[User Guides, Manuals, and Technical Writing](#) [May 05 2021](#) This book is intended for anyone whose job involves writing formal documentation. It is aimed at non-native speakers of English, but also be of use for native speakers who have no training in technical writing. Technical writing is a skill that you can learn and this book outlines some simple ideas for writing clear documents that will reflect well on your company, its image and its brand. The book has four parts: Structure and Content: Through examples, you will learn best practices in writing the various sections of what content to include. Clear Unambiguous English: You will learn how to write short clear sentences and paragraphs whose meaning will be immediately clear to the reader. Layout and Information: Here you will find guidelines on style issues, e.g., headings, bullets, punctuation and capitalization. Typical Grammar and Vocabulary Mistakes: This section is divided alphabetically and covers grammatical and vocabulary issues that are typical of user manuals.

[Word-Formation across Languages](#) [August 20 2019](#) Research into cross-linguistic aspects and typology of word-formation has not been paid relevant and systematic attention by morphologists and few articles dealing with various word-formation issues of this kind appear in journals. The chapters in this volume address this issue by discussing, on contrastive principles, important questions of word-formation in a sample of 26 languages. The focus of the book, as a whole, is on typological features of word-formation in the languages sampled. It is aimed at researchers that have an interest in word-formation in a variety of languages.

[PREFACE](#) By enrolling in this self-study course, you have demonstrated a desire to improve yourself and the Navy. Remember, however, this self-study course is only one part of the total training program. Practical experience, schools, selected reading, and your desire to succeed are also necessary to successfully round out a fully meaningful training program. [COURSE OVERVIEW:](#) In completing this nonresident training course, you will demonstrate a knowledge of the subject matter by correctly answering questions on the following: History and Organization of the Service of War; Special Clothing and Equipment; Service Rifle and Pistol Marksmanship; Combat Maneuvers, Formations, Patrols, and Ambushes; Land Navigation; Evasion, Survival, and Escape; Individual Protective Measures; Entanglements; Chemical, Biological, and Radiological (CBR) Defense; First Aid and Field Sanitation; Grenades, Land Mines, and Booby Traps; Organic Support Weapons; and Machine Guns; and Organic Support Weapons: 60-mm Mortar and AT4. [THE COURSE:](#) This self-study course is organized into subject matter areas, each containing learning objectives to determine what you should learn along with text and illustrations to help you understand the information. The subject matter reflects day-to-day requirements and experiences of personnel in your skill area. It also reflects guidance provided by Enlisted Community Managers (ECMs) and other senior personnel, technical references, instructions, etc., and either the occupational or Navy-wide advancement in rate examination. If you are studying and discover a reference in the text to another publication for further information, look it up. [CONTENTS - Volume 1:](#) CHAPTER 1. [Ordered Chaos](#) [October 22 2019](#) This work presents a model for novel compound interpretation using Cognitive Grammar and schema theory. The model, based on analysis of established compound responses to novel compounds, claims that speakers try using real-world schemas attached to both element nouns to construct a relationship between them by matching already established schemas. If this is impossible, speakers often "metaphorize" the head noun.

**A Practical Guide to Costume Mounting** 2019 The effective preparation of garments for display is essential for exhibitions of contemporary and historical dress. Costumes not only need to be visually appealing but also fully supported and historically accurate. This book provides a comprehensive guide to mounting costumes from the eighteenth century to the present day. It includes instructions for adapting and shaping figures to create historical silhouettes, constructing underpinnings and making replicas and toiles using inexpensive and simple techniques. A Practical Guide to Costume Mounting is an invaluable resource for conservators, historians and all those working with clothing in museums, private collections and throughout the fashion and theatre industries. Trailblazing historical costume maker, author Lara Flecker is the textile display specialist at London's Victoria and Albert Museum. She has worked extensively with the museum's world-class costume department preparing garments for display. Her simple mounting methods are clearly explained and can be used by people with a wide range of experience, including those with few sewing skills.
