*Early Literacy Skills Builder* Oct 03 2022 Apply the "science" of reading to students with moderate-to-severe developmental disabilities, including autism The Early Literacy Skills Builder program incorporates systematic instruction to teach both print and phonemic awareness. ELSB is a multi-year program with seven distinct levels and ongoing assessments so students progress at their own pace. Five years of solid research have been completed through the University of North Carolina at Charlotte, proving ELSB to be a highly effective literacy program and more effective than a sight-word only program. ELSB is based upon the principles of systematic and direct instruction. It incorporates scripted lessons, least-prompt strategies, teachable objectives, built-in lesson repetition, and ongoing assessments. The seven ELSB levels contain five structured lessons each. All students begin at Level 1. If a student struggles here, go back and administer Level A. Instruction is one-on-one or in small groups. Teach scripted lessons daily in two 30-minute sessions. On the completion of each level, formal assessments are given. ELSB includes everything you need to implement a multi-year literacy curriculum.

*Health Literacy* Oct 23 2021 To maintain their own health and the health of their families and communities, consumers rely heavily on the health information that is available to them. This information is at the core of the partnerships that patients and their families forge with today's complex modern health systems. This information may be provided in a variety of forms ranging from a discussion between a patient and a health care provider to a health promotion advertisement, a consent form, or one of many other forms of health communication common in our society. Yet millions of Americans cannot understand or act upon this information. To address this problem, the field of health literacy brings together research and practice from diverse fields including education, health services, and social and cultural sciences, and the many organizations whose actions can improve or impede health literacy. *Health Literacy: Prescription to End Confusion* examines the body of knowledge that applies to the field of health literacy, and recommends actions to promote a

**Literacy, Gender, and Work** Nov 11 2020 Part of a series exploring how language influences and is influenced by educational processes, this book describes difficulties boys and girls experience in learning to read and write due to gendered divisions of labor. The book draws on an ethnographic study that followed 13 children from kindergarten through second grade and found that, in learning to read and write, children construct gendered identities and negotiate their social relations with parents, siblings, teachers, and peers; thus even in learning literacy, traditional gender roles in family, school, and society are often unwittingly perpetuated. The book's chapters are: (1) "Learning about Literacy from Children," presenting the assumptions of prevailing research perspectives: emergent literacy, social construction of literacy, and literacy as social status and identity; (2) "The

Roots of Literacy Learning in Families," introducing four of the children and their families and showing how literacy is grounded in family relations and how children constructed their own orientations toward literacy; (3) "Literacy Instruction in the Kindergarten Classroom," presenting the pedagogical context of children's literacy learning, and the approach to literacy learning in the kindergarten and its theoretical basis in the various perspectives on literacy; (4) "Children's Orientations toward Literacy in Kindergarten," comparing the classroom literacy learning of two children, and showing that children's responses to a teacher's pedagogical approach result from literacy orientations they had constructed at home; (5) "Tensions in Children's Kindergarten Literacy Learning," focusing on sources of tension in children's literacy learning and in the teacher's choices as related to gender and work issues; (6) "Beyond Stereotypes: The Complexity of Negotiating Gender and Work Relations in Literacy Learning," considering how structuring processes in the family and classroom related to work and gender affect individual literacy learning; (7) "Continuity and Change in First and Second Grade," examining continuity and change in four children's orientations toward literacy; and (8) "Reflections on the Journey," offering final observations on literacy, gender, and work, and arguing that theoretical perspectives that allow fuller and more complex understandings of emergent literacy are needed. An appendix summarizes the data collected on the children. Contains over 200 references. (TM)

*Adult Literacy as Social Practice* May 06 2020 With a radically new perspective on reading, writing and mathematics for adults, this refreshing and challenging book shows how teachers and curriculum developers have much to gain from understanding the role of literacy in learners' lives, bringing in their families, social networks and jobs. Looking at the practicalities of how teachers and students can work with social practice in mind, *Adult Literacy as Social Practice* is particularly focused on: \* how a social theory of literacy and numeracy compares with other theoretical perspectives \* how to analyze reading and writing in everyday life using the concepts of social literacy as analytical tools, and what this tells us about learners' teaching needs \* what is actually happening in adult basic education and how literacy is really being taught \* professional development. With major policy initiatives coming into force, this is the essential guide for teachers and curriculum developers through this area, offering one-stop coverage of the key concepts without the need for finding materials from far-scattered sources.

**Building Communities of Engaged Readers** Sep 02 2022 Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.
