Chrysler TorqueFlite A-904 & A-727 Apr 27 2022 The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application, A-904s were still found in the Jeep lineup! TorqueFlites are known for their dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications, post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you through the TorqueFlite rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. This book will keep money in your pocket and add experience to your résumé, but more important, it will help you get your Mopar back on the road! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

Health and Medicine in the circum-Caribbean, 1800-1968 Jan 25 2022 Health and medicine in colonial environments is one of the newest areas in the history of medicine, but one in which the Caribbean is conspicuously absent. Yet the complex and fascinating history of the Caribbean, borne of the ways European colonialism combined with slavery, indentureship, migrant labour and plantation agriculture, led to the emergence of new social and cultural forms which are especially evident the area of health and medicine. The history of medical care in the Caribbean is also a history of the transfer of cultural practices from Africa and Asia, the process of creolization in the African and Asian diasporas, the perseverance of indigenous and popular medicine, and the emergence of distinct forms of western medical professionalism, science, and practice. This collection, which covers the French, Hispanic, Dutch, and British Caribbean, explores the cultural and social domains of medical experience and considers the dynamics and tensions of power. The chapters emphasize contestations over forms of medicalization and the controls of public health and address the politics of professionalization, not simply as an expression of colonial power but also of the power of a local elite against colonial or neo-colonial control. They pay particular attention to the significance of race and gender, focusing on such topics as conflicts over medical professionalization, control of women ' s bodies and childbirth, and competition between ' European ' and ' Indigenous ' healers and healing practices. Employing a broad range of subjects and methodological approaches, this collection constitutes the first edited volume on the history of health and medicine in the circum-Caribbean region and is therefore required reading for anyone interested in the history of colonial and post-colonial medicine.

Short Stories Jun 29 2022 Literature is the biographical window to the human experience. It has no geographical, political, cultural, or religious boundaries. Nothing can stop it from penetrating the most intimate crevices of life--no matter how insignificant. Literature allows the reader to listen in (eavesdrop) to the gossip of life: the frustrations, hopes and dreams, triumphs and defeats of the characters who attempt to uncover the meaning of the tragic sense of life.

Routes of Compromise Oct 02 2022 In Routes of Compromise Michael K. Bess studies the social, economic, and political implications of road building and state formation in Mexico through a comparative analysis of Nuevo Leon and Veracruz from the 1920s to the 1950s. He examines how both foreign and domestic actors, working at local, national, and transnational levels, helped determine how Mexico would build and finance its roadways. While Veracruz offered a radical model for regional construction that empowered agrarian communities, national consensus would solidify around policies championed by Nuevo Leon's political and commercial elites. Bess shows that no single political figure or central agency dominated the process of determining Mexico's road-building policies. Instead, provincial road-building efforts highlight the contingent nature of power and state formation in midcentury Mexico.
