However, rollovers accounted for nearly 35% of all deaths from passenger vehicle crashes. In 2010 alone, more than 7,600 people died in rollover crashes.” Rollover accidents continue to be a leading contributor of vehicle deaths. In *Bush on the Home Front*, former Bush White House official and academic John D. Graham analyzes Bush's successes in these areas and setbacks in other areas such as Social Security and immigration reform. Graham provides valuable insights into how future presidents can shape U.S. domestic policy while facing continuing partisan polarization.

**Screwing Mother Nature for Profit: How Corporations Betray Our Trust** Jan 28 2020 *Screwing Mother Nature for Profit* is a wake-up call to acknowledge, and heal, the harm that corporate greed is wreaking on our planet. Overpopulation, hunger, pollution, climate change: the damage is all around us. How can we live in harmony with each other and with nature? For answers, Elaine Smitha turns to Mother Nature herself, explaining how her principles of cooperative competition can set corporations and governments on a path of conscious, sustainable growth. Drawing on concepts from Henry Ford's innovative production line to the findings of the 'new biology', she reveals a startling correlation between businesses and living systems - then uses this as the basis for a model of leadership oriented towards benefits much bigger than cash flow. Some of the topics covered include: \* The danger of manipulating the food supply with 'terminator seeds' \* The possibilities of collective intelligence and crowd-sourcing \* Innovative solutions for health care, communications and corporate governance \* Ways for businesses to tap into the self-healing processes of the body and the power of the mind. In the words of one seasoned journalist, her book 'goes worlds beyond ...tired, ineffective and faddish theories' to hold out fresh hope - not only for the corporate world, but for our whole world.

English Historical Linguistics 2006: Syntax and morphology Jan 08 2021 The papers selected for this volume were first presented at the 14th International Conference on English Historical Linguistics (Bergamo, 2006). At that important event, alongside studies of phonology, lexis, semantics and dialectology (presented in two companion volumes in this series), many innovative contributions focused on syntax and morphology. A carefully peer-reviewed selection, including one of the plenary lectures, appears here in print for the first time, bearing witness to the quality of the scholarly interest in this field of research. In all the contributions, well-established methods combine with new theoretical approaches in an attempt to shed more light on phenomena that have hitherto remained unexplored, or have only just begun to be investigated. State-of-the-art tools, such as electronic corpora and concordancing software, are employed consistently, ensuring a methodological homogeneity of the contributions.
