[Understanding Pulsars and Space Navigations](#) Jun 28 2022 This book systematically presents the concept, history, implementation, theory system and basic methods of pulsar and space flight, illustrating the characteristics of pulsars. It also describes the classification of spacecraft navigation systems and the autonomous navigation technologies, as well as X-ray pulsar-based navigation systems (XPNAV) and discusses future navigation satellite systems in detail.

[THE BROCKEN EGG OF LEGACY](#) Dec 11 2020 The Brocken Egg of Legacy is the story of Raghav Sharma, a young eighteen-year-old boy from a well-to-do barrister family. His father is a high court judge, and his grandfather is a retired barrister of the Supreme Court. On his mother's side, his cousin is a serving MLA and his uncle is an influential man. Raghav despises his family legacy, his traditions and customs. He decides to leave behind politics and law and choose a different path for himself. He wants to pursue Automotive engineering, but is forced to pursue an additional law degree to keep up with the family legacy. He despises his family name and wishes to achieve something good in his life through his own efforts. Raghav realizes his true potential once he reaches college. He meets Om, Rajveer, Millind, and Aashutosh, all from different backgrounds, who become his friends for life. He leads his team to victory in the college council elections and discovers that he has amazing leadership qualities. He visits Om's remote tribal village and deftly solves the grass root level problems. This experience makes him grow as a person. In college, Raghav meets the love of his life Aarushi, the most precious and

beautiful thing in his life. Aarushi is a senior at his college and the most beautiful girl in college. They both fall in love at first sight, but she comes from a typical marvadi joint family. Her family forbids her from marrying a boy from another caste. As the two love birds struggle to convince her parents, they realize the true meaning of love is setting the other person free, even if means to give up on one's own happiness. The schism that arises compels Raghav to rediscover the meaning of life as he tries to find his way in life. He visits his ancestral home, where he discovers that the thing that he despised all his life, his legacy, is a result of great sacrifices made by his forefathers. He finally feels at peace with his roots and accepts and embraces his identity.

Unconditional You Sep 07 2020 This book is based on factual strategies that exist in each of us! It doesn't matter if you are studious or not, whether you are a hard worker or not, whether you are highly qualified or not or if you are ordinary or extraordinary! And if you'll work them, they will always deliver the best result that will surely surprise you. This book states forty-six strategies that will make you a worthwhile person, by transforming your limiting conditional vision to ultimate unconditional vision. These strategies will make you rich in every aspect of life—in relationship, career, health and fitness. Remember, there's always a perfect way to perform any task, and those perfect ways are called strategies and principles. If you follow these strategies you'll get more than what you ever expected! So, get ready to meet the smartest, highest, and the best version of yourself!

STUCK! Mar 02 2020 Imagine being Stuck: Stuck in anything, be it a situation, a thought, a feeling, or even a relationship. For Aditya Thakur, life threw curveball after curveball. First came Deepti Gaekwad, oblivious to the love Aditya had for her. Then came Lavanya Gaekwad, who messed with Aditya simply with her name. And then, Muskaan: who, just like her name, put a smile on Aditya's face. Between these three Aditya's journey grows into a funny kind of a limbo - A journey in which he is insanely Stuck!

India Today International Dec 23 2021

Physics of the Pulsar Magnetosphere Apr 14 2021 This book presents the theory of the electrodynamic phenomena that occur in the magnetosphere of a pulsar. It also provides a clear picture of the formation and evolution of neutron stars. The authors address the basic physical processes of electron-positron plasma production, the generation of electric fields and currents, and the emission of radio waves and gamma rays. The book also reviews the current observational data, and devotes a complete chapter to a detailed comparison of this data with accepted theory and with some recent theoretical predictions. Tables containing the values of the physical parameters of all observed radio pulsars are also provided.

Motoring World Sep 19 2021 This magazines is a specialist motoring magazine, we have always catered to the enthusiast in you and brought an unadulterated view of the world of motoring. Sharp, sassy, clean, wittier and edgier than ever before. Drive it home today!

Indian Business Case Studies Volume IV Mar 26 2022 It has been decades since many business schools outside India adopted the case study methodology for teaching almost all branches of management studies. This trend has been seen in India, too, where top management institutes have implemented the case study-based methodology as an important pedagogical tool in business education. The major issue in India, however, is a severe shortage of Indian case studies through which business schools can provide industry insights to students. This volume fills that gap. It has twenty Indian cases related to different aspects of business management. The cases cover some of the prominent disciplines of management like marketing, finance, human resource management, strategy management, operations management, accounting, and mergers and acquisitions. These cases best serve the purpose of adoption of 'case methodology' in classroom teaching or online lecture sessions for the faculty and students of business management.

Proceedings of the Ninth Asia-Pacific International Conference on Gravitation and Astrophysics Aug 26 2019 The International Conference on Gravitation and Astrophysics (ICGA) is to serve the needs of research workers in gravitation and astrophysics in the Asia-Pacific region. This proceedings covers a wide and hot area of research, including cosmological model, gravitational lensing, precision measurement of G, CMB, Kerr space-time, gravitational wave, the LISA, LIGO, LCGT projects in Japan, black hole, dark matter, Yang-Mills gravity, neutron star, type Ia supernovae, quasi-local energy, anti-de Sitter space-time.

Neutron Stars and Their Birth Events Oct 28 2019 This volume is the documentation of the second Course on 'Neutron Stars, Active Galactic Nuclei and Jets', held at Erice in September 1988. This second Course was devoted to our knowledge about neutron-star sources. The poster spoke of: pulsars, accreting X-ray sources and jet engines, perhaps also UHE pulsars, X-ray bursters and black-hole candidates. Neutron stars have even been proposed as the primary cosmic-ray boosters. Most of their properties are still controversial, such as their birth mechanism (neutrino versus magnetic piston), internal structure (neutrons, quarks, strange particles), magnetic, thermal and spin histories, wind generation (hydrogen versus pair plasma, radiation versus centrifugal pressure), magnetospheric structure and accretion modes (along field lines versus quasi-Keplerian). The listed controversies have largely survived through the Course and entered into the proceedings. Several lecturers speak of 'magnetic-field decay' in neutron stars, of the 'recycling' of old pulsars, and of 'accretion-induced collapse' of white dwarfs as though such processes were textbook knowledge. Terms and abbreviations like RPSR (=recycled pulsar), spinup line, AIC, and ADC (=accretion disk corona) help to foster the assumptions. It is not clear to me at this time whether any of these notions has an application to reality.

RUGGED NIGHTS Feb 10 2021 Aalon is secretive of his flit from home, wandering on the unsmooth roads of Madurai on that rainy night. Headed somewhere on an unplanned journey... Although innocent, Aalon isn't a saint to feel sad for the death of the man whom he hates. Why has he left his family? What experiences does he acquire in his strange, lone excursion? Above all, why is he in that street... lurking at the scene of the murder? Peter is dead. Rudhran handles the Peter murder case

with his usual diligence, and style - a chilled attitude & intuitive approach. The only CID inspector in town, holding a repute of resolving homicide cases in an incredible pace. Tiny clues can hardly hide from his vision. Now he is steely on catching this culprit in the dark. Teaming up with him is Marvin, a restless narc, as drugs are involved. Together they investigate, trail clues, and engage in thrilling pursuits. Chasing criminals & suspects to achieve their own grails. Several unexpected episodes happen during these Rugged Nights. However, the killer is still at large. At a high point, even the ever-cool copper gets exhausted, impatient, and ...lost. For Rudhran, the case is delaying and he still has not the faintest idea of who murdered Peter. How will he revive and run to the unearthing of many dreadful truths? What will lead Rudhran close to the killer soon? What will Rudhran do, once he finds 'him'? Antony, the smart gangster and drug lord, is the most wanted criminal, hunted by the narcs. He tries to quit being the baddie and change for good, but it won't be any quicker or easier. Neither will it be for Marvin's squad to catch him. Antony knew Peter. Murthi and Pandi knew him too. How are they all connected? Is any of them involved anyway in Peter's murder? Will Antony succeed in starting his life anew? IT IS MORE THAN JUST A MURDER MYSTERY.....

Consumer Behaviour And Branding: Concepts, Readings And Cases-The Indian Context Jun 16 2021 India is one of the emerging markets that pose a unique set of challenges to marketers. The importance of the context and the usefulness of concepts in the Indian context is the core proposition of the book. The diversity of a mix of factors such as cultural aspects, lifestyles, demographics and unbranded offerings make consumer behaviour a fascinating study. This book focuses on the behavioural principles of marketing and its application to branding in the Indian context. * Consumer behaviour concepts associated with branding * A combination of recent and traditional examples reflecting the application of behavioural concepts * Touch of reality boxes to indicate context-based examples * Caselets and cases drawn from real-life situations * Research findings associated with the Indian context * Topical issues in consumer behaviour like cultural aspects, digital marketing and experiential branding

Oscillations and Waves Oct 09 2020 Bridging lower-division physics survey courses with upper-division physics courses, Oscillations and Waves: An Introduction develops a unified mathematical theory of oscillations and waves in physical systems. Emphasizing physics over mathematics, the author includes many examples from discrete mechanical, optical, and quantum mechanical systems; continuous gases, fluids, and elastic solids; electronic circuits; and electromagnetic waves. Assuming familiarity with the laws of physics and college-level mathematics, the book focuses on oscillations and waves whose governing differential equations are linear. The author covers aspects of optics that crucially depend on the wave-like nature of light, such as wave optics. He also introduces the conventional complex representation of oscillations and waves later in the text during the discussion of quantum mechanical waves. This helps students thoroughly understand how to represent oscillations and waves in terms of regular trigonometric functions before using the more convenient, but much more abstract, complex representation. Based on the author's longstanding course at the University of Texas at Austin, this classroom-tested text helps students acquire

a sound physical understanding of wave phenomena. It eases students' difficult transition between lower-division courses that mostly encompass algebraic equations and upper-division courses that rely on differential equations.

Automobile Industry in India Feb 22 2022 This book is aimed to bring out the understanding of brand positioning of two wheelers in the minds of customers i.e., whether the customers have brand awareness, brand image, brand identity, brand knowledge about two wheelers which lead them to satisfaction. In turn, their brand preferences towards specific two wheelers among popular brands such as Hero, Honda, TVS, Suzuki, Bajaj and Yamaha were associated with brand positioning.

Brand Management Jul 06 2020 Brands are wealth generators of the 21st century. With this in mind 'Brand Management' focuses on the key decision areas of competition and brand, concept of brand, brand equity, brand over time and branding strategies. The theoretical constructs are illustrated using case studies.

X-ray Pulsar-based Navigation Nov 02 2022 This book discusses autonomous spacecraft navigation based on X-ray pulsars, analyzing how to process X-ray pulsar signals, how to simulate them, and how to estimate the pulse's time of arrival based on epoch folding. In turn, the book presents a range of X-ray pulsar-based spacecraft positioning/time-keeping/attitude determination methods. It also describes the error transmission mechanism of the X-ray pulsar-based navigation system and its corresponding compensation methods. Further, the book introduces readers to navigation based on multiple measurement information fusion, such as X-ray pulsar/traditional celestial body integrated navigation and X-ray pulsar/INS integrated navigation. As such, it offers readers extensive information on both the theory and applications of X-ray pulsar-based navigation, and reflects the latest developments in China and abroad.

Motoring world Jul 30 2022 This magazines is a specialist motoring magazine, we have always catered to the enthusiast in you and brought an unadulterated view of the world of motoring. Sharp, sassy, clean, wittier and edgier than ever before. Drive it home today!

The Taken Girls Mar 14 2021 Are you Or Were you from a 'CO-ED' school? Yes? Lucky you! Because, Sanidhya wasn't and many like him who aren't, face a real challenge to find their 'cosmic connect' which leads to 'cosmic chaos' when they search for their ideal one.

EUREKA! Jan 24 2022 This is an accessible introduction to the subject of physics, and how it underpins our understanding of the physical world today. Starting with an initial description of what physics represents from the micro- to the macroscopic, Roger Blin-Stoyle takes the reader on a tour of Newton's Laws, the nature of matter, explaining how the physical world works and how physics may affect our future understanding. The treatment avoids detailed mathematics, and at all times relates the concepts introduced to the reader's everyday experience. The author makes effective use of simple, line drawings to illustrate the concepts introduced. Topics are presented with clarity and precision. The author's enthusiasm for his subject, and his desire to make it comprehensible to the widest

possible audience are evident. It is a good foundation for exploring the more exotic aspects of physics, as presented by, for example, Close, Davies and Hawking. Suggestions for further reading are included as an appendix.

Development of the Burst and Transient Source Experiment (BATSE) May 04 2020
Consumer Behaviour-2nd Aug 07 2020 We are all consumers living in a society. The most important concern for marketers is to influence consumer behaviour in a desired manner. This book attempts to answer the big question, "Why do people behave the way they do as consumers of all sorts of goods and services?" This focus of this book is to acquaint management students with a managerial understanding and insight of our behaviour as consumers. Students, who aspire to become marketing managers, brand managers, sales managers, or want to take up a career in advertising etc., need to acquire the knowledge and skills which would be critically useful to them in these careers. The text is comprehensive with relatively recent research inputs from scholars describing various behavioural concepts and theories that are believed to be fundamentally useful for developing an understanding of consumer behaviour. Wherever possible, to clarify the concepts, it has been endeavoured to use Indian examples to make it more relevant to Indian conditions and easier for students to understand. In this new edition, all the topics have been revised, and some moderately updated, with more recent or relevant material on the subject to make the text richer and more useful. Overall, the book would be quite useful and will meet the requirements of students pursuing management studies and specializing in marketing.

Innovative Product Design and Intelligent Manufacturing Systems May 28 2022
This book gathers selected research articles from the International Conference on Innovative Product Design and Intelligent Manufacturing System (ICIPDIMS 2019), held at the National Institute of Technology, Rourkela, India. The book discusses latest methods and advanced tools from different areas of design and manufacturing technology. The main topics covered include design methodologies, industry 4.0, smart manufacturing, and advances in robotics among others. The contents of this book are useful for academics as well as professionals working in industrial design, mechatronics, robotics, and automation.

Stellar Astrophysics Sep 27 2019 The Pacific Rim Conference originally started with one research concentration only - binary star research. The first Conference was held in Beijing, China, 1985, the second one in Seoul and Taejon, South Korea, 1990 and the third one in Chiang Mai, Thailand, 1995. In recent years, the conference series evolved into a much broader area of stellar astrophysics. The first such conference was held in Hong Kong in 1997. Kwong-Sang Cheng, a. k. a. one of the three Musketeers, documented the "accidental" development in writing in the Proceedings of the 1997 Pacific Rim Conference on Stellar Astrophysics (Volume 138 of the ASP Conference Series)! The meeting at Hong Kong University of Science and Technology covered three major topics: binary stars, compact stars and solar type stars. The conference was extremely successful. There was a general feeling among the participants that the conference on stellar astrophysics provided a good means to share ideas between such closely related disciplines. Unfortunately after the very successful meeting at HKST, Kwing L. Chan (another

Musketeer) thought that he had already served and would not like to chair for another LOC for at least five years! After a few drinks at one of the watering holes in Wan Chai district of Hong Kong, Kwong-Sang Cheng was in very hiRh spirit and volunteered to taking on the responsibility of hosting the 51 Pacific Rim Conference at Hong Kong University in 1999.

Motoring World May 16 2021 This magazines is a specialist motoring magazine, we have always catered to the enthusiast in you and brought an unadulterated view of the world of motoring. Sharp, sassy, clean, wittier and edgier than ever before. Drive it home today!

NIFTY BANK NIFTY ASTRO PREDICTION 2021 Apr 26 2022 There are many dimensions to know the future of the stock market. The best dimension among them is astrology because astrology gives guidance of both time and direction, which can be very important in the stock market. It's time to know the future in the stock market. And astrology itself is invaluable for the stock market because of the knowledge of direction found through astrology. In the year 2020, the stock market was broken due to COVID-19. There was no understanding of what would happen, but it was known at that time by astrology that this time in the stock market was the best opportunity to invest. Timely investment yields around 400% times profit by year-end. Nifty-Bank Nifty Astro Prediction 2021 has been composed to answer some of these questions. How will the composition of Yoga coincidence and the position of the planets in 2021 affect the stock market and what will be the results?

Cosmic Magnetic Fields (IAU S259) Jun 04 2020 IAU Symposium 259 presents the first interdisciplinary, comprehensive review of the role of cosmic magnetic fields, involving astronomers and physicists from across the community. Offering both theoretical and observational topics ranging from Earth's habitability to the origin of the universe, this is an invaluable summary for researchers and graduate students.

Motoring World 2018 Jul 18 2021 This magazines is a specialist motoring magazine, we have always catered to the enthusiast in you and brought an unadulterated view of the world of motoring. Sharp, sassy, clean, wittier and edgier than ever before. Drive it home today!

The British Journal of Photography Nov 29 2019

Introduction to Stellar Astrophysics: Volume 1, Basic Stellar Observations and Data Jan 12 2021 This textbook introduction to the basic elements of fundamental astronomy and astrophysics serves as a foundation for understanding the structure, evolution, and observed properties of stars. The first half of the book explains how stellar motions, distances, luminosities, colors, radii, masses and temperatures are measured or derived. The author then shows how data of these sorts can be arranged to classify stars through their spectra. Stellar rotation and stellar magnetic fields are introduced. Stars with peculiar spectra and pulsating stars also merit special attention. The endpoints of stellar evolutions are briefly described. There is a separate chapter on the Sun and a final one on interstellar absorption. The usefulness of this text is enhanced by the inclusion of problems for students, tables of astronomical constants, and a selective bibliography. This is an excellent textbook for undergraduate and beginning graduate students studying

astronomy and astrophysics.

Strategic Management Nov 21 2021 Designed to facilitate understanding and retention of the material presented, each chapter contains the following pedagogical features:

- Opening Case: Each chapter begins with an opening case highlighting strategies and actions followed by Indian companies while trying to exploit the opportunities present in a competitive environment.
- Real World Examples: Each chapter contains a number of real- world examples illustrating how a particular firm has exploited the gaps present in the environment, using its own resources to best advantage.
- Terminology: Key ideas and terms that are vital to understanding strategic management have been highlighted throughout the book and explained at the end in a summarised form.
- References: Each chapter is also supported by carefully selected references for the benefit of readers who might be interested in exploring the topic(s) further.
- Personality Profiles: Personality sketches of leading corporate heroes have also been provided at appropriate places, illustrating the manner in which they fought against heavy odds and emerged as winners in the end.
- Review and Discussion Questions : Following the terminology, review and discussion questions offer an opportunity to focus on each of the key ideas illustrated at the beginning of each chapter and stimulate clear thinking.
- Research Inputs: The book provides a comprehensive coverage of a vast, growing subject well-supported by a wealth of research data collected from multifarious sources.
- Concluding Case: Each chapter contains a thoroughly researched and widely-acclaimed case, picked up from Business Today, relevant to the topic in question.
- Student Oriented Text: The subject matter has been presented in a simple and lucid manner, keeping the unique requirements of students in mind.

Black Hole Astrophysics Aug 31 2022 As a result of significant research over the past 20 years, black holes are now linked to some of the most spectacular and exciting phenomena in the Universe, ranging in size from those that have the same mass as stars to the super-massive objects that lie at the heart of most galaxies, including our own Milky Way. This book first introduces the properties of simple isolated holes, then adds in complications like rotation, accretion, radiation, and magnetic fields, finally arriving at a basic understanding of how these immense engines work. Black Hole Astrophysics □ reviews our current knowledge of cosmic black holes and how they generate the most powerful observed phenomena in the Universe; □ highlights the latest, most up-to-date theories and discoveries in this very active area of astrophysical research; □ demonstrates why we believe that black holes are responsible for important phenomena such as quasars, microquasars and gamma-ray bursts; □ explains to the reader the nature of the violent and spectacular outflows (winds and jets) generated by black hole accretion.

Is Einstein Still Right? Dec 31 2019 Will and Yunes chronicle the latest adventures of scientists as they put Einstein's theory to the test in ever more precise and astonishing ways. In the process, they document the struggles of physicists to reconcile gravity with quantum mechanics, the mysteries of dark energy and dark matter, and the scientific process to seek a new understanding of the cosmos. This is a popular science book intended for the general public that describes cutting-

edge theoretical physics ideas, experiments and observations with a substantial number of drawings and figures but without mathematical equations. The reader will take front seat in the roller coaster that is cutting-edge research in physics through personal anecdotes and stories.

A Taste Of Love Nov 09 2020 'I don't think I should tell you this, but it seems like you have gained my trust. Today I dreamt about her, and it was not just a regular kind of dream, it was like an erotic dream. Oh my god, I'm feeling really shy,' Siddhant is in his second year of graduation. Though he's not the most intelligent and popular guy in BHU, he is just okay. He's straightforward but confused, he enjoys life but cries sometimes, shy and sort of cool, he hates his okay life. But most importantly, he is waiting for his right time, the right time for career thinking, love, movies, dating, sex and growing up. For now, it's just about his idiot friends, a 'never founded' crush, a weird family, some dark secrets, a shrink and of course, HER. But for how long? Standing with the crowd doesn't make sense, so how do you stand out? How do you cope with the pain? How do you become spectacular from just O-K-A-Y?
