Ending the U.S. War in Iraq Apr 26 2022 Ending the U.S. war in Iraq required redeploying 100,000 military and civilian personnel; handing off responsibility for 431 activities to the Iraqi government, U.S. embassy, USCENTCOM, or other U.S. government entities; and moving or transferring ownership of over a million pieces of property in accordance with U.S. and Iraqi laws, national policy, and DoD requirements. Occupational Mobility in an Exiled Community Oct 21 2021 The book is an empirical research done by Prof. Madhu Rajput on socio-economic status of Tibetan women in exile. Though the author has focused on Tibetan women at Dharamsala and Dehradun, she takes readers to the era when Tibet was an independent nation, narrating their livelihood and traditions. It is a story of skillful adaptation they displayed in the face of drastically changed circumstances in exile to

make their existence meaningful and contributory. In early 1960s during conflict, migration and resettlement, it were the Tibetan women and children who suffered the most, as out of their sheltered existence, they became vulnerable to various forms of gender-based exploitation. As a result of flight trauma, anxiety and hardships of beginning a life in exile, most of them suffer from psychological disorders which affect their social and family lives. In addition to many subjects discussed in the book, the author puts an effort to understand the challenges specific to Tibetan women and children, and create sensitization on the issue.

*Hitchcock's Moral Gaze* Apr 02 2020 Offers new and compelling perspectives on the deeply moral nature of Hitchcock's films. In his essays and interviews, Alfred Hitchcock was guarded about substantive matters of morality, preferring instead to focus on discussions of technique. That has not, however, discouraged scholars and critics from trying to work out what his films imply about such moral matters as honesty, fidelity, jealousy, courage, love, and loyalty. Through discussions and analyses of such films as *Strangers on a Train*, *Rear Window*, *Vertigo*, *North by Northwest*, and *Frenzy*, the contributors to this book strive to throw light on the way Hitchcock depicts a moral—if not amoral or immoral—world. Drawing on perspectives from film studies, philosophy, literature, and other disciplines, they offer new and compelling interpretations of the filmmaker's moral gaze and the inflection point it provides for modern cinema. R. Barton Palmer is Calhoun Lemon Professor of Literature at Clemson University. His previous books include *Invented Lives, Imagined Communities: The Biopic and American National Identity* (coedited with William H. Epstein) and *Hitchcock at the Source: The Auteur as Adaptor* (coedited with David Boyd), both also published by SUNY Press. Homer B. Pettey is Professor of Film and Literature at the University of Arizona. His previous books include *Film Noir and International Noir*, both coedited with R. Barton Palmer. Steven M. Sanders is Professor Emeritus of Philosophy at Bridgewater State University. He is the author or editor of many books, including *The Philosophy of Michael Mann* (coedited with Aeon J. Skoble and R. Barton Palmer) and *The Philosophy of Steven Soderbergh* (coedited with R. Barton Palmer).

The Psychology of Social Networking Vol.1 Nov 09 2020 Using a novel approach to consider the available literature and research, this book focuses on the psychology of social media based on the assumption that the experience of being in a social media has an impact on both our identity and social relationships. In order to 'be online', an individual has to create an online presence – they have to share information about themselves online. This online self is presented in different ways, with diverse goals and aims in order to engage in different social media activities and to achieve desired outcomes. Whilst this may not be a real physical presence, that physicality is becoming increasingly replicated through photos, video, and ever-evolving ways of defining and describing the self online. Moreover, individuals are using both PC-based and mobile-based social media as well as increasingly making use of photo and video editing tools to carefully craft and manipulate their online self. This book therefore explores current debates in Cyberpsychology, drawing on the most up-to-date theories and research to explore four main aspects of the social media experience (communication, identity, presence and relationships). In doing so, it considers the interplay of different areas of psychological research with current technological and security insight into how individuals create, manipulate and maintain their online identity and relationships. The social media are therefore at the core of every chapter, with the common thread throughout being the very unique approach to considering diverse and varied online behaviours that may not have been

thus far considered from this perspective. It covers a broad range of both positive and negative behaviours that have now become integrated into the daily lives of many westernised country's Internet users, giving it an appeal to both scholarly and industry readers alike.

Borderlands of Slavery Nov 29 2019 It is often taken as a simple truth that the Civil War and the Thirteenth Amendment to the Constitution ended slavery in the United States. In the Southwest, however, two coercive labor systems, debt peonage—in which a debtor negotiated a relationship of servitude, often lifelong, to a creditor—and Indian captivity, not only outlived the Civil War but prompted a new struggle to define freedom and bondage in the United States. In *Borderlands of Slavery*, William S. Kiser presents a comprehensive history of debt peonage and Indian captivity in the territory of New Mexico after the Civil War. It begins in the early 1700s with the development of Indian slavery through slave raiding and fictive kinship. By the early 1800s, debt peonage had emerged as a secondary form of coerced servitude in the Southwest, augmenting Indian slavery to meet increasing demand for labor. While indigenous captivity has received considerable scholarly attention, the widespread practice of debt peonage has been largely ignored. Kiser makes the case that these two intertwined systems were of not just regional but also national importance and must be understood within the context of antebellum slavery, the Civil War, emancipation, and Reconstruction. Kiser argues that the struggle over Indian captivity and debt peonage in the Southwest helped both to broaden the public understanding of forced servitude in post-Civil War America and to expand political and judicial philosophy regarding free labor in the reunified republic. *Borderlands of Slavery* emphasizes the lasting legacies of captivity and peonage in Southwestern culture and society as well as in the coercive African American labor regimes in the Jim Crow South that persevered into the early twentieth century.

Geographic Adjustment in Medicare Payment Aug 19 2021 Medicare, the world's single largest health insurance program, covers more than 47 million Americans. Although it is a national program, it adjusts payments to hospitals and health care practitioners according to the geographic location in which they provide service, acknowledging that the cost of doing business varies around the country. Under the adjustment systems, payments in high-cost areas are increased relative to the national average, and payments in low-cost areas are reduced. In July 2010, the Department of Health and Human Services, which oversees Medicare, commissioned the IOM to conduct a two-part study to recommend corrections of inaccuracies and inequities in geographic adjustments to Medicare payments. The first report examined the data sources and methods used to adjust payments, and recommended a number of changes. Geographic Adjustment in Medicare Payment - Phase II: Implications for Access, Quality, and Efficiency applies the first report's recommendations in order to determine their potential effect on Medicare payments to hospitals and clinical practitioners. This report also offers recommendations to improve access to efficient and appropriate levels of care. Geographic Adjustment in Medicare Payment - Phase II: Implications for Access, Quality, and Efficiency expresses the importance of ensuring the availability of a sufficient health care workforce to serve all beneficiaries, regardless of where they live.

Going to the People Jun 24 2019 Taking S. An-sky's expeditions to the Pale of Jewish Settlement as its point of departure, the volume explores the dynamic and many-sided nature of ethnographic knowledge and the long and complex history of the production and consumption of Jewish folk traditions. These essays by historians, anthropologists, musicologists, and folklorists showcase some of the finest research in the field. They reveal how the collection, analysis, and preservation of ethnography intersect with questions about the construction and delineation of community, the preservation of Jewishness, the meaning of belief, the significance of retrieving cultural heritage, the politics of accessing and memorializing "lost" cultures, and the problem of narration, among other topics.

The Natural Problem of Consciousness Jul 18 2021 The "Natural Problem of Consciousness" is the problem of understanding why there are presently conscious beings at all. Given a non-reductive naturalist framework taking consciousness as an ontologically subjective biological phenomenon, how can we rationally explain the fact that the actual world has turned out to be one where there are presently living beings that can feel, rather than having developed as a zombie-world in which there would be no conscious experiences of any kind? This book introduces the Natural Problem by relating it to central problems in the philosophy of mind (metaphysical mind-body problem, Hard Problem of consciousness) and emphasizing the distinctive interest of its diachronic dimension. Ranging from philosophy to biology and neuroscience, it offers a thorough analysis aimed at better understanding what could explain why phenomenal consciousness has been preserved throughout evolution by natural selection. This is an original, engaging, and thought provoking philosophical study of a neglected but fundamental question regarding the nature and origin of consciousness.

Service? Learning to Advance Social Justice in a Time of Radical Inequality Jan 24 2022

When considering inequality, one goal for educators is to enhance critical engagement to allow learners an opportunity to participate in an inquiry process that advances democracy. Service?learning pedagogy offers an opportunity to advance engaged?learning opportunities within higher education. This is particularly important given the power dynamics that are endemic within conversations about education, including the conversations around the Common Core, charter schools, and the privatization of education. Critical inquiry is central to the ethos of service?learning pedagogy, a pedagogy that is built upon community partner participation and active reflection. Within higher education, service?learning offers an important opportunity to enhance practice within the community, allowing students to engage stakeholders and youth which is particularly important given the dramatic inequalities that are endemic in today's society.

Dispossessed Lives Jan 30 2020 In the eighteenth century, Bridgetown, Barbados, was heavily populated by both enslaved and free women. Marisa J. Fuentes creates a portrait of urban Caribbean slavery in this colonial town from the perspective of these women whose stories appear only briefly in historical records. Fuentes takes us through the streets of Bridgetown with an enslaved runaway; inside a brothel run by a freed woman of color; in the midst of a white urban household in sexual chaos; to the gallows where enslaved people were executed; and within violent scenes of enslaved women's punishments. In the process, Fuentes interrogates the archive and its historical production to expose the ongoing effects of

white colonial power that constrain what can be known about these women. Combining fragmentary sources with interdisciplinary methodologies that include black feminist theory and critical studies of history and slavery, *Dispossessed Lives* demonstrates how the construction of the archive marked enslaved women's bodies, in life and in death. By vividly recounting enslaved life through the experiences of individual women and illuminating their conditions of confinement through the legal, sexual, and representational power wielded by slave owners, colonial authorities, and the archive, Fuentes challenges the way we write histories of vulnerable and often invisible subjects.

It looks at various key bilateral relationships, including with Iran and Syria, discusses the impact on the United States' hegemony in both regions, considers whether the new relations represent a contribution to, or a threat to, peace and stability, and assesses the implications of the changes for patterns of regional and global international relations systems.

History and Financial Crisis Dec 23 2021 One striking weaknesses of our financial architecture, which helped bring on and perhaps deepen the Panic of 2008, is an inadequate appreciation of the past. Information about how the system functioned and the reliability of organizations and institutional controls were drawn from a relatively narrow group of recent examples. History and Financial Crisis: Lessons from the 20th Century is an attempt to broaden the range of historical sources used by policy makers to understand and treat financial crises. Many recent discussions of the 2008 panic and the economic turmoil have found the situation to either be unprecedented or greatly similar to that of 1931. However, the book's wide range of contributors suggest that the economic crisis of 2008 cannot be categorised in this way. This book was originally published as a special issue of Business History.

The Oxford Companion to Comparative Politics Nov 21 2021 Fills a gap in scholarship on an increasingly important field within Political Science. New Beginning in US-Muslim Relations Jun 28 2022 This book carries out a comparative study of the US response to popular uprisings in the Middle East as an evaluation of President Barack Obama's foreign policy commitments. In 2009, Obama publicly pledged "a new beginning in US-Muslim relations," causing eager expectation of a clear shift in US foreign policy after the election of the 44th president of the United States. However, the achievement of such a shift was made particularly difficult by the existence of multiple, and sometimes conflicting, US interests in the region which influenced the Obama administration's response to the popular uprisings in five Muslim-majority countries: Egypt, Bahrain, Yemen, Libya, and Syria. After providing a detailed analysis of the traditional features of both US foreign policy rhetoric and practice, this book turns its focus to the Obama administration's response to the 2011 Arab Awakening to determine whether Obama's foreign policy has indeed brought about a new beginning in US-Muslim relations.

With emphasis on embodied spectatorship, collaborative meaning-making, and imaginative 'play,' this book generates fresh insights into the enduring popularity of the franchise's eponymous protagonist, Joey, offering the most in-depth study of War Horse to date.
