Stochastic Systems Dec 30 2019 Since its origins in the 1940s, the subject of decision making under uncertainty has grown into a diversified area with application in several branches of engineering and in those areas of the social sciences concerned with policy analysis and prescription. These approaches required a computing capacity too expensive for the time, until the ability to collect and process huge quantities of data engendered an explosion of work in the area. This book provides succinct and rigorous treatment of the foundations of stochastic control; a unified approach to filtering, estimation, prediction, and stochastic and adaptive control; and the conceptual framework necessary to understand current trends in stochastic control, data mining, machine learning, and robotics.

Granville Hicks: an Annotated Bibliography Nov 28 2019

An Invitation to Sociology of Religion Aug 25 2019 Written in lively prose this second edition introduces students to the major themes, problems and goals of the sociological study of religions.

Copyright Exhaustion Mar 13 2021 In the Second Edition of Copyright Exhaustion, copyright scholar Péter Mezei offers an expanded examination of copyright exhaustion, including its historical development, theoretical framework, practical applications, and policy considerations. He includes updated case law and statutory developments for the first-sale doctrine in the United States and in the European Union, covering both analogue and digital applications with an eye toward scrutinizing the common rejection of exhaustion in the resale of digital subject matter including computer programs, sound recordings, audiovisual works, and e-books. He advocates for a digital first-sale doctrine that would offer legal consistency to copyright law and a technologically feasible framework for content producers and consumers.

Interpol's Forensic Science Review Mar 25 2022 Every three years, worldwide forensics experts gather at the Interpol Forensic Science Symposium to exchange ideas and discuss scientific advances in the field of forensic science and criminal justice. Drawn from contributions made at the latest gathering in Lyon, France, Interpol's Forensic Science Review is a one-source reference providing a comp

Recent Developments in Remote Sensing for Human Disaster Management and Mitigation **Natural and Man-Made (2013)** Aug 06 2020

Pediatric Neurotoxicology Mar 01 2020 This book focuses on children and the impact of neurotoxins on the developing brain to guide the practice of psychologists working with children in clinical and school settings. Each chapter covers a distinct neurotoxin or group of neurotoxins, with particular emphasis on the impact of the

neurotoxin exposure on the developing brain and long-term cognitive and psychosocial outcomes. This is more complex than studying neurotoxins with adults because of the rapid development occurring in the child's brain. Further, children are more susceptible than adults to the effects of neurotoxins due to their developmental status. Many of the effects discussed in this volume occur in utero, thus setting the stage for an altered developmental trajectory.

International Entrepreneurship in Small and Medium Size Enterprises Nov 20 2021 The drivers of globalization are removing the barriers that segregated the competitive space of the small and large firms in the past. It is becoming increasingly difficult for independent small firms to thrive in their traditional markets unless they are globally competitive. Managing an enterprise's commercial, industrial and political relations well, regardless of size and location, is the essence of the entrepreneurial challenge in this competitive arena. Small and medium size enterprises (SMEs) often face very different issues than large multinational enterprises do when confronting internationalization. This volume provides an in-depth discussion of these challenges. The contributors to this volume explore the emerging patterns of SME growth and international expansion in response to the evolving competitive environment, dynamics of competitive behavior, entrepreneurial processes and formulation of strategy. They examine the basis and requirements of growth and expansion from three perspectives: the rapidly-changing environment in which business is conducted, entrepreneurial characteristics, and the evolving strategic and competitive response to this changing business environment. Business leaders, scholars and students interested in international business and entrepreneurship will welcome this volume.

Handbook of School Violence and School Safety Jul 17 2021 The Handbook of School Violence and School Safety: International Research and Practice has become the premier resource for educational and mental health professionals and policymakers seeking to implement effective prevention and intervention programs that reduce school violence and promote safe and effective schools. It covers the full range of school violence and safety topics from harassment and bullying to promoting safe, secure, and peaceful schools. It also examines existing school safety programs and includes the multi-disciplinary research and theories that guide them. Examinations of current issues and projections of future research and practice are embedded within each chapter. This volume maps the boundaries of this rapidly growing and multidisciplinary field of study. Key features include... Comprehensive Coverage – The chapters are divided into three parts: Foundations; Assessment and Measurement; Prevention and Intervention Programs. Together they provide a comprehensive review of what is known about the types, causes, and effects of school violence and the most effective intervention programs that have been developed to prevent violence and promote safe and thriving school climates. Evidence-based Practice – Avoiding a one-size-fits-all approach to prevention and intervention, the focus throughout is on the application of evidence-based practice to address factors most commonly associated with school violence and safety. Implications for Practice – Each chapter bridges the research-to-practice gap, with a section delineating implications for practice of the foregoing research. Chapter Structure – To ensure continuity and coherence across the book, each chapter begins with a brief abstract and ends with a table showing the implications for practice. International Focus – Acknowledging the fact that school violence and safety is a global concern, this edition has increased its focus on insights learned from cross-national research and practice outside the USA. Expertise – The editors and authors are experienced researchers, teachers, practitioners, and leaders in the school violence field, their expertise includes their breadth and depth of knowledge and experience, bridging research, policy, and practice and representing a variety of international organizations studying school violence around the world.

Juran's Quality Control Handbook May 15 2021 More than ever the international reference work for managers and specialists, the new Fourth Edition of this classic desktop guide defines how to plan, produce, control, and continually improve quality companywide for the 1990s -- from the executive suite to the factory floor.

Entrepreneurial Resourcefulness Apr 25 2022 Explores the theme of "resources" in entrepreneurship, and examines entrepreneurs that persevere in uncertain times to build new businesses. The different perspectives gathered in this volume present new ways of thinking about how entrepreneurs acquire, borrow, and make use of resources in seemingly impossible environments.

Cochrane Handbook for Systematic Reviews of Interventions Nov 08 2020 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for

systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Security Strategies, Power Disparity and Identity Jul 25 2019 What is power and how is it effective? This volume responds to these questions in terms of regional international relations with a particular focus on the Baltic Sea region, an area still charged with a residue of Cold War conflict and power disparity, in a setting of new cooperative ventures. Each contributor examines the region from a different angle and discusses how its actors coped with the new situation facing them after 1991. The volume looks at how governments have defined their new circumstances, how they have dealt with the opportunity to shift to a new mode of coexistence and collaboration, and how they have tackled the challenge of peacefully converting their region to a security community. The book breaks with tradition by adopting a new, thematic approach based on regional issues and functions rather than a country-by-country discourse. It will be of critical value to readers interested in security studies and European politics.

New Statesman and Nation Jun 27 2022

Annual Review of Nursing Research, Volume 11, 1993 Jul 29 2022 Now in its second decade of publication, this landmark series draws together and critically reviews all the existing research in specific areas of nursing practice, nursing care delivery, nursing education, and the professional aspects of nursing.

HIPAA and Medical Records for Non-health Care Lawyers Oct 08 2020

Math for Electricity & Electronics Apr 13 2021 With its fresh reader-friendly design, MATHEMATICS FOR ELECTRICITY AND ELECTRONICS, 4E is more current, comprehensive, and relevant than ever before. Packed with practical exercises and examples, it equips learners with a thorough understanding of essential algebra and trigonometry for electricity and electronics technology, while helping them improve critical thinking skills. Well-illustrated information sharpens the reader's ability to think quantitatively, predict results, and troubleshoot effectively, while drill and practice sets reinforce comprehension. To ensure mastery of the latest ideas and technology, the text thoroughly explains all mathematical concepts, symbols, and formulas required by future technicians and technologists. In addition, a new homework solution offers a wealth of online resources to maximize study efforts as well as provides an online testing tool for instructors. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Why was Stock Market Volatility So High During the Great Depression? May 03 2020 The extreme levels of stock price volatility found during the Great Depression have often been attributed to political uncertainty. This paper performs an explicit test of the Merton/Schwert hypothesis that doubts about the survival of the capitalist system were partly responsible. It does so by using a panel data set on political unrest, demonstrations and other indicators of instability in a set of 10 developed countries during the interwar period. Fear of worker militancy and a possible revolution can explain a substantial part of the increase in stock market volatility during the Great Depression. Keywords: Stock price volatility, political uncertainty, worker militancy, Great Depression. JEL Classification: G12, G14, G18, E66, N22, N24, N12, N14.

Monthly Labor Review Sep 30 2022 Publishes in-depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews.

Assessment in Education Jan 23 2022 This book provides key insights into how educational leaders can successfully navigate the turbulence of political debate surrounding leading student assessment and professionalised practice. Given the highly politicised nature of assessment, it addresses leaders and aspiring leaders who are open to being challenged, willing to explore controversy, and capable of engaging in informed critical discourse. The book presents the macro concepts that these audiences must have to guide optimal assessment policy and practice. Collectively, the chapters highlight important assessment purposes and models, including intended and unintended effects of assessment in a globalised context. The book provides opportunities to explore cultural similarities and particularities. It invites readers to challenge taken-for-granted assumptions about ourselves and colleagues in other settings. The chapters highlight the cultural clashes that may occur when cross-cultural borrowing of assessment strategies, policies, and tools takes place. However, authors also encourage sophisticated critical analyses of potential lessons that may be drawn from other contexts and systems. Readers will encounter challenges from authors to deconstruct their assessment values, beliefs, and preconceptions. Indeed, one purpose of the book is to destabilise certainties about assessment that prevail and to embrace the assessment possibilities that can emerge from cognitive dissonance.

Pacific Islands Monthly Jan 11 2021

The Handbook of Behavioral Operations Management Apr 01 2020 The Handbook of Behavioral Operations Management provides easy-to-access insights into why associated behavioral phenomena exist in specific production and service settings, illustrated through ready-to-play games and activities that allow instructors to demonstrate the phenomena in class settings along with applicable prescriptions for practice. By design the text serves a dual role as a desk/training reference to those practitioners already in the field and presents a comprehensive

framework for viewing behavioral operations from a systems perspective. As an interdisciplinary book relating the dynamics of human behavior to operations management, this handbook is an essential resource for practitioners seeking to develop greater system understanding among their workers, as well as for instructors interested in emphasizing the practical relevance of behavior in operational settings.

The Review of Reviews Feb 21 2022

Environmental Litigation in China Jun 23 2019 This is a book about the improbable: seeking legal relief for pollution in contemporary China. In a country known for tight political control and ineffectual courts, Environmental Litigation in China unravels how everyday justice works: how judges make decisions, why lawyers take cases, and how international influence matters. It is a readable account of how the leadership's mixed signals and political ambivalence play out on the ground - propelling some, such as the village doctor who fought a chemical plant for more than a decade, even as others back away from risk. Yet this remarkable book shows that even in a country where expectations would be that law wouldn't much matter, environmental litigation provides a sliver of space for legal professionals to explore new roles and, in so doing, probe the boundary of what is politically possible.

Political Public Relations Jun 15 2021 Political Public Relations maps and defines this emerging field, bringing together scholars from various disciplines—political communication, public relations and political science—to explore the area in detail. The volume connects differing schools of thought, bringing together theoretical and empirical investigations, and defines a field that is becoming increasingly important and prominent. It offers an international orientation, as the field of political public relations must be studied in the context of various political and communication systems to be fully understood. As a singular contribution to scholarship in public relations and political communication, this work fills a significant gap in the existing literature, and is certain to influence future theory and research.

Monthly Statistical Review Nov 01 2022

Cities in a Time of Terror: Space, Territory, and Local Resilience Dec 10 2020 This book is about urban terror - its meaning, its ramifications, and its impact on city life. Written by a well-known expert in the field, "Cities in a Time of Terror" draws on data from more than a thousand cities across the globe and traces the evolution of urban terrorism between 1968 and 2006. It explains what kinds of cities have become prime targets, why terrorism has become increasingly lethal, and how its inspiration has changed from secular to religious. The author describes urban terrorism as an attempt to use the city's own strength against itself, forcing it to implode, and delineates three basic logics of terrorist choices for targeting cities. The book also includes a discussion of local resilience - the city's capacity to bounce back from attack - and suggests how that can be sustained. Examples from New York, London, Jerusalem, Istanbul, Moscow, Paris, and Madrid illustrate the book's central themes.

Global Operations Strategy Jan 29 2020 While many business schools are teaching Global Operations Strategy with self-made teaching materials, there are no such textbooks. Combining practical approaches with detailed theoretical underpinnings, this book provides theories, tools, frameworks, and techniques for global operations strategy, and brings real world perspectives to students and managers. Each chapter includes definition of key terms, introduction of fundamental theories, several short case examples, one long new case to explain the associated theories, and recommended further reading.

Handbook of EDP Auditing Feb 09 2021

Combining Methods In Educational And Social Research Jun 03 2020 This title provides a guide to mixing or combining methods in educational and social research and covers complex interventions, Bayesian approaches, new political arithmetic, triangulation, life histories and design studies.
