[Health Care in Rural America](#) Jun 27 2022 Health needs and health services in rural America are key issues directly related to education as well as community well-being. This report examines rural America's access to basic health care services and discusses options for congressional consideration. The focus is on trends in availability of primary and acute rural health care and on factors affecting those trends. The report describes the characteristics of rural populations and health programs, the availability of rural health services and personnel, and delivery of rural maternal and infant health and mental health care services. On each subject, options for congressional action are examined. The federal government currently finances several different types of rural health care programs, and has a strong interest in health care trends. Major declines in inpatient utilization, compounded by increasing amounts of uncompensated care, have undermined the financial health of many rural hospitals, which also are faced with the outmigration of rural residents to urban areas for care. Policy reform options are presented in regard to: (1) improvement of rural health facilities; (2) availability and training of health professionals in rural areas; and (3) enhancing maternal and infant care programs and mental health care programs in rural areas. This document contains numerous charts, graphics, data tables, and appendices that present background information about the study. It also includes a 745-item bibliography and a subject index.

[Medicare and Medicaid at 50](#) Mar 13 2021 For fifty years, Medicare and Medicaid have stood at the center of a contentious debate surrounding American government, citizenship, and health care entitlement. In Medicare and Medicaid at 50, leading scholars in politics, government, economics, health policy, and history offer a comprehensive assessment of the evolution of these programs and their impact on society -- from their origins in the Great Society era to the current battles over the Affordable Care Act ("Obamacare"). These highly accessible essays examine Medicare and Medicaid from their origins as programs for the elderly and poor to their later role as a safety net for the middle class. Along the way, they have served as touchstones for heated debates about economics, social welfare, and the role of government. Medicare and Medicaid at 50 addresses key questions for understanding the past and future of health policy in America, including: ♦ What were the origins for these initiatives, and how were they transformed over time? ♦ What marks have Medicare and Medicaid left on society? ♦ In what ways have these programs produced innovation, even in eras of retrenchment? ♦ How did Medicaid, once regarded as a poor person's program, expand its benefits and coverage over the decades to become the platform for the ACA's future expansion? The volume's contributors go on to examine the powerful role of courts in these transformations, along with the shifting roles of Congress, public opinion, and state governors in the programs' ongoing evolution. From Lyndon Johnson to Barack Obama on the left, and from Ronald Reagan to George W. Bush on the right, American political leaders have tied their political fortunes to the fate of America's entitlement programs; Medicare and Medicaid at 50 helps explain why, and how those ongoing debates are likely to shape the future of the Affordable Care Act.

Estimating Eligibility and Participation for the WIC Program Aug 30 2022 Each year the U.S. Department of Agriculture (USDA) must estimate the number of people who are eligible to participate in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). These USDA estimates have come under critical scrutiny in part because the number of infants and postpartum women who have actually enrolled in the program has exceeded the number estimated to be eligible by as much as 20 to 30 percent. These high "coverage rates" have led some members of Congress to conclude that some people who participate are truly ineligible, and that funding could be reduced somewhat and still meet the needs of truly eligible persons who wish to participate. But some advocates and state WIC agencies believe that the estimates of the number of eligible persons are too low and more people who are eligible and want to participate could do so. In response to these concerns, the Food and Nutrition Service (FNS) of the USDA asked the Committee on National Statistics of the National Research Council to convene a panel of experts to review the methods used to estimate the number of people nationwide who are eligible and likely to participate in the WIC program. The panel's charge is to review currently used and alternative data and methods for estimating income eligibility, adjunctive eligibility from participation in other public assistance programs, nutritional risk, and participation if the program is fully funded.

Health Insurance is a Family Matter Sep 30 2022 Health Insurance is a Family Matter is the third of a series of six reports on the problems of uninsurance in the United States and addresses the impact on the family of not having health insurance. The book demonstrates that having one or more uninsured members in a family can have adverse consequences for everyone in the household and that the financial, physical, and emotional well-being of all members of a family may be adversely affected if any family member lacks coverage. It concludes with the finding that uninsured children have worse access to and use fewer health care services than children with insurance, including important preventive services that can have beneficial long-term effects.

Children's Dental Services Under the Medicaid Program Jun 23 2019 This study compares the dental manuals of seven state Medicaid programs with a set of basic dental services, which comprise shared components of various well-accepted dental guidelines, to see if states allow these services to children eligible for Medicaid. It also surveys dentists in each state to see if they provide those basic services and what problems they encounter in trying to provide them.

Community Health Nursing Jul 25 2019 Historically, community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings. Community Health Nursing: Caring for the Public's Health reflects this response and is representative of what communities signify in the United States--a unified society made up of many different populations and unique health perspectives. This text provides an emphasis on population-based nursing directed toward health promotion and primary prevention in the community. It is both community-based and community-focused, reflecting the current dynamics of the health care system. This is the textbook you've been waiting for: an undergraduate community health nursing text that is reader friendly, yet sophisticated; one that addresses communities, target populations, and individuals, and clearly draws the distinctions between each. It prepares students for addressing the problems of target populations in the community, as well as those of communities as a whole. Community Health Nursing provides unique coverage on the following topics:- health policy, including coverage of economics and managed care- nursing informatics, addressing telehealth implications, global health issues, and the fully-participating client of today- holistic health, including coverage of complementary and alternative, non-Western health practices and hospice

easy-to-read analysis of the relationship between health insurance and access to care. The book addresses three broad questions: How is children's health care currently financed? Does insurance equal access to care? How should the nation address the health needs of this vulnerable population? *America's Children* explores the changing role of Medicaid under managed care; state-initiated and private sector children's insurance programs; specific effects of insurance status on the care children receive; and the impact of chronic medical conditions and special health care needs. It also examines the status of "safety net" health providers, including community health centers, children's hospitals, school-based health centers, and others and reviews the changing patterns of coverage and tax policy options to increase coverage of private-sector, employer-based health insurance. In response to growing public concerns about uninsured children, last year Congress voted to provide \$24 billion over five years for new state insurance initiatives. This volume will serve as a primer for concerned federal policymakers and regulators, state agency officials, health plan decisionmakers, health care providers, children's health advocates, and researchers.

Community Resources for Older Adults Apr 25 2022 This text is intended for courses on community services and programmes for the elderly, typically found in gerontology departments and departments of social work. Rather than simply focusing on building awareness of the various programmes and services available, the authors stress the importance of the theoretical knowledge that will assist in understanding the social and psychological dynamics of help-seeking behaviour. By understanding the social and psychological needs of the elderly and their families, as well as the services available to them, students will be better able to take advantage of resources available to help their clients. This new edition will update the key policy updates affecting older adults as well as the census data offered throughout the text. It will also update the many unique pedagogical features such as the sections titled FYI, best practices, case studies and the web and national resources. Increased attention will be focused on aging and diverse populations and the idea of cultural competency than previous editions, as this area has continued to become a critical part of delivering effective care. Also, international issues, faith-based services, services for LGBT elders, rural elders, immigrants, and other special populations will also be covered or expanded in the new edition.

Managing Managed Care May 15 2021 Managed care has produced dramatic changes in the treatment of mental health and substance abuse problems, known as behavioral health. *Managing Managed Care* offers an urgently needed assessment of managed care for behavioral health and a framework for purchasing, delivering, and ensuring the quality of behavioral health care. It presents the first objective analysis of the powerful multimillion-dollar accreditation industry and the key accrediting organizations. *Managing Managed Care* draws evidence-based conclusions about the effectiveness of behavioral health treatments and makes recommendations that address consumer protections, quality improvements, structure and financing, roles of public and private participants, inclusion of special populations, and ethical issues. The volume discusses trends in managed behavioral health care, highlighting the emerging role of the purchaser. The committee explores problems of overlap and fragmentation in the delivery of behavioral health care and discusses the issue of access, a special concern when private systems are restricted and public systems overburdened. Highly applicable to the larger health care system, this volume will be of particular interest to all stakeholders in behavioral health--federal and state policymakers, public and private purchasers, health care providers and administrators, consumers and consumer advocates, accrediting organizations, and health services researchers.
