Space Strategy in the 21st Century Sep 23 2019 This book offers an overview of space

strategy in the 21st century. The purpose of space strategy is to coordinate, integrate, and prioritize space activities across security, commercial, and civil sectors. Without strategy, space activities continue to provide value, but it becomes difficult to identify and execute long-term programs and projects and to optimize the use of space for security, economic, civil, and environmental ends. Strategy is essential for all these ends since dependence on, and use of, space is accelerating globally and space is integrated in the fabric of activities across all sectors and uses. This volume identifies a number of areas of concern pertinent to the development of national space strategy, including: intellectual foundations; political challenges; international cooperation and space governance; space assurance and political, organizational, and management aspects specific to security space strategy. The contributing authors expand their focus beyond that of the United States, and explore and analyse the international developments and implications of national space strategies of Russia, China, Europe, Japan, India, Israel, and Brazil. This book will be of much interest to students of space power and politics, strategic studies, foreign policy and International Relations in general.

Marketing Channel Strategy Oct 17 2021
Marketing Channel Strategy: An Omni-Channel Approach is the first book on the market to offer a completely unique, updated approach to channel marketing. Palmatier and Sivadas have

adapted this classic text for the modern marketing reality by building a model that shows students how to engage customers across multiple marketing channels simultaneously and seamlessly. The omni-channel is different from the multi-channel. It recognizes not only that customers access goods and services in multiple ways, but also that they are likely doing this at the same time; comparing prices on multiple websites, and seamlessly switching between mobile and desktop devices. With the strong theoretical foundation that users have come to expect, the book also offers lots of practical exercises and applications to help students understand how to design and implement omni-channel strategies in reality. Advanced undergraduate and graduate students in marketing channels, distribution channels, B2B marketing, and retailing classes will enjoy acquiring the most cutting-edge marketing skills from this book. A full set of PowerPoint slides accompany this new edition, to support instructors.

Ferry and Brandon's Cost Planning of Buildings

Nov 25 2019 This new edition of the classic quantity surveying textbook retains its basic structure but has been thoroughly updated to reflect recent changes in the industry, especially in procurement. Although over the last 20 years a number of new procurement methods have evolved and become adopted, the recession has seen many clients revert to established traditional methods of procurement so the fundamentals of cost planning still apply - and should not be ignored. The first edition of this leading textbook was published in 1964 and it continues to provide a comprehensive introduction to the practice and procedures of cost planning in the procurement of buildings. This 9th edition has been thoroughly updated to reflect changes that have occurred in the UK construction industry in the past six years.

Whilst retaining its core structure of the three-phase cost planning process originally developed by Ferry and Brandon, the text provides a thorough grounding in contemporary issues including procurement innovation, whole life cycle costing and modelling techniques. Designed to support the core cost planning studies covered by students reading for degrees in quantity surveying and construction management, it provides a platform for understanding the fundamental importance of effective cost planning practice. The principals of elemental cost planning are covered from both pre- and post- contract perspectives; the role of effective briefing and client/stakeholder engagement as best practice is also reinforced in this text. This new edition: Addresses The Soft Landings Framework (a new govt. initiative, especially for schools) to make buildings perform radically better and much more sustainably. Puts focus on actual performance in use at brief stage, during design and construction, and especially before and after handover. Covers recent changes in procurement, especially under the NEC and PFI Provides more on PPP and long-term maintenance issues Offers an improved companion website with tutorial worksheets for lecturers and Interactive spreadsheets for students, e.g. development appraisal models; lifecycle costing models
