by 45 renowned experts from all around the globe. Among them Dr. Florian Heinemann/Project-A, Peter Wü rtenberger/Axel-Springer, Deirdre McGlashan/MediaCom, Dr. Marc Grether/Xaxis, Michael Lamb/MediaMath, Carolin Owen/IPG, Stefan Bardega/Zenith, Arun Kumar/Cadreon, Dr. Ralf Strauss/Marketingverband, Jonathan Becher/SAP and many more great minds.

Information Systems Reengineering, Integration and Normalization Jun 24 2019 Database technology is an important subject in Computer Science. Every large company and nation needs a database to store information. The technology has evolved from file systems in the 60, to Hierarchical and Network databases in the 70's, to relational databases in the 80's, object-oriented databases in the 90's, and to XML documents and NoSQL today. As a result, there is a need to reengineer and update old databases into new databases. This book presents solutions for this task. In this fourth edition, Chapter 9 - Heterogeneous Database Connectivity (HDBC) offers a database gateway platform for companies to communicate with each other not only with their data, but also via their database. The ability of sharing a database can contribute to the applications of Big Data and surveys for decision support systems. The HDBC gateway solution collects input from the database, transfers the data into its middleware storage, converts it into a common data format such as XML documents, and then distributes them to the users. HDBC transforms the common data into the target database to meet the user's requirements, acting like a voltage transformer hub. The voltage transformer converts the voltage to a voltage required by the users. Similarly, HDBC transforms the database to the target database required by the users. This book covers reengineering for data conversion, integration for combining databases and merging databases and expert system rules, normalization for eliminating duplicate data from the database, and above all, HDBC connects all legacy databases to one target database for the users. The authors provide a forum for readers to ask questions and the answers are given by the authors and the other readers on the Internet.

11th International Conference on Cyber Warfare and Security Oct 09 2020 The 11thInternational Conference on Cyber Warfare and Security (ICCWS 2016) is being held at Boston University, Boston, USA on the 17-18th March 2016. The Conference Chair is Dr Tanya Zlateva and the Programme Chair is Professor Virginia Greiman, both from Boston University. ICCWS is a recognised Cyber Security event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyber Warfare and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of Cyberwar and Cyber Security research available to them. The keynote speakers for the conference are Daryl Haegley from the Department of Defense (DoD), who will address the topic Control Systems Networks...What's in Your Building? and Neal Ziring from the National Security Agency who will be providing some insight to the issue of Is Security Achievable? A Practical Perspective. ICCWS received 125 abstract submissions this year. After the double blind, peer review process there are 43 Academic Research Papers 8 PhD papers Research papers, 7 Masters and 1 work-in-progress papers published in these Conference Proceedings. These papers represent work from around the world, including: Australia, Canada, China, Czech Republic, District of Columbia, Finland, France, Israel, Japan, Lebanon, Netherlands, Pakistan, Russian Federation, Saudi Arabia, South Africa, Turkey, United Arab Emirates, UK, USA.

Learning Apache Cassandra Mar 14 2021 Build a scalable, fault-tolerant and highly available data layer for your applications using Apache Cassandra About This Book Install Cassandra and set up multi-node clusters Design rich schemas that capture the relationships between different data types Master the advanced features available in Cassandra 3.x through a step-by-step tutorial and build a scalable, high performance database layer Who This Book Is For If you are a NoSQL developer and new to Apache Cassandra who wants to learn its common as well as not-so-common features, this book is for you. Alternatively, a developer wanting to enter the world of NoSQL will find this book useful. It does not assume any prior experience in coding or any framework. What You Will Learn Install Cassandra Create keyspaces and tables with multiple clustering columns to organize related data Use secondary indexes and materialized views to avoid denormalization of data Effortlessly handle concurrent updates with collection columns Ensure data integrity with lightweight transactions and logged batches Understand eventual consistency and use the right consistency level for your situation Understand data distribution with Cassandra Develop simple application using Java driver and implement application-level optimizations In Detail Cassandra is a distributed database that stands out thanks to its robust feature set and intuitive interface, while providing high availability and scalability of a distributed data store. This book will introduce you to the rich feature set offered by Cassandra, and empower you to create and manage a highly scalable, performant and fault-tolerant database layer. The book starts by explaining the new features implemented in Cassandra 3.x and get you set up with Cassandra. Then you'll walk through data modeling in Cassandra and the rich feature set available to design a flexible schema. Next you'll learn to create tables with composite partition keys, collections and user-defined types and get to know different methods to avoid denormalization of data. You will then proceed to create user-defined functions and aggregates in Cassandra. Then, you will set up a multi node cluster and see how the dynamics of Cassandra change with it. Finally, you will implement some application-level optimizations using a Java client. By the end of this book, you'll be fully equipped to build powerful, scalable

Cassandra database layers for your applications. Style and approach This book takes a step-by- step approach to give you basic to intermediate knowledge of Apache Cassandra. Every concept is explained in depth, and is supplemented with practical examples when required.

A Data Scientist's Guide to Acquiring, Cleaning, and Managing Data in R Jun 28 2022 The only how-to guide offering a unified, systemic approach to acquiring, cleaning, and managing data in R Every experienced practitioner knows that preparing data for modeling is a painstaking, time-consuming process. Adding to the difficulty is that most modelers learn the steps involved in cleaning and managing data piecemeal, often on the fly, or they develop their own ad hoc methods. This book helps simplify their task by providing a unified, systematic approach to acquiring, modeling, manipulating, cleaning, and maintaining data in R. Starting with the very basics, data scientists Samuel E. Buttrey and Lyn R. Whitaker walk readers through the entire process. From what data looks like and what it should look like, they progress through all the steps involved in getting data ready for modeling. They describe best practices for acquiring data from numerous sources; explore key issues in data handling, including text/regular expressions, big data, parallel processing, merging, matching, and checking for duplicates; and outline highly efficient and reliable techniques for documenting data and recordkeeping, including audit trails, getting data back out of R, and more. The only single-source guide to R data and its preparation, it describes best practices for acquiring, manipulating, cleaning, and maintaining data Begins with the basics and walks readers through all the steps necessary to get data ready for the modeling process Provides expert guidance on how to document the processes described so that they are reproducible Written by seasoned professionals, it provides both introductory and advanced techniques Features case studies with supporting data and R code, hosted on a companion website A Data Scientist's Guide to Acquiring, Cleaning and Managing Data in R is a valuable working resource/bench manual for practitioners who collect and analyze data, lab scientists and research associates of all levels of experience, and graduate-level data mining students.

Ecological Systems Integrity Sep 27 2019 Environmental law and governance are the cornerstones of global efforts to conserve the environment, protect resources and ensure fair and equitable outcomes for all of the planet's inhabitants. This book presents a series of thought-provoking chapters which consider the place of governance and law in the defence against imminent and ongoing threats to ecological, social and cultural integrity. Written by an international team of both established and early-career scholars from various disciplines and backgrounds, the chapters cover the most pressing and contemporary issues in environmental law and governance. These include access and benefit-sharing; the right to food and water; climate change coping and adaptation; human rights; the rights of indigenous communities; public and environmental health; and many more. The book has a general focus on environmental governance and law in the European Union and offers points of comparison with Canada and North and South America.

Operations in Afghanistan Aug 19 2021 This report looks at operations in Afghanistan since 2006 and makes further recommendations for the anticipated draw-down of forces. UK Forces were deployed in Helmand Province in Afghanistan for three years from 2006 without the necessary personnel, equipment or intelligence to succeed in their mission. Mistakes were made as a result of a failure in military and political coordination. The decision to move UK Armed Forces into the South of Afghanistan in early 2006 was not fully thought through. The Committee is concerned that the MoD did not anticipate that the presence of the Armed Forces in Helmand might stir up a hornets' nest, especially as much of the intelligence was contradictory. Senior military advisers should have drawn attention to the need for force levels to be sufficiently robust to cope with an unpredictable conflict. The Committee is disturbed that the Secretary of State was told that commanders on the ground were content with the support they were being given in Helmand when clearly they were not. After only a matter of months in Helmand, the nature of the UK Mission changed, with serious strategic implications. The MoD did not respond quickly enough to changes in Taliban tactics. The MoD should prioritise the protection of personnel. The Government's room for manoeuvre regarding the number of troops that could be withdrawn from Afghanistan as part of an immediate transition is necessarily limited. More emphasis needs to be placed on capacity building within the political system if long-term success is to be achieved.

Decarbonization in the European Union Apr 14 2021 The authors examine how far internal policies in the European Union move towards the objective of reducing greenhouse gas emissions in the EU by 80-95 per cent by 2050, and how or whether the EU's 2050 objective to 'decarbonise' could affect the EU's relations with a number of external energy partners.

Regulation and Governance of Mutual Funds Nov 29 2019 This book provides a detailed analysis of mutual fund regulations and governance in the UK from the investor protection perspective. It comprehensively describes mutual funds by their function, social utility, and legal attributes, examining the level of protection provided to retail investors under existing regulations. Mutual funds are externally managed with fund ownership separated out from their management, which carries a potential conflict of interest between the self-interests of the fund management and each fund's investors. The book provides an in-depth analysis of this agency problem in the mutual fund industry, comparing the competing governance models in the UK and the US and the supervision of management activities. In the UK, it investigates the main governance mechanisms, including disclosure, the effectiveness of voting rights, and the role of the Financial Conduct Authority in protecting investors. It also considers the role of prudential regulations in protecting mutual fund investors, with a particular focus on risk management and mutual fund liquidity crisis. The book further investigates the impact of the withdrawal of the UK from the European Union (Brexit) on the industry and what this means for the future of the undertakings for collective investment in transferable securities (UCITS) in the UK. The concept of mutual funds is still not clearly understood, so this book will clearly define the different legal and practical aspects of mutual funds. It will be the first substantial study of mutual fund governance mechanisms under the existing mutual fund laws and regulations in the UK.

Immunisation against infectious diseases Jul 06 2020 This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Renewable Energy Transformation or Fossil Fuel Backlash Nov 02 2022 Renewable energy is rising within an energy system dominated by powerful vested energy interests in fossil fuels, nuclear and electric utilities. Analyzing renewables in six very different countries, the author argues that it is the extent to which states have controlled these vested interests that determines the success or failure of renewables.
