*CIMOSA: Open System Architecture for CIM* Sep 08 2020 Enterprise operation efficiency is seriously constrained by the inability to provide the right information, in the right place, at the right time. In spite of significant advances in technology it is still difficult to access information used or produced by different applications due to the hardware and software incompatibilities of manufacturing and information processing equipment. But it is this information and operational knowledge which makes up most of the business value of the enterprise and which enables it to compete in the marketplace. Therefore, sufficient and timely information access is a prerequisite for its efficient use in the operation of enterprises. It is the aim of the ESPRIT project AMICE to make this knowledge base available enterprise-wide. During several ESPRIT contracts the project has developed and validated CIMOSA: Open System Architecture for CIM. The CIMOSA concepts provide operation structuring based on cooperating processes. Enterprise operations are represented in terms of functionality and dynamic behaviour (control flow). Information needed and produced, as well as resources and organisational aspects relevant in the course of the operation are modelled in the process model. However, the different aspects may be viewed separately for additional structuring and detailing during the enterprise engineering process.

*Lotus Esprit* Feb 23 2022 Lotus Esprit: The Official Story is the inside story of Britain's best loved supercar from its development in the early 1970's right through to the 21st century. That the Esprit ever appeared in the showroom, never mind set a record for British sportscar continuous production from 1976-2004, is a story straight from the Lotus era. How Colin Chapman labored alongside Italian designer and fellow genius Giorgetto 'Giorgio' Giugiaro to bring the first show Esprits to life, is just one of the stories unveiled by Jeremy Walton's research. The Esprit, in all its Lotus Type numbers and derivatives from the very first Type 79 onwards, is revealed in this seriously comprehensive book. A total of under 11,000 Esprits were made in its 28 year production span, which means that some models had production numbers of less than 100 and have therefore become extremely collectable. Supremely agile and rapid Esprits such as the Sport 300 and V8 350 are examined in all their 160 to 175 mph glories - along with the race track inspired Esprit Turbo SCCA, X180R and Type 114 Esprit GT1. As with Walton's acclaimed Lotus Elise title for Coterie, this conscientious Esprit production was enabled only by the full co-operation of Lotus Cars. Once again they gave frank access to their archives as well as their employees. Lotus Esprit The Official Story

contains the reminiscences of the loyalists and the youngsters who added to their growing reputations when involved in the concept and design of the Esprit, many who are now famous industry figures following a Lotus apprenticeship. The author's trusted participation at every stage in the Esprit's long life is reflected by the openness of all involved. They tell us the real stories behind the car, leaving us with hope of an innovative new Esprit before too long.
