**The Emotional Life of Your Brain** Feb 19 2022 This groundbreaking book by a pioneer in neuroscience brings a new understanding of our emotions - why each of us responds so differently to the same life events and what we can do to change and improve our emotional lives. If you believe most self-help books, you would probably assume that we are all affected in the same way by events like grief or falling in love or being jilted and that only one process can help us handle them successfully. From thirty years of studying brain chemistry, Davidson shows just why and how we are all so different. Just as we all have our own DNA, so we each have our own emotional 'style' depending on our individual levels of dimensions like resilience, attention and self-awareness. Helping us to recognise our own emotional style, Davidson also shows how our brain patterns can change over our lives - and, through his fascinating experiments, what we can do to improve our emotional responses through, for example, meditation. Deepening our understanding of the mind-body connection - as well as conditions like autism and depression - Davidson stretches beyond mainstream psychology and neuroscience and expands our view of what it means to be human.

The Pursuit of Power Mar 08 2021 ECONOMIST BOOKS OF THE YEAR 2016 'A scintillating, encyclopaedic history, rich in detail from the arcane to the familiar... a veritable tour de force' Richard Overby, *New Statesman* 'Transnational history at its finest ... .. social, political and cultural themes swirl together in one great canvas of immense detail and beauty' Gerard DeGroot, *The Times* 'Dazzlingly erudite and entertaining' Dominic Sandbrook, *The Sunday Times* A masterpiece which brings to life an extraordinarily turbulent and dramatic era of revolutionary change. *The Pursuit of Power* draws on a lifetime of thinking about nineteenth-century Europe to create an extraordinarily rich, surprising and entertaining panorama of a continent undergoing drastic transformation. The book aims to reignite the sense of wonder that permeated this remarkable era, as rulers and ruled

navigated overwhelming cultural, political and technological changes. It was a time where what was seen as modern with amazing speed appeared old-fashioned, where huge cities sprang up in a generation, new European countries were created and where, for the first time, humans could communicate almost instantly over thousands of miles. In the period bounded by the Battle of Waterloo and the outbreak of World War I, Europe dominated the rest of the world as never before or since: this book breaks new ground by showing how the continent shaped, and was shaped by, its interactions with other parts of the globe. Richard Evans explores fully the revolutions, empire-building and wars that marked the nineteenth century, but the book is about so much more, whether it is illness, serfdom, religion or philosophy. *The Pursuit of Power* is a work by a historian at the height of his powers: essential for anyone trying to understand Europe, then or now.

**Eric Hobsbawm: a Life in History** Aug 13 2021 At the time of his death at the age of 95, Eric Hobsbawm (1917-2012) was the most famous historian in the world. His books were translated into more than fifty languages and he was as well known in Brazil and Italy as he was in Britain and the United States. His writings have had a huge and lasting effect on the practice of history. More than half a century after it appeared, his books remain a staple of university reading lists. He had an extraordinarily long life, with interests covering many countries and many cultures, ranging from poetry to jazz, literature to politics. He experienced life not only as a university teacher but also as a young Communist in the Weimar Republic, a radical student at Cambridge, a political activist, an army conscript, a Soho 'man about town', a Hampstead intellectual, a Cambridge don, an influential journalist, a world traveller, and finally a Grand Old Man of Letters. In *A Life in History*, Richard Evans tells the story of Hobsbawm as an academic, but also as witness to history itself, and of the

twentieth century's major political and intellectual currents. Eric not only wrote and spoke about many of the great issues of his time, but participated in many of them too, from Communist resistance to Hitler to revolution in Cuba, where he acted as an interpreter for Che Guevara. He was a prominent part of the Jazz scene in Soho in the late 1950s and his writings played a pivotal role in the emergence of New Labour in the late 1980s and early 1990s. This, the first biography of Eric Hobsbawm, is far more than a study of a professional historian. It is a study of an era.

**The Quiet Professional** Feb 25 2020 Major Richard J. "Dick" Meadows is renowned in military circles as a key figure in the development of the U.S. Army Special Operations. A highly decorated war veteran of the engagements in Korea and Vietnam, Meadows was instrumental in the founding of the U.S. Delta Force and hostage rescue force. Although he officially retired in 1977, Meadows could never leave the army behind, and he went undercover in the clandestine operations to free American hostages from Iran in 1980. *The Quiet Professional: Major Richard J. Meadows of the U.S. Army Special Forces* is the only biography of this exemplary soldier's life. Military historian Alan Hoe offers unique insight into Meadows, having served alongside him in 1960. *The Quiet Professional* is an insider's account that gives a human face to U.S. military strategy during the cold war. Major Meadows often claimed that he never achieved anything significant; *The Quiet Professional* proves otherwise, showcasing one of the great military minds of twentieth-century America.

***Ironic Life*** Jun 23 2022 "Just as philosophy begins with doubt, so also a life that may be called human begins with irony" so wrote Kierkegaard. While we commonly think of irony as a figure of speech where someone says one thing and means the opposite, the concept of irony has long played a more fundamental role in the tradition of philosophy, a role that goes back to Socrates the originator and exemplar of the urbane ironic life. But what precisely is Socratic irony and what relevance, if any, does it have for us today? Bernstein begins his inquiry with a critical examination of the work of two contemporary philosophers for whom irony is vital: Jonathan Lear and Richard Rorty. Despite their sharp differences, Bernstein argues that they complement one other, each exploring different aspects of ironic life. In the background of Lear's and Rorty's accounts stand the two great ironists: Socrates and Kierkegaard. Focusing on the competing interpretations of Socratic irony by Gregory Vlastos and Alexander Nehamas, Bernstein shows how they further develop our understanding of irony as a form of life and as an art of living. Bernstein also develops a distinctive interpretation of Kierkegaard's famous claim that a life that may be called human begins with irony.

Bernstein weaves together the insights of these thinkers to show how each contributes to a richer understanding of ironic life. He also argues that the emphasis on irony helps to restore the balance between two different philosophical traditions philosophy as a theoretical discipline concerned with getting things right and philosophy as a practical discipline that shapes how we ought to live our lives.

**Called to the Life of the Mind** Apr 09 2021 “I wasn’t supposed to spend my life in the world of scholarship,” Richard Mouw acknowledges at the beginning of *Called to the Life of the Mind*. Yet he has indeed spent his career in the academy -- and has become one of the most widely respected evangelical Christian scholars of our time. In this wise little book Mouw defends Christian scholarship as an important and legitimate endeavor, responding in particular to those traditions that continue to be suspicious of intellectual pursuits. Writing in an inviting, conversational style, Mouw reflects candidly on the faithful Christian cultivation of the life of the mind and offers gentle advice on how Christians, especially evangelicals, might fruitfully navigate the world of the academy as followers of Jesus.

The Life and Times of Richard J. Hughes May 10 2021 The Life and Times of Richard J. Hughes explores the influential public service of this two-term New Jersey governor. He was the only person in New Jersey history to serve as both governor and chief justice of the New Jersey Supreme Court. This biography illuminates the governor's accomplishments between 1962 and 1970, including the creation of the Hackensack Meadowlands Commission, formation of the county college system, establishment of stringent antipollution laws, design of the public defender system, and the adoption of a New Jersey sales tax, as well as his pivotal role during the Newark riots. As chief justice, Hughes faced difficult issues—school funding, low and moderate income housing needs, freedom of speech, and his decision in the right-to-die case involving Karen Ann Quinlan. With a career characterized by liberal activism, Hughes also contributed nationally and internationally, from serving as host of the 1964 Democratic National Convention to monitoring elections in South Vietnam. John B. Wefing's research includes interviews with prominent politicians and leaders who worked with Hughes at various points in his career. The result is a rich story of a public servant who possessed a true ability to work with members of both political parties and played a significant role in shaping modern New Jersey.

So begins Foster's most personal work yet, a book of prayers that seek to lead us to experience "the reality of God in the midst of going to work and raising kids and cleaning house and paying the bills." Drawing on the structure of his awardwinning Prayer: Finding the Heart's True Home, Foster presents this collection of prayers according to the three aspects of the human journey: looking inward to the heart, reaching upward toward God, and moving outward to care for others. These prayers speak to moments in our days and events in our lives. Simply and powerfully expressing such basic human experiences as wonder, stillness, the loneliness of anonymity, and the search for faith, Foster encourages us to explore the transformative power of prayer that draws us into the love of God and gives Christian community its

life. Longtime Foster readers and newcomers alike will cherish this rich and thoroughly contemporary book from one of our most respected spiritual leaders.

**Wonderful Words of Life** Oct 15 2021 While many evangelical congregations have moved away from hymns and hymnals, these were once central fixtures in the evangelical tradition. This book examines the role and importance of hymns in evangelicalism, not only as a part of worship but as tools for theological instruction, as a means to identity formation, and as records of past spiritual experiences of the believing community. Written by knowledgeable church historians, Wonderful Words of Life explores the significance of hymn-singing in many dimensions of American Protestant and evangelical life. The book focuses mainly on church life in the United States but also discusses the foundational contributions of Isaac Watts and other British hymn writers, the use of gospel songs in English Canada, and the powerful attraction of African-American gospel music for whites of several religious persuasions. Includes appendixes on the American Protestant Hymn Project and on hymns in Roman Catholic hymnals. Contributors: Susan Wise Bauer Thomas E. In Defence of History Sep 21 2019 “A lucid, muscular, and often sly reflection” on the worth and purpose of historical scholarship by the award-winning author of The Third Reich Trilogy (Kirkus). In this volume, the renowned historian Richard J. Evans offers a fervent and deeply insightful defense of his craft and its importance to civilization. At a time when fact and historical truth are under unprecedented assault, Evans shows us why history is necessary. Taking us into the historians’ workshop, he offers a firsthand look at how good history gets written. In staunch opposition to the wilder claims of postmodern historians, Evans thoroughly dismantles the notion that a realistic grasp of history is impossible to attain. He then goes on to explain the deadly political dangers of losing a historical perspective on the way we live our lives. In the tradition of E.H. Carr’s What Is History? and G.R. Elton’s The Practice of History, Evans’ In Defense of History delivers “a model of lucid and intelligent historiographical analysis” (The Guardian, UK).

**Who Do You Want to Be When You Grow Old?** Dec 05 2020 Grow old on purpose. This book invites readers to navigate a purposeful path from adulthood to elderhood with choice, curiosity, and courage. Everyone is getting old; not everyone is growing old. But the path of purposeful aging is accessible to all—and it's fundamental to health, happiness, and longevity. With a focus on growing whole through developing a sense of purpose in later life, Who Do You Want to Be When You Grow Old? celebrates the experience of aging with inspiring stories, real-world practices, and provocative

questions. Framed by a long conversation between two old friends, the book reconceives aging as a liberating experience that enables us to become more authentically the person we always meant to be with each passing year. In their bestseller *Repacking Your Bags*, Richard J. Leider and David A. Shapiro defined the good life as “living in the place you belong, with people you love, doing the right work, on purpose.” This book builds on that definition to offer a purposeful path for living well while aging well.

*The Coming of the Third Reich* Oct 23 2019 Richard J. Evans' *The Coming of the Third Reich: How the Nazis Destroyed Democracy and Seized Power in Germany* explores how the First World War, the Weimar Republic and the Great Depression paved the way for Nazi rule. They started as little more than a gang of extremists and thugs, yet in a few years the Nazis had turned Germany into a one-party state and led one of Europe's most advanced nations into moral, physical and cultural ruin and despair. In this consummate and compelling history, the first book in his acclaimed trilogy on the rise and fall of Nazi Germany, Richard Evans reveals how and why it happened, questions whether the rise of Hitler was inevitable and dramatically re-creates the maelstrom of disorder, economic disaster, violence and polarization that gave rise to the terror of the Third Reich.

An Analysis of Richard J. Herrnstein and Charles Murray's The Bell Curve Feb 07 2021 Herrnstein & Murray's *The Bell Curve* is a deeply controversial text that raises serious issues about the stakes involved in reasoning and interpretation. The authors' central contention is that intelligence is the primary factor determining social outcomes for individuals - and that it is a better predictor of achievement than income, background or socioeconomic status. One of the major issues raised by the book was its discussion of 'racial differences in intelligence,' and its contention that there is a link between the low observed test scores and social outcomes for African-Americans and their lack of social attainment. While the authors produce and interpret a great deal of data to back up their contentions, they ultimately fail to tackle the problem that neither 'intelligence' nor 'race' have widely accepted definitions in biology, anthropology or sociology. In consequence, the book it has been termed both 'racist' and 'pseudoscientific' thanks to what its critics see as both its faulty reasoning and its uncautious interpretation of evidence. The debate continues to this day, with academics on both sides engaged in fierce arguments over what can be argued from the data that Herrnstein and Murray used.

**Money, Sex and Power** Sep 02 2020 'No issues touch us more profoundly or universally,' writes Richard Foster. 'No topics cause more controversy. No human realities have greater power to bless or curse. No three things have been more sought after or are more in need of a Christian response.' *Money, Sex and Power* discerns the biblical principles that enable us to live out a relevant and authentic response to the three greatest temptations of our age. Gerard Kelly writes: 'Foster follows a road few in recent years have travelled, and does so with depth, wit and down-to-earth wisdom. Don't assume for one moment that this book is anti-money, anti-sex or anti-power: the author has a

healthy respect and admiration for all three as sacred gifts of a loving creator. What he does urge us to do, though, is to "live rightly" in respect of these key areas, and so to be freed into a life of creative celebration.

Richard J. Foster's Study Guide for "Celebration of Discipline" Sep 14 2021 Brief, incisive essays clarify key issues raised in Celebration of Discipline and encourage a fuller understanding and practice of the spiritual disciplines.

**The Accidental Mind** Dec 25 2019 Linden sets the record straight about the construction of the human brain; rather than the “beautifully-engineered optimized device, the absolute pinnacle of design” portrayed in many dumbed-down text books, pop-science tomes, and education televisions programs, Linden’s organ is a complicated assembly of cobbled-together functionality that created the mind as a by-product of ad-hoc solutions to questions of survival. His guided tour of the glorious amalgam of “crummy parts” includes pit-stops in the histories and fundamentals of neurology, neural-psychology, physiology, molecular and cellular biology, and genetics.
