[Double Taxation and the League of Nations Dec 26 2019](#) Modern-day tax treaties have their foundations in one of the three Model Tax Treaties developed by the League of Nations in 1928. Using previously unexplored archival material, Sunita Jogarajan provides the first in-depth examination of the development of the League's Models. This new research provides insights into questions such as the importance of double taxation versus tax evasion; the preference for source-taxation versus residence-taxation; the influence of theory and practice on the League's work; the development of bilateral rather than multilateral treaties; the influence of developing countries on the League's work; the role of Commentary in interpreting model tax treaties; and the influential factors and key individuals involved. A better understanding of the development of the original models will inform and help guide interpretation and reform of modern-day tax treaties. Additionally, this book will be of interest to scholars of international relations and the development of law at international organisations.

[Tax Guide to Farming, Forestry and Fishing May 31 2020](#) New Zealand's primary sector continues to dominate our export earnings. In 2019 export revenue is forecast to reach over \$45 billion. Given its strategic importance, it is unsurprising that the sector has a specialised and diverse set of tax regimes, all of which are brought together in the Tax Guide to Farming, Forestry and Fishing. In addition to covering these special regimes, this book also covers some of the more general tax principles that are likely to affect farming, forestry and fishing. This third edition has been fully updated to include all legislative and Inland Revenue policy changes up to August 2019, including the new bloodstock rules, changes to the tax treatment of farmhouse expenses, repeal of the adverse event scheme for income equalisation, overhaul of the schedular payments rules, the application of the bright-line test to farming properties, and new IR rulings on deductibility of resource consents.

[Permanent Establishments Aug 02 2020](#) Permanent Establishments (PEs) are a key facet of international taxation. They constitute the crucial threshold for the assignment of taxing rights to a jurisdiction in all cases of enterprises operating in more than one country. The issue of whether there is a PE, and how much profit should be allocated to it, is an increasingly important factor in tax planning, tax accounting, tax compliance, and related tax risk management. Groundbreaking developments have reshaped the face of the classical PE concept during the year 2017. Following action item no. 7 of the Anti-BEPS efforts of G20 and OECD, the OECD has presented the Multilateral Instrument (MLI) on Base Erosion and Profit Shifting in June 2017. Based on the MLI as well as earlier drafts, Article 5 of the OECD Model Tax Convention and the Official Commentary have been amended in November 2017. Similarly, Article 7 of the OECD Model Tax Convention on the allocation of income in PE situations is influenced by the October 2015 OECD BEPS proposals. This academically rigorous yet thoroughly practical work provides comprehensive guidance on a variety of complex PE issues. Its initial chapters analyse the latest OECD and EU developments in the context of Articles 5 and 7 of the OECD Model Tax Convention. 21 country chapters cover domestic PE issues as well as country-specific treaty developments from a practical perspective.
