Swahili Jan 25 2022 Swahili Tales of Crowich Forest By: Vinod Nair Swahili is a mutant toad who lives in Crowich Forest. The forest is the site of a reactor used to create mutants by a crazy scientist. The government takes it over only to enforce its harsh rules on the mutants. Swahili grows up to be a crime investigator and goes around looking for his missing friend, Achillus, who is out to investigate drug rings around the world. Swahili discovers these rings around the world and puts an end to them. He also fights a crime lord Vulpecula, who is a mutant vulture and operates from Dumbo in New York City. The county is rife with misdemeanors committed by county officials and police personnel. Swahili eventually vanquishes Vulpecula and the government leaves Crowich. A new government sets in. The story revolves around the apathy of the county government leading to widespread misdemeanors and oppression by county administrative and police officials. The book is a tale of oppression, heroism and victory.

Lemon-Aid New Cars and Trucks 2012 Jan 13 2021 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

The 2005 DARPA Grand Challenge Jul 27 2019 The DARPA Grand Challenge was a landmark in the field of robotics: a race by autonomous vehicles through 132 miles of rough Nevada terrain. It showcased exciting and unprecedented capabilities in robotic perception, navigation, and control. The event took place in October 2005 and drew teams of competitors from academia and industry, as well as many garage hobbyists. This book presents fifteen technical papers that describe each team's driverless vehicle, race strategy, and insights. As a whole, they present the state of the art in autonomous vehicle technology and offer a glimpse of future technology for tomorrow's driverless cars.

Steeple Jun 17 2021 Take a journey of faith with Paul Atkinson, a self-sworn loner, former covert operative for the Pentagon and Army Ranger. Wanting to live out a life of solitude, Paul moves to beautiful northern Georgia near the town of Dahlonega with a desire to leave his past behind and to live quietly in the rural mountain area he had chosen while in the army. However, with the coaxing of a Christian family, a caring community and a beautiful woman, Paul begins to find faith and love. But, will he hold onto it all? Tragedy strikes when Paul learns of his brother's suicide in a jail cell in Dallas, Texas. His newfound faith in God is crushed, his desire for love and family fades, and Paul turns his back on all. In the midst of the turmoil, Paul is lured back into his covert unit and into a political firestorm that could cost him his life, the life of a controversial foreign leader and the life of the American President. Will Paul survive and find hope again?

Lemon-Aid New Cars and Trucks 2011 Dec 12 2020 As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck

books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

What Is a Western? Mar 15 2021 There's "western," and then there's "Western"—and where history becomes myth is an evocative question, one of several questions posed by Josh Garrett-Davis in *What Is a Western? Region, Genre, Imagination*. Part cultural criticism, part history, and wholly entertaining, this series of essays on specific films, books, music, and other cultural texts brings a fresh perspective to long-studied topics. Under Garrett-Davis's careful observation, cultural objects such as films and literature, art and artifacts, and icons and oddities occupy the terrain of where the West as region meets the Western genre. One crucial through line in the collection is the relationship of regional "western" works to genre "Western" works, and the ways those two categories cannot be cleanly distinguished—most work about the West is tinted by the Western genre, and Westerns depend on the region for their status and power. Garrett-Davis also seeks to answer the question "What is a Western now?" To do so, he brings the Western into dialogue with other frameworks of the "imagined West" such as Indigenous perspectives, the borderlands, and environmental thinking. The book's mosaic of subject matter includes new perspectives on the classic musical film *Oklahoma!*, a consideration of Native activism at Standing Rock, and surprises like Pee-wee's *Big Adventure* and Dr. Seuss's *The Lorax*. The book is influenced by the borderlands theory of Gloria Anzaldúa and the work of the indie rock band Calexico, as well as the author's own discipline of western cultural history. Richly illustrated, primarily from the collection of the Autry Museum of the American West, Josh Garrett-Davis's work is as visually interesting as it is enlightening, asking readers to consider the American West in new ways.

Automobile Industry Aug 27 2019 Like it or not, the automobile industry is now and will remain an overwhelming factor in the lives of most people - if not an owner and driver, then as a pedestrian or a breather of air, which is being polluted by the gas-guzzling and vile-air belching monsters created for our individual hedonistic pleasure. This book presents issues of current interest to those who cannot ignore their presence.

Lemon-Aid New Cars and Trucks 2013 Sep 28 2019 Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

Hummer H3 Sep 08 2020 The all-new Hummer H3 will reach market in early 2005, just as this book chronicling its development is published. The H3 will offer traditional Hummer off-road durability and stump-pulling power in a smaller, more-affordable SUV-styled package. Interest in the new model is very high and the automotive website "edmunds.com" reported, ". . . the smaller and cheaper H3 is likely to become the most popular Hummer ever."

The Consumer Response to Gasoline Price Changes Nov 30 2019 When gasoline prices rise, people notice: the news is filled with reports of pinched household budgets and politicians feeling pressure to do something to ameliorate the burden. Yet, raising the gasoline tax to internalize externalities is widely considered by economists to be among the most economic efficiency-improving policies we could implement in the transportation sector. This dissertation brings new evidence to bear on quantifying the responsiveness to changing gasoline prices, both on the intensive margin (i.e., how much to drive) and the extensive margin (i.e., what vehicles to buy). I assemble a unique and extremely rich vehicle-level dataset that includes all new vehicle registrations in California 2001 to 2009, and all of the mandatory smog check program odometer readings for 2002 to 2009. The full dataset exceeds 49 million observations. Using this dataset, I quantify the responsiveness to gasoline price changes on both margins, as well as the heterogeneity in the responsiveness. I develop a novel structural model of vehicle choice and subsequent utilization, where consumer decisions are modeled in a dynamic setting that explicitly accounts for selection on unobserved driving preference at both the time of purchase and the time of driving. This utility-consistent model allows for the analysis of the welfare implications to consumers and government of a variety of different policies, including gasoline taxes and feebates. I find that consumers are responsive to changing gasoline prices in both vehicle choice and driving decisions, with more responsiveness than in many recent studies in the literature. I estimate a medium-run (i.e., roughly two-year) elasticity of fuel economy with respect to the price of gasoline for new vehicles around 0.1 for California, a response that varies by whether the vehicle manufacturer faces a tightly binding fuel economy standard. I estimate a medium-run elasticity of driving with respect to the price of gasoline around -0.15 for new personal vehicles in the first six years. Older vehicles are driven much less, but tend to be more responsive, with an elasticity of roughly -0.3. I find that the

vehicle-level responsiveness in driving to gasoline price changes varies by vehicle class, income, geographic, and demographic groups. I also find that not including controls for economic conditions and not accounting for selection into different types of new vehicles based on unobserved driving preference tend to bias the elasticity of driving away from zero -- implying a greater responsiveness than the true responsiveness. This is an important methodological point, for much of the literature estimating similar elasticities ignores these two issues. These results have significant policy implications for policies to reduce gasoline consumption and greenhouse gas emissions from transportation. The relatively inelastic estimated responsiveness on both margins suggests that a gasoline tax policy may not lead to dramatic reductions in carbon dioxide emissions, but is a relatively non-distortionary policy instrument to raise revenue. When the externalities of driving are considered, an increased gasoline tax may not only be relatively non-distortionary, but even economic efficiency-improving. However, I find that the welfare changes from an increased gasoline tax vary significantly across counties in California, an important consideration for the political feasibility of the policy. Finally, I find suggestive evidence that the "rebound effect" of a policy that works only on the extensive margin, such as a feebate or CAFE standards, may be closer to zero than the elasticity of driving with respect to the price of gasoline. This suggestive finding is particularly important for the analysis of the welfare effects of any policy that focuses entirely on the extensive margin.

Proceedings of the 10th World Congress on Engineering Asset Management (WCEAM 2015) Oct 29 2019 This book comprises refereed papers from the 10th World Congress on Engineering Asset Management (WCEAM 2015), held in Tampere, Finland in September 2015. These proceedings include a compilation of state-of-the-art papers covering a comprehensive range of subjects equally relevant to business managers and engineering professionals alike. With a focus on various aspects of engineering asset management ranging from strategic level issues to detail-level machine health issues, these papers address both industry and public sector concerns and issues, as well as advanced academic research. Proceedings of the WCEAM 2015 is an excellent reference and resource for asset management practitioners, researchers and academics, as well as undergraduate and postgraduate students at tertiary institutions or in the industry.
