The Data Catalog: Sherlock Holmes Data Sleuthing for Analytics Oct 20 2021 Apply this definitive guide to data catalogs and select the feature set needed to empower your data citizens in their quest for faster time to insight. The data catalog may be the most important breakthrough in data management in the last decade, ranking alongside the advent of the data warehouse. The latter enabled business consumers to conduct their own analyses to obtain insights themselves. The data catalog is the next wave of this, empowering business users even further to drastically reduce time to insight, despite the rising tide of data flooding the enterprise. Use this book as a guide to provide a broad overview of the most popular Machine Learning (ML) data catalog products, and perform due diligence using the extensive features list. Consider graphical user interface (GUI) design issues such as layout and navigation, as well as scalability in terms of how the catalog will handle your current and anticipated data and metadata needs. O'Neil & Fryman present a typology which ranges from products that focus on data lineage, curation and search, data governance, data preparation, and of course, the core capability of finding and understanding the data. The authors emphasize that machine learning is being adopted in many of these products, enabling a more elegant data democratization solution in the face of the burgeoning mountain of data that is engulfing organizations. Derek Strauss, Chairman/CEO, Gavroshe, and Former CDO, TD Ameritrade This book is organized into three sections: · Chapters 1 and 2 reveal the rationale for a data catalog and share how data scientists, data administrators, and curators fare with and without a data catalog. · Chapters 3-10 present the many different types of data catalogs. · Chapters 11 and 12 provide an extensive features' list, current trends, and visions for the future.

Fortunately, the Milk . . . Sep 26 2019 From multi-award-winning Neil Gaiman comes a spectacularly silly, mind-bendingly clever, brilliantly bonkers adventure - with lip-smackingly gorgeous illustrations by Chris Riddell. 'A self-referential gem ... Both author and illustrator are craftsmen at the top of their game, making it look easy' Sunday Times, Children's Book of the Year Mum's away. Dad's in charge. There's no milk. So Dad saves the day by going to buy some. Really, that's all that happens. Very boring. YAAAAAAWNN. There are absolutely none of the following inside: GLOBBY GREEN ALIENS! INTERGALACTIC POLICE! PIRATES! And most definitely NOT a time-travelling hot-air balloon piloted by the brilliant dinosaur scientist Professor Steg...

Chapin-Stephens Tools 1914 Catalog of Rules, Planes, Gauges, Plumbs, Levels, Spoke Shaves, Etc. Jul 17 2021 The Chapin-Stephens Co. was created through a merger of H. Chapin s Son Co. and D.H. Stephens & Co. and was one of the largest 19th century manufacturers of wooden planes, rules and other hand tools. This important catalog lists, illustrates and prices the company s complete line of tools.

Analyzing the Next-Generation Catalog Dec 22 2021 Library Technology Reports October 2011 vol.47 no. 7 Libraries have entered a highly competitive marketplace for providing content to their constituents. Researchers are finding convenience in paying for material from highly accessible websites over assessing materials for free from a library. Web search engines and crowd-source content portals have shifted the value of a library dramatically. However, libraries have begun a transformation from the physical space

anc collections to the electronic medium. This issue of Library Technology Reports analyzes five different academic libraries to better understand why they have made an investment in a next-generation catalog and what the outcome of this investment has been.

Business Dashboards Nov 20 2021 Focusing on designing the right dashboards for use in an organization, this timely, full color book reveals how to successfully deploy dashboards by building the optimal software architecture and dashboard design. In addition, it describes the value of this popular technology to a business and how it can have a significant impact on performance improvement. A unique collection of more than 120 dashboard images are organized by category. One of the chapters provides a step-by-step description of the key performance indicator (KPIs) design process. One of the appendices contains more than 1,000 examples of KPIs to help design the content of dashboards. The book also describes all the steps in a dashboard implementation and offers related advice. Nils Rasmussen (West Hollywood, CA) is cofounder and Principal of Solver, Inc. Claire Y. Chen (Long Beach, CA) is a Senior Business Intelligence Architect at Solver, Inc. Manish Bansal (Irvine, CA) is Vice President of Sales at Solver, Inc.

The New Woman's Survival Catalog Aug 06 2020 At once practical and creative, this book was feminism's Whole Earth Catalog Originally published in 1973, The New Woman's Survival Catalog is a seminal survey of the second-wave feminist effort across the US. Edited by Kirsten Grimstad and Susan Rennie in just five months, The New Woman's Survival Catalog makes a nod to Stewart Brand's influential Whole Earth Catalog, mapping a vast network of feminist alternative cultural activity in the 1970s. Grimstad and Rennie set out on a two-month road trip in the summer of 1973, meeting and interviewing a range of organizations and individuals, and gathering vital information on everything from arts groups to bookstores and independent presses, health, parenting and rape crisis centers and educational, legal and financial resources. "These projects express a rejection of the values of existing institutional structures," Grimstad and Rennie wrote, "and, unlike the hip male counterculture, represent an active attempt to reshape culture through changing values and consciousness." Arranged in themed sections on art, communications, work and money, child care, self-help, self-defense and activism, The New Woman's Survival Catalog provides crucial insight into feminist initiatives and activism nationwide during the Women's Movement. It includes a "Making the Book" section that details the publication's production. Kirsten Grimstad and Susan Rennie are the coeditors of The New Woman's Survival Catalog and The New Woman's Survival Sourcebook (1975). They went on to cofound Chrysalis: A Magazine of Women's Culture, published out of the Woman's Building in downtown Los Angeles from 1977 to 1981. Grimstad is currently Co-Chair of Undergraduate Studies at Antioch University, Los Angeles; she is the author of The Modern Revival of Gnosticism and Thomas Mann's Doktor Faustus (2002). Rennie taught social sciences at Union Institute & University in Cincinnati, worked as a women's health activist and now lives in Venice, California.

General Catalog of Power Presses and Other Machinery, Dies and Special Tools Designed and Built by the Toledo Machine and Tool Company, Toledo, Ohio, Jun 03 2020 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.
