Examining Speaking Oct 09 2020 Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity --- or usefulness --- of tests and test scores. This edited volume develops a theoretical framework for validating tests of second language speaking ability. The framework is then applied through an examination of the tasks in Cambridge ESOL speaking tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The chapter authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The volume is a rich source of information on all aspects of examining speaking ability. As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent manner, as well as to academic researchers and graduate students in the field of language assessment more generally. This is a companion volume to the previously published titles Examining Writing and Examining Reading.

How to Succeed Delf B2 - Speaking Test Jul 18 2021 Since I teach French I would say that more than 40% of my students are in the process of taking the exam. I lead students from beginners to advanced and DELF B2 is a big step for every French learner. As you know DELF B2 is really useful not only to improve your French but also to give credit to your skills when you apply for job or French University. I helped many students to achieve this goal and I realized that most of them had the same problems: - A lack of self-confidence. Speaking a foreign language is tricky, we make many mistakes and it doesn't feel good. Moreover, because we are afraid of making mistake we often choose to not speak. That's most learners problem, whatever the language is. If we avoid facing reality we will stay dumb. - No clue about what to expect. Most students take this exam for the first time and sometimes it's their first French exam. We don't really know what to expect. - Speaking practice. They are good methods to practice for the exam but the speaking part is always the hardest. I would first say that most of the time students don't organize enough their presentation. They don't take all chances to get extra point whereas it's easier than they think. That's why I decided to gather all my knowledge about this exam and I built a process to understand what to do for the Speaking part. This method covers also the other skills like Listening, Writing and Reading test but mostly focuses on the Speaking Test because I found students need it.

The International English Language Testing System (IELTS) is the most common test used by universities for foreign students to prove their language level. IELTS is also increasingly used for immigration purposes, with many countries requiring visa applicants whose first language is not English to submit an IELTS grade. The system tests candidates' Reading, Writing, Listening and Speaking in four separate papers. Usually, students must gain a good mark in all four skills in order to gain entry to the course, job, or country of their choice. For this reason, candidates will often sit the exam numerous times to secure the score that they need. Powered by COBUILD The 4-billion-word Collins corpus is the world's largest database of the English language. It is updated every month and has been at the heart of Collins COBUILD for more than 30 years.

One important and integral part of high-stakes English language tests is the oral proficiency interview, which can be a pre-requisite to gaining admission to an English-speaking university. The volunteer participants were 25, 15-17-year-old Emirati students from two IGCSE ESL classes that I do not teach. This study included a videotaped mock oral proficiency IGCSE interview; audiotaped semi-structured individual interviews, questionnaires, and an audiorecorded semi-structured focus group discussion. The findings suggested that language and test anxiety is multi-faceted and can affect boys and girls in a number of different ways and at different times during class activities and also in an OPI. In addition, all participants showed different physical signs of test anxiety during the first two stages of the OPI, and these physical signs of test anxiety were considerably less frequent in the final part of the OPI. The causes and types of anxiety reported by the students ranged from language learning difficulties, problems trying to retrieve appropriate English vocabulary, code switching from Arabic language to English and vice versa, differences in social status of the teachers/language instructors, and unfamiliarity with the interlocutor. The pedagogical implications of these findings for understanding anxiety and oral test anxiety with second language students for teachers, schools and examination boards are discussed, as are suggestions for future research. Furthermore, considering the important role of teachers in second language pedagogy and the use of English as the main language of instruction, this study also offers suggestions to lessen anxiety for oral class activities and oral assessments, and presents test-taking strategies.
