Australian Battalion Commanders in the Second World War Feb 06 2021 In Australian Battalion Commanders in the Second World War, Garth Pratten explores, for the first time, the background, role and conduct of the commanding officers of Australian infantry battalions in World War II. Despite their vital role as the lynchpins of the battlefield, uniting the senior officers with the soldiers who fought, the battalion commanders have previously received scant attention in contemporary military history. This book redresses the balance, providing a gripping, meticulously researched and insightful account that charts the development of Australia's infantry commanding officers from part-time, ill-prepared, amateurs to seasoned veterans who, although still not professional soldiers, deserved the title of professional men of war. Drawing on extensive and original archival material, Pratten recreates battle scenes and brings to light many diverse personalities. It is a story of men confronting the timeless challenges of military leadership – mastering their own fear and discomfort - in order to motivate and inspire their troops to endure the maelstrom of war.

Projection Displays Jan 17 2022 Projection is a technology for generating large, high resolution images at a price point end users can afford. This allows it to be used in a wide variety of large-screen markets such as television and cinema. In addition, there are emerging small screen markets where a pocketable miniaturized projector can display images from mobile information devices such as smart phones or portable media players. Fully revised, this second edition of Projection Displays provides up-to-date coverage of the optical and mechanical systems in electronic projection displays. It takes into account major new developments in the many technologies needed to manufacture a projector display system. It presents a comprehensive review of projector architectures, systems, components and devices. Key new and updated features

include: new material on light sources for projection displays; updated information on the human factors of projection displays including color gamuts, resolution and speckle; coverage of new image generating systems including LCOS and scanned laser systems; up to date information on front and rear projection screens; practical examples of projection display applications; models for predicting the performance of optical and mechanical systems This book is aimed at practicing engineers and researchers involved in the research, development, design and manufacture of projection displays. It includes key aspects from the many technologies contributing to projection systems such as illumination sources, optical design, electronics, semiconductor design, microdisplay systems and mechanical engineering. The book will also be of interest to graduate students taking courses in display technology and imaging science, as well as students of the many other engineering, physics and optics disciplines that lead into the field of projection displays. The Society for Information Display (SID) is an international society, which has the aim of encouraging the development of all aspects of the field of information display. Complementary to the aims of the society, the Wiley-SID series is intended to explain the latest developments in information display technology at a professional level. The broad scope of the series addresses all facets of information displays from technical aspects through systems and prototypes to standards and ergonomics

Bonds and Broken Dreams (Amplifier 2) Jan 05 2021 We had chosen our place, etching our lives into a new land. Then we had defended that land when called upon to do so. And we 'd won. We 'd maintained our freedom. But magic attracts magic. As they say. So when the sorcerers showed up, holding my recent past hostage — along with a future I had dreamed I might build — it was just as expected. In fact, I might have been getting just a little bored playing at being Emma Johnson. I might not believe in bonds fortified by fate, or in love at first sight for that matter. But magic, it seemed, had other ideas.

Bonds and Broken Dreams is the second book in the Amplifier series, which is set in the same universe as the Dowser, Oracle, Reconstructionist, Archivist, and Misfits of the Adept Universe series. His son, Stone, warned him of the invasion and he joined up with Gary Enquine to form a rudimentary resistance network. Now, they must find a way to rise up and defeat the conquerors of Earth! Nanden must escape and unite the remaining human and clone forces, scattered across the Solar System. I kill every day - most days - to keep my culture intact. I would say that is killing for those I love. Of course there is a moral code... And as a soldier the
