The Automotive Industry and European Integration Oct 28 2022 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

[Atlas of Mammalian Chromosomes](#) Apr 22 2022 A stunning visual collection of the banded metaphase chromosome karyotypes from some 850 species of mammals, the Atlas of Mammalian Chromosomes represents an unabridged compendium of the state of this genomic art form. Bringing together information currently scattered throughout the cytogenetics literature for scores of published and unpublished species, this atlas features high-quality karyotype images for nearly every mammal studied to date, making it the most

comprehensive assemblage of high-resolution chromosome photographs available--a critically invaluable resource for today's comparative genomics era. For every available species, the Atlas of Mammalian Chromosomes presents the best karyotype produced, the common and Latin name of the species, the published citation, and the contributing authors. Most karyotypes are G-banded, revealing the chromosomal bar codes of homologous segments among related species. Addressing the mandate of the Human Genome Project to annotate the genomes of other organisms as well, the Atlas of Mammalian Chromosomes offers a step forward in our understanding of species formation, of genome organization, and of DNA script for natural selection. It is an invaluable resource for geneticists, mammalogists, and biologists interested in comparative genomics, systematics, and chromosome structure.

Strategic Culture and Italy's Military Behavior Jul 21 2019 This book analyzes the influence of Italy's strategic culture on its foreign policy. It conducts an exploratory case-study to show if hypotheses generated by the strategic culture approach can shed some light on the puzzling Italian behavior in the international arena, as Italy shows a less assertive foreign policy vis-à-vis other middle powers in the same rank.

Pesticides Oct 24 2019 Pesticides play an important role in controlling pests that carry diseases and threaten crop production. In recent years, however, there has been increased concern about the adverse impacts of pesticides and their degradation products on public health and the environment. A considerable amount of work is being done to develop nonchemical methods of pest control, but it is not yet feasible to dispense with the use of chemical pesticides. *Pesticides: Evaluation of Environmental Pollution* brings together, in a single volume, current knowledge on environmental pollution caused by pesticides. It helps readers evaluate the effects that pesticide residues have in all compartments of the environment. Featuring contributions by eminent scientists from around the world, the book gives an overview of the fate and transport of pesticides and their degradation in the environment. Detailing the sources, concentration, and hazards of residues, it examines their effects in humans, birds and mammals, fish, soil invertebrates, soil microflora, aquatic invertebrates, water, milk products, and more. The book also addresses endocrine-disrupting pesticides and explores biopesticides as alternatives to chemical pesticides. A review of data on the potential hazards of pesticides, this reference will be of interest to readers working in the areas of chemical crop protection and pollution management. It adds a balanced perspective to the debate between those who think that pesticides should be banned and those who consider the continued use of large quantities to be necessary for the survival of humanity. See also *Handbook of Pesticides: Methods of Pesticide Residues Analysis* (CRC Press, 2009).

South Asian Mammals Jun 12 2021 Until now, information on mammals in South Asia has never been brought together on a single platform providing all-inclusive knowledge on the subject. This book is the most up-to-date comprehensive resource on the mammalian diversity of South Asia. It offers information on the diversity, distribution and status of 504 species of terrestrial and aquatic mammals found in Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka. This work is unique being the first of its kind that deals with diversity and distribution at the subspecies level. The book is divided into three chapters. Chapter 1 introduces the subject and takes off from the recent works on mammals at the global level, provides an historical perspective on mammal studies in South Asia and concludes with a note on recent phylogenetic changes at supraordinal levels. Chapter 2 summarizes the information on the diversity of South Asian Mammals, provides analysis by country of mammalian diversity (supported by data in tabular form) dealing with species richness, endemism and possibly occurring species, separate analysis for each country with details on endemic and threatened species, extinct mammals, domestic mammals, and finally the IUCN status of mammals with special emphasis on threatened mammals. Chapter 3 is a comprehensive checklist that provides information on each species, including its scientific name, type details, standardized English name, synonyms, subspecies, distribution and comments on taxonomic status. Country-wise listings and analysis of species richness with emphasis on subspecies distribution Most of the analysis is supported by data in tabular forms for better understanding Notes on extinct and domesticated mammals as well as

Cognitive Dysfunction in Children with Temporal Lobe Epilepsy May 31 2020 Much has been written about the cognitive function of children with epilepsy but despite there being extensive study of the neuropsychological status of adults with intractable temporal lobe epilepsy, it has been more limited in children. Although cognitive development in children is influenced by similar factors to adults, the role of early damage, modification of cerebral organisation and interruption of the learning process are also likely to be important. Devoted to cognitive function and dysfunction in children with temporal lobe epilepsy, this book highlights those domains that demand further research and those for which immediate established techniques for a better global care can be undertaken.
