Engine Failure Analysis Aug 23 2019 Engine failures result from a complex set of conditions, effects, and situations. To understand why engines fail and remedy those failures, one must understand how engine components are designed and manufactured, how they function, and how they interact with other engine components. To this end, this book examines how engine components are designed and how they function, along with their physical and technical properties. Translated from a popular German reference work, this English edition sheds light on determining engine failure and remedies. The authors present a selection of engine failures, investigate and evaluate why they failed, and provide guidance on how to prevent such failures. A large range of possible engine failures is presented in a comprehensive, readily understandable manner, free of manufacturer bias. The scope of engines covered includes general-purpose engines found in heavy commercial vehicles, railway locomotives and vehicles, electrical generators, prime movers, and marine engines. Such engines are technical precursors to automotive engines. This book is for all who deal with engine failures: those who work in repair shops, shipyards, engineering consultancies, insurance companies and technical oversight organizations, as well as R&D departments at engine and component manufacturers. Researchers, academics, and students will learn how even the theoretically impossible can-and will-happen.

Leopard 1 Main Battle Tank 1965-95 Jul 14 2021 Development of the Leopard 1 can be traced back to November 1956, when the operational requirement for a new battle tank was formulated by the Federal German Armed Forces (Bundeswehr). Originally a Franco-German project, the tank under design was named the 'Standard-Panzer'. The French later dropped out, however, and on 1 October 1963 the 'Standard' tank was officially named 'Leopard', an appropriate choice considering Germany's wartime pedigree with the formidable Tiger and Panther. This book traces the development and service record of the Leopard 1, detailing its control systems, modifications and variants.

The Price of Alliance May 24 2022 The first major reappraisal of Pierre Trudeau's controversial defence policy, *The Price of Alliance* uses the 1976 procurement of Leopard tanks for Canada's troops in Europe to shed light on Canada's relationship with NATO. After six years of pressure from Canada's allies, Trudeau was convinced that Canadian tanks in Europe were necessary to support foreign policy objectives, and the tanks symbolized an increased Canadian commitment to NATO. Drawing on interviews and records from Canada, NATO, the US, and Germany, Frank Maas addresses the problems of defence policymaking within a multi-country alliance and the opportunities and difficulties of Canadian defence procurement.

Leopard 2 Dec 27 2019 When the Leopard 2, a third-generation main battle tank, first entered service with the Bundeswehr in 1979, at the height of the Cold War, it was indisputably the most advanced and potent tank in the world. During the last four decades it has undergone numerous upgrades and modifications to ensure it remains one of the most powerful tanks operating today. It currently serves with the armies of seventeen nations, from Canada to Turkey and including many European states. The Leopard 2 is also a popular subject for modelers which is why David Grummitt's highly illustrated expert guide is so valuable. As well as describing in detail the Leopard 2's design, development and combat history, he gives a full account of the wide range of modeling kits and accessories available in all the popular scales. Included is a modeling gallery, which features six builds covering a range of Leopard 2s serving with different nations and a section of large-scale color profiles which provide both reference and inspiration for modelers and military enthusiasts alike.

Encyclopedia of African Airlines Jan 28 2020 The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers—both small and large, government owned and private—have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.

The Leopard's Prey Mar 30 2020 ?A larger-than-life heroine far ahead of her time,?(Denver Post) returns to 1920s Africa, where she meets with an ominous warning? Jade del Cameron's latest endeavor?helping a company collect wild animals for U.S. zoos? finds her lassoing zebras and posing as bait for a leopard. But the real danger begins when Jade's friends find a merchant's body on their coffee plantation. Authorities determine the cause of death to be murder. Their prime suspect: Jade's beau, moviemaker and World War I flying ace Sam Featherstone. To clear Sam's name, Jade launches her own investigation, questioning the dead man's partners and clients. But nothing can prepare Jade for the journey that lies ahead, as she must make an emergency landing in Sam's plane deep within the vast African wilderness, then risk the long trek back to Nairobi to confront more than one kind of brutal killer face-to-face?

7 Seconds to Die Mar 22 2022 The first full analysis of the second Nagorno-Karabakh War—the first war in history won primarily by unmanned systems. The Second Nagorno-Karabakh war—fought between Armenia and Azerbaijan between September 24 and November 10, 2020—was the first war in history won primarily by unmanned systems. This 44-day war resulted in a decisive military victory for Azerbaijan. Armenia was outfought, outnumbered, and outspent and lost even though they controlled the high ground in a mountainous region that favored traditional defense. Azerbaijan's alliance with Turkey, and close technological support from Israel, strategically isolated Armenia. In addition, Turkey's posturing influenced the Russians not to intervene to support Armenia. That Azerbaijan attacked Armenia during the pandemic was an additional factor. The fact that Azerbaijan won the war is not extraordinary, considering the correlation of forces arrayed against Armenia. What is exceptional is that this was the first modern war primarily decided by unmanned weapons. In this war the Turkish-made BAYRAKTAR TB2 Unmanned Air Combat Vehicle (UCAV) and the Israeli-made HAROP Loitering Munition (LM) dominated the fighting and provided Azerbaijan with a war-winning advantage.

ReCreating Strategy Apr 30 2020 'Cummings' book is very interesting, refreshing and intellectually stimulating... It should be a mandatory textbook for all serious students of management? - Management Learning 'Stephen Cummings' ReCreating Strategy is currently the best book on strategy, combining a holistic and critical understanding of the issue? -Stewart Clegg, University of Technology, Sydney 'An imaginative attempt to bring together and apply the many analytical frameworks relating to the organization as a whole into strategy theory and practice. Written for students on strategy, change management and more general management and organization theory courses. Encourages students to question assumptions and think creatively about strategy and management. Stimulating and original? - Long Range Planning 'In this intriguing book [Cummings] claims to be surprised that academics critical of management theory don't critique its history, and proposes a kind of liberation theology in response, but this is not as doctrinaire. It's more like replacing some well-justified habits with a refreshing originality of approach. The outcome is stimulating.... The author offers a cogently argued deconstruction of some well-known frameworks in strategy, and delivers his own reinterpretation of strategic discourse. There are five longer case studies in the book and several shorter vignettes scattered throughout early chapters, as well as pedagogical aids at the end of each chapter? - Best of Biz, The Business Information Site 'Do you worry about organizations becoming slaves to markets? Do you wish that organizations had the nerve to build their own ethos rather than just grubbing for profit? Do you aspire to inspiration rather than perspiration? Why does management practice get in the way of thinking and creativity? Stephen Cummings provides insight and guidance in a book of genuine scholarship and creativity? - John McGee, President of the Strategic Management Society, USA 'Management courses need more of what Stephen is offering. He wants us to go on an 'unlearning curve', one which leads to fresh thinking about strategy and the emerging roles and responsibilities of business and companies. This book not only tells us where we are coming from but, more importantly, it inspires us to think profoundly about where we could go. It's also a very good read? - Josephine Green, Director of Trends and Strategy, Philips 'ReCreating Strategy provides a challenging examination of the emergence of management which combines postmodern and orthodox perspectives. Stephen Cummings is able to provide not only a fresh treatment of strategy and ethics but also to engage with a variety of potential audiences. He provokes and informs in equal measure? - Richard Whipp, Cardiff University 'A truly eclectic approach to strategy! Intellectually capturing, the book is great fun to read at the same time. A must for those who want to discuss management beyond styles, fads and fashions? - Hubert Wagner, Consultant ReCreating Strategy is written for students of strategy, change management and more general management and organization theory courses. It will provide a better understanding of how to bring together and apply the many analytical frameworks relating to the organization as a whole. Stephen Cummings challenges the view that there is never one best framework and shows why the latest theory is not necessarily better than earlier ones. The textbook includes short and long case studies, interesting pictorial aids and examples, and a generally more participative and rewarding approach than that offered by more mainstream texts. PowerPoint slides to accompany the book are now also available by clicking on the link to 'Sample Chapters and Resources' in the left hand margin. The book also offers more scope for individual lecturers who wish to encourage students to question assumptions and think creatively about strategy and management.'
