*Growing Up in England* Jun 29 2022 This book presents an entirely fresh view of the upbringing of English children in upper and professional class families over three centuries. Drawing on direct testimony from contemporary diaries and letters, the book revises previous understandings of parenting and what it was like to grow up in the period between 1600 and 1914. Using advice literature which set out developing ideologies of childhood, gender and parenting, the book explores the separate but complementary roles of mothers and fathers in raising their children. Male upbringing is discussed in terms of schooling, female through the moral and social context of a domestic schoolroom dominated by a governess. Boys were trained for the world, girls for society and marriage. Rare teenage diaries surviving from the Georgian and Victorian periods show teenagers speaking for themselves about education; relationships with parents, siblings and friends; and their social, class and gender identity.

**Growing up with Parents who have Learning Difficulties** Oct 29 2019 Growing up with Parents who have Learning Difficulties uses a life-story approach to present new evidence about how children from such families manage the transition to adulthood, and about the longer-term outcomes of such an upbringing. It offers a view of parental competence as a social attribute rather than an individual skill, assessing the implications for institutional policies and practices. The authors address the notion of children having to parent their disabled parents and argue for a shift in emphasis from protecting children to supporting families. This innovative book provides a fresh approach to a subject rife with prejudice and challenges us to think again about many taken-for-granted ideas about the process of parenting and the needs of children. It also demonstrates the power of narrative research and its capacity for bringing alive people's experience in a way that enables us to better understand their lives.

**Growing Up Resilient** Mar 03 2020 It is universally accepted that sensitive and responsive caregiving leads to positive cognitive and socio-emotional outcomes for children. While several intervention approaches exist, this text brings together the rationale and current evidence base for one such approach—the Mediation Intervention for Sensitizing Caregivers (MISC). MISC integrates aspects of socio-emotional health and cognitive development as well as being less culturally intrusive than existing approaches. It is a strengths-based program complimenting existing practices and cultures. Editors bring together in one volume the theory and research from the last decade supporting the MISC approach. Chapters focus on a range of topics, such as: training the trainer, maternal depression and MISC, applying MISC to families reunited after migration-related separation and more. The book also focuses on several country-specific cases, such as applying MISC to HIV/AIDS affected children in South Africa or in early childhood care settings in Israel. This book is essential reading for those working in early educational or clinical settings tasked with developing policy to ensure optimal child developmental outcomes. The book is applicable to professionals from a wide variety of disciplines including clinical, counselling, educational, psychology, psychiatry, paediatrics, nursing, social work and public health.

**Invincible** Jul 07 2020 "When you grow up living with domestic violence, witnessing those you love tear each other down with physical and verbal blows, your brain doesn't know how to deal with that." --from the foreword by Tony Robbins According to UNICEF, growing up with domestic violence is one of the most pervasive human rights violations in the world, affecting more than a billion people. **Growing Up Shared** May 05 2020 Is it okay to share details about my child's life on social media? What kinds of pictures should I avoid posting? Am I taking away my kids' ownership over their future online footprint? It has never been easier to share our lives online—from meals to selfies and relationship statuses to locations, information about our daily activities flows freely. But what about our right to share our kids' lives? In today's age of "sharenting", striking the right balance between engaging in online communities and respecting a child's privacy and safety can be difficult. From her years of research, Steinberg outlines what parents should and should not feel comfortable sharing, while providing suggestions and ideas for a wide range of approaches, including: How we can benefit from sharing, and how screens can connect us The dangers of oversharing How to model behavior online The difference in how parents and

kids view online sharing The importance of educating kids about technology Engaging, approachable, and with concrete takeaways for today's parents, Growing Up Shared investigates the benefits and risks of sharing our kids' lives on social media, and will help any parent decide on the right path for their family to follow in the online world.

*Growing Up in the Ice Age* Nov 22 2021 It is estimated that in prehistoric societies children comprised at least forty to sixty-five percent of the population, yet by default, our ancestral landscapes are peopled by adults who hunt, gather, fish, knap tools and make art. But these adults were also parents, grandparents, aunts and uncles (however they would have codified these kin relationships) who had to make space physically, emotionally, intellectually, and cognitively for the infants, children and adolescents around them. The economic, social, and political roles of Paleolithic children are often understudied because they are assumed to be unknowable or negligible. Drawing on the most recent data from the cognitive sciences and from the ethnographic, fossil, archaeological, and primate records, *Growing Up in the Ice Age* challenges these assumptions. This volume is a timely and evidence-based look at the lived lives of Paleolithic children and the communities of which they were a part. By rendering the "invisible" children visible, readers will gain a new understanding not only of the contributions that children have made to the biological and cultural entities we are today but also of the Paleolithic period as whole.

*Growing Up in Transit* Jun 17 2021 In this compelling study of the children of serial migrants, Danau Tanu argues that the international schools they attend promote an ideology of being "international" that is Eurocentric. Despite the cosmopolitan rhetoric, hierarchies of race, culture and class shape popularity, friendships and romance on campus. By going back to high school for a year, Tanu befriended transnational youth, often called "Third Culture Kids", to present their struggles with identity, belonging and internalized racism in their own words. The result is the first engaging, anthropological critique of the way Western-style cosmopolitanism is institutionalized as cultural capital to reproduce global socio-cultural inequalities.

**Working and Growing Up in America** Jan 13 2021 Should teenagers have jobs while they're in high school? Doesn't working distract them from schoolwork, cause long-term problem behaviors, and precipitate a precocious transition to adulthood? This report from a remarkable longitudinal study of 1,000 students, followed from the beginning of high school through their mid-twenties, answers, resoundingly, no. Examining a broad range of teenagers, Jeylan Mortimer concludes that high school students who work even as much as half-time are in fact better off in many ways than students who don't have jobs at all. Having part-time jobs can increase confidence and time management skills, promote vocational exploration, and enhance subsequent academic success. The wider social circle of adults they meet through their jobs can also buffer strains at home, and some of what young people learn on the job--not least responsibility and confidence--gives them an advantage in later work life.

**Girls Growing Up in Late Victorian and Edwardian England** Nov 30 2019 Girls learn about "femininity" from childhood onwards, first through their relationships in the family, and later from their teachers and peers. Using sources which vary from diaries to Inspector's reports, this book studies the socialization of middle- and working-class girls in late Victorian and early-Edwardian England. It traces the ways in which schooling at all social levels at this time tended to reinforce lessons in the sexual division of labour and patterns of authority between men and women, which girls had already learned at home. Considering the social anxieties that helped to shape the curriculum offered to working-class girls through the period 1870-1920, the book goes on to focus on the emergence of a social psychology of adolescent girlhood in the early-twentieth century and finally, examines the relationship between feminism and girls' education.

**No Fear** Aug 08 2020 'No Fear' argues that throughout the developed world childhood is being undermined by the growth of risk aversion. **Growing Up in an Urbanising World** Jan 01 2020 More than half of all children in industrialised countries live in urban areas, and the same will be true in the developing world in the near future. Yet, by almost all indicators, cities are failing to meet the needs of young people, prejudicing their chances as adults. Written by a team of experts from the fields of urban planning, architecture, geography, anthropology, psychology and environmental education, this book analyses the results of a UNESCO project which looks at the effects on young people of their urban surroundings, based on case studies from eight countries (including Australia, India, South Africa, the UK and the USA). This study places a new emphasis on the active participation of young people in the planning, design and implementation of urban improvements, and recommends policies and practices that will make cities more responsive to the needs of children, adolescents and their families.

*Growing up in the Playground* Jan 25 2022 First published in 1981, this work is based on the author's research in the playgrounds of two Oxford schools. It describes the order amongst the apparent chaos by relating the playtime activities – the games, rhymes and taunts of five-to-ten-year-olds in first and middle schools – to children's goals, problems and solutions. It shows how children learn and display in the playground a remarkably complex set of social skills and the study clearly demonstrates the importance of playtime for preparing a child to cope in the adult world.

It tells the story of two parents from different cultural, linguistic, and ethnic-racial backgrounds who joined to raise their two children with their heritage languages outside their native countries. It also tells the children's story and the way they negotiated three cultures and languages and developed a trilingual identity. It sheds light on how parental support contributed to the children's simultaneous acquisition of three languages in an environment where the main input of the two heritage languages came respectively from the father and from the mother. It addresses the challenges and the

unique language developmental characteristics of the two children during their trilingual acquisition process.

**Growing Up in Stepfamilies** Dec 12 2020 The growth of stepfamilies has been one of the most dramatic changes in British family life in recent decades. Britain today has the highest divorce rate in Europe, and by the early 1990s one in twelve children in Britain were already living in stepfamilies. Stepfamilies formed by remarriage after death were once a common experience, but in the first half of this century, as parental death became more unusual, they became unfamiliar rarities, and much of the common understanding of their dynamics was lost. The recent very rapid growth in divorce and remarriage has exposed millions of adults and children to life situations which are surprisingly little understood, either at the level of common wisdom, or through research.

*A Day of Pleasure* Sep 08 2020 An ALA Notable Book. A Day of Pleasure is the winner of the 1970 National Book Award for Children's Books.

**Growing Up In A War** Oct 02 2022 This utterly compelling memoir opens with a sceptical nine-year-old Bryan Magee being taught the facts of life. It goes on to tell the story of the Second World War as seen through a child's eyes. Growing Up in a War nostalgically evokes the atmosphere of wartime England, the community spirit of a society before television, where very few had cars or telephones. A kid from the East End, he won a scholarship to one of the country's ancient public schools. During the school holidays, he returned to London and the air raids, the doodlebugs and V2 rockets. With the war over, Bryan's school sent him to a Lycée in Versailles, and he explored the Paris of those post-war years. Then, back in England, he tumbled into his first love affair. The book comes to an end with his call-up into the army, and his unexpected posting to the School of Military Intelligence. Growing Up in a War is a stunning autobiography and account of Britain during an extraordinary period of history, by the winner of the J.R. Ackerley Prize for autobiography.
