*The News: A User's Manual* Dec 18 2021 *The News: A User's Manual* is an insightful analysis of the impact of the incessant news machine on us and our culture. The news is everywhere. We can't stop constantly checking it on our computer screens, but what is this doing to our minds? We are never taught how to make sense of the torrent of news we face daily, which has a huge influence on our sense of what matters and of how we

should lead our lives. Alain de Botton takes twenty-five archetypal news stories—including an airplane crash, a murder, a celebrity interview, and a political scandal—and submits them to intense analysis. Why are disaster stories often so uplifting? Why do we enjoy watching politicians being brought down? Why are upheavals in far-off lands often so boring? What makes the love lives of celebrities so interesting? De Botton has written the ultimate guide for our frenzied era, designed to bring calm, understanding, and a measure of sanity to a news-obsessed age.

The database was developed as part of an assessment of the Simulation in Training for Advanced Readiness (SIMITAR) time-compressed gunnery training strategy, as implemented in a test ARNG armored brigade (Smith, in publication). It contains gunnery performance measures from this test brigade and from six other enhanced "comparison" brigades where the SIMITAR training strategy was not introduced. These measures were collected from 1993-1997 and include first-run and final, live-fire, Table VIII gunnery qualification scores, tank main gun ammunition expenditures, related measures/information needed for assessing the impact of different training strategy interventions, and space set aside for recording the outcomes of training aids, devices, simulators and simulations (TADSS) usage. The databases is

configured within a software program known as the Statistical Package for the Social Sciences (SPSS, Version 6.1 for Windows). Its files can be exported in a number of formats, including spreadsheet and database management programs, as well as into a number of other statistical utilities. This user's manual will help ARNG database managers use the SIMITAR database as a convenient repository for gunnery performance and related information and as a resource for future gunner-related strategy impact investigations."--P.i.

prose, taking in selfies, social media, celebrity and Cyberfeminism.
