Scars, Marks & Tattoos Jan 07 2021 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Dynamics of Structure and Foundation - A Unified Approach Apr 22 2022 Designed to provide engineers with quick access to current and practical information on the dynamics of structure and foundation, this unique work, consisting of two separately available volumes, serves as a complete reference, especially for those involved with earthquake or dynamic analysis, or the design of machine foundations in the oil, gas, a

Studies in the History of Indian Mathematics Apr 10 2021 This volume is the outcome of a seminar on the history of mathematics held at the Chennai Mathematical Institute during January-February 2008 and contains articles based on the talks of distinguished scholars both from the West and from India. The topics covered include: (1) geometry in the *oulvasatras*; (2) the origins of zero (which can be traced to ideas of *lopa* in Paoini's grammar); (3) combinatorial methods in Indian music (which were developed in the context of prosody and subsequently applied to the study of tonal and rhythmic patterns in music); (4) a cross-cultural view of the development of negative numbers (from Brahmagupta (c. 628 CE) to John Wallis (1685 CE)); (5) *Kunnaka*, *Bhavana* and *Cakravala* (the techniques developed by Indian mathematicians for the solution of indeterminate equations); (6) the development of calculus in India (covering the millennium-long history of discoveries culminating in the work of the Kerala school giving a complete analysis of the basic calculus of polynomial and trigonometrical functions); (7) recursive methods in Indian mathematics (going back to Paoini's grammar and culminating in the recursive proofs found in the Malayalam text *Yuktibhaua* (1530 CE)); and (8) planetary and lunar models developed by the Kerala School of Astronomy. The articles in this volume cover a substantial portion of the history of

Indian mathematics and astronomy. This book will serve the dual purpose of bringing to the international community a better perspective of the mathematical heritage of India and conveying the message that much work remains to be done, namely the study of many unexplored manuscripts still available in libraries in India and abroad.

Flying The Big Jets (4th Edition) Aug 22 2019 Flying the Big Jets presents the facts that people want to know about the world of the big jets. How does a large aircraft fly? How long is the take-off run at maximum weight? How much fuel is carried on a transatlantic flight? How do the radios work? What aircraft maintenance is required? How often are the tyres changed? What is the life style of a pilot? The answers to these and a thousand other questions are given in sufficient detail to satisfy the most inquisitive of readers. Chapter by chapter the reader is taken gently from the basics of the big jets to the sophistication of the 'glass cockpit' in preparation for the pilot's seat on a Boeing 777 flight from London to Boston. Flying the Big Jets is a comprehensive book that reveals as never before the every-day working environment of the modern long-haul airline pilot. "Written by a pilot with over 15,000 flying hours on heavy jets during a 30-year career in commercial aviation, this title is a comprehensive text book taking the reader into the 'glass cockpit' of a Boeing 777. It is also a guide to the principles of flight, the art of navigation and meteorology, and an appreciation of the role played by Air Traffic Control in modern airline operations. An absorbing read for that next long-haul flight." WINGSPAN

American Cinematographer Manual Sep 27 2022 Volume One is the reference guide containing in-depth chapters by noted professionals such as "Framing for Television" by Dave Kenig; "Comparisons of 1.85, Anamorphic and Super 35 Film Formats" by Rob Hummel; "Anamorphic Cinematography" by John Hora, ASC; "Lenses by Iain Neil; "Motion-Control Cinematography" by Richard Edlund, ASC; "Aerial Cinematography" by Jon Kranhouse; "Underwater Cinematography" by Pete Romano, ASC; "Digital Postproduction for Film" by Bill Feightner and Robert L. Eicholz; "Shooting 16mm Color Negative for Blowup to 35mm" by Irwin Young, etc. Volume Two is the field guide starts with camera section assembled by Jon Fauer, ASC and continues with all of the tables and charts for quick reference while working on the set. Each book is 6"x9" with over 400 pages. Each volume also contains the complete table of contents and index for both books for ease of use.

Buyology Sep 15 2021 NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Dynamics of Structure and Foundation - A Unified Approach Apr 29 2020 Designed to provide engineers

with quick access to current and practical information on the dynamics of structure and foundation, this 2-volume reference work is intended for engineers involved with earthquake or dynamic analysis, or the design of machine foundations in the oil, gas, and energy sector. Whereas the first volume deals with the fundamentals, this volume is dedicated to applications in various civil engineering problems, related to dynamic soil-structure interaction, machine foundation and earthquake engineering. It presents innovative, easy-to-apply and practical solutions to various problems and difficulties a design engineer will encounter. It allows quick access to targeted information; it includes a wealth of case studies and also examines geotechnical considerations with regard to dynamic soil-structure interaction. This book is concentrated on three major application areas: dynamic soil-structure interaction (DSSI), the analysis and design of machine foundations, and on the analytical and design concepts for earthquake engineering. Vol. 1 (ISBN 9780415471459) focusses on the theory and fundamentals book.

Solving PDEs in Python Jun 24 2022 This book offers a concise and gentle introduction to finite element programming in Python based on the popular FEniCS software library. Using a series of examples, including the Poisson equation, the equations of linear elasticity, the incompressible Navier–Stokes equations, and systems of nonlinear advection–diffusion–reaction equations, it guides readers through the essential steps to quickly solving a PDE in FEniCS, such as how to define a finite variational problem, how to set boundary conditions, how to solve linear and nonlinear systems, and how to visualize solutions and structure finite element Python programs. This book is open access under a CC BY license.

Schaum's Outline of Physics for Engineering and Science, Fourth Edition Jul 01 2020 Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. Tough Test Questions? Missed Lectures? Not Enough Time? Fortunately, there's Schaum's. More than 40 million students have trusted Schaum's to help them succeed in the classroom and on exams. Schaum's is the key to faster learning and higher grades in every subject. Each Outline presents all the essential course information in an easy-to-follow, topic-by-topic format. You also get hundreds of examples, solved problems, and practice exercises to test your skills. Schaum's Outline of Physics for Engineering and Science, Fourth Edition is packed with hundreds of examples, solved problems, and practice exercises to test your skills. This updated guide approaches the subject in a more concise, ordered manner than most standard texts, which are often filled with extraneous material. Schaum's Outline of Physics for Engineering and Science, Fourth Edition features: •788 fully-solved problems •25 problem-solving videos •Succinct review of physics topics such as motion, energy, fluids, waves, heat, and magnetic fields •Clear, concise explanations of all general physics concepts •Content supplements the major leading textbooks in physics for engineering and science •Content that is appropriate for Principles of Physics, Elements of Physics, Introductory College Physics, General Physics, Physics for Engineering courses PLUS: Access to the revised Schaums.com website and new app, containing 25 problem-solving videos, and more. Schaum's reinforces the main concepts required in your course and offers hundreds of practice exercises to help you succeed. Use Schaum's to shorten your study time—and get your best test scores! Schaum's Outlines – Problem solved.

To the Power of One Jan 19 2022 The universe, according to modern day physics, is not composed of the individual parts and pieces that we perceive with our five senses but instead is described as being one unified whole through a mysterious invisible force that instantly connects every part of the cosmos. These and many other incredible findings in the area of Quantum Physics have shaken the foundations of the scientific community. Even more important, the general public at large is not aware of these discoveries. Book jacket.

Handbook of Ecological Economics May 23 2022 This Handbook provides an overview of major current debates, trends and perspectives in ecological economics. It covers a wide range of issues, such as the foundations of ecological economics, deliberative methods, the de-growth movement, ecological macroeconomics, social metabolism, environmental governance, consumer studies, knowledge systems and new experimental approaches. Written by leading authors in their respective areas of specialisation, the contributions systematize the "state of the art" in the selected topics, and draw insights about new knowledge frontiers.

Kasher in the Rye Mar 29 2020 A hopeful and inspiring "act of comedic magic" from comedian—and now memoirist!—Moshe Kasher (Artie Lange, #1 New York Times bestselling author of *Too Fat to Fish*). Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *Kasher in the Rye* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control—his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary

endeavor finds humor in even the most horrifying situations.

The Unknown God Mar 21 2022 ""This book contains a careful, thorough, and where necessary skeptical as regards doubtful evidence (especially in the case of Plato and the Old Academy) of the beginnings in European thought of the negative or apophatic way of thinking and its relations to more positive or kataphatic ways of thinking about God. One of its greatest strengths, perhaps the greatest, is that the author makes clear that none of the persons concerned, Hellenic, Jewish or Christian, was engaged in the pursuit of a philosophical abstraction, or the heaping of rhetorical superlatives on God. They were rather concerned to present the origin of the universe as an intimately present living reality which infinitely transcends our thought and speech. This, combined with careful attention to the varieties of negative theology and its relations with positive, and the particular difficulties experienced by the members of the various traditions involved, makes the book the best introduction to the negative theology available."" -A. H. Armstrong, Emeritus Professor of Greek, University of Liverpool, England. Emeritus Professor of Classics, Dalhousie University, Halifax, Nova Scotia, Canada. Senior Fellow of the British Academy. Irish academic Deirdre Carabine has lived and taught in Uganda for more than twenty years. She has recently been founder Vice-Chancellor at the Virtual University of Uganda (VUU), the first fully online university in Sub-Saharan Africa. Prior to that she set up International Health Sciences University in Kampala. She has taught at Queen's Belfast, University College Dublin, and Uganda Martyrs University. Currently, she is Director of Programmes at VUU. She attended the Queen's University of Belfast where she graduated with a PhD in philosophy, and University College Dublin where, as one of the first Newman Scholars, she gained a second PhD in Classics. The Hanbali School of Law and Ibn Taymiyyah Feb 20 2022 The Hanbali School of Law and Ibn Taymiyyah provides a valuable account of the development of Hanbalite jurisprudence, placing the theoretical and conceptual parameters of this tradition within the grasp of the interested reader. Studying the vibrant yet controversial interaction between Ibn Taymiyyah and the Hanbali School of law, this book assesses to what extent this relationship was a conflict or reconciliation. The author takes a detailed exploration of the following issues: the strength of contributions made to this School by earlier paragons associated with Ahmad Ibn Hanbal the contextual constructs which shaped the tradition's development the methodology and literature synonyms within the classical School the manner by which Ibn Taymiyyah engaged with the Hanbali tradition the impact of his thought upon the later expression of the School's legal doctrines and its theoretical principles the contribution made by this School in general to the synthesis of Islamic law. Giving background material to the Hanbali School of law, this book is a vital reference work for those with interests in Islamic law, the history of the Hanbalite tradition and its principle luminaries.

Statistical Size Distributions in Economics and Actuarial Sciences Dec 18 2021 A comprehensive account of economic size distributions around the world and throughout the years In the course of the past 100 years, economists and applied statisticians have developed a remarkably diverse variety of income distribution models, yet no single resource convincingly accounts for all of these models, analyzing their strengths and weaknesses, similarities and differences. *Statistical Size Distributions in Economics and Actuarial Sciences* is the first collection to systematically investigate a wide variety of parametric models that deal with income, wealth, and related notions. Christian Kleiber and Samuel Kotz survey, compliment, compare, and unify all of the disparate models of income distribution, highlighting at times a lack of coordination between them that can result in unnecessary duplication. Considering models from eight languages and all continents, the authors discuss the social and economic implications of each as well as distributions of size of loss in actuarial applications. Specific models covered include: Pareto

distributions Lognormal distributions Gamma-type size distributions Beta-type size distributions
Miscellaneous size distributions Three appendices provide brief biographies of some of the leading
players along with the basic properties of each of the distributions. Actuaries, economists, market
researchers, social scientists, and physicists interested in econophysics will find Statistical Size
Distributions in Economics and Actuarial Sciences to be a truly one-of-a-kind addition to the professional
literature.
