Return on Engagement Jan 27 2020 In the world of web design, if one wants to create a successful web site, one needs an effective content strategy. *Return on Engagement* shows web designers and developers how to implement an effective content strategy and how to stay ahead in the rapidly changing industry of web design. It presents best practices in terms of web design through a marketing function: content strategy, SEO, social media marketing, and success measurement to help web designers implement

a strategy that ensures success for the site they are building. *Return on Engagement* shows web designers and developers how to not just design an aesthetically pleasing, functional website. This book shows those professionals how to implement marketing strategies and analysis into their website, thus ensuring its success. Nearly 3 years since the previous edition published, new best practices have been formed. Tools in which web developers use to analyze website metrics have advanced. New social media networks and communities have cropped up.

New research in how audiences read and receive content has been done, subsequently refining best digital marketing practices. *Return on Engagement* features a step-by-step breakdown of how to use new tools, techniques, and technologies. The new edition also includes updated case studies of industry leaders who implement best practices on projects. *Return on Engagement* also features a regularly updated companion site that offers readers sample content, easy sharing tools, and web-based resources to help measure marketing viability of

web properties.

Deep Learning for Coders with fastai and PyTorch Jul 13 2021

Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies. But as this hands-on guide demonstrates, programmers comfortable with Python can achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With fastai, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of fastai, show you how to train a model on a wide

range of tasks using fastai and PyTorch. You'll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes. Train models in computer vision, natural language processing, tabular data, and collaborative filtering Learn the latest deep learning techniques that matter most in practice Improve accuracy, speed, and reliability by understanding how deep learning models work Discover how to turn your models into web applications Implement deep learning algorithms from scratch Consider the ethical implications of your work Gain insight from the foreword by

Sdg 6 Synthesis Report 2018 on Water and Sanitation Oct

24 2019 Every year at the High-level Political Forum, an annual theme helps an increased focus along with an in-depth review of a selection of Sustainable Development Goals (SDGs). In 2018, SDG 6 on water and sanitation is one of the goals to be reviewed. To provide input to Member States on this goal, UN-Water has produced the SDG 6 Synthesis Report 2018 on Water and Sanitation. This represents a joint position from the UN family on the global status on SDG 6 and other water-related targets. The report also

explores the linkages within SDG 6 targets and the interlinkages between SDG 6 and the other targets and indicators. The report builds on the baseline data on SDG 6 global indicators coming from JMP, GEMI and GLAAS.

Malaysia Aug 02 2020 This book documents the trends and challenges that are taking place in various sectors in Malaysia. The chapters, written by specialists with an intimate knowledge of the country, cover many of the major issues concerning Malaysia, a country undergoing significant changes and challenges.

Principles of Retailing Jun 12 2021 Retailing is one of the biggest and most important

sectors in today's economy. Graduates who are seeking a career in the sector will therefore require a solid knowledge of its core principles. The Principles of Retailing Second Edition is a topical, engaging and authoritative update of a hugely successful textbook by three leading experts in retail management designed to be a digestible introduction to retailing for management and marketing students. The previous edition was praised for the quality of its coverage, the clarity of its style and the strength of its sections on operation and supply chain issues such as buying and logistics, which are often

neglected by other texts. This new edition has been comprehensively reworked in response to the rapid changes to the industry, including the growth of online retail and the subsequent decline of physical retail space and new technologies that improve customer experience and help track consumer behaviour. It also builds upon the authors' research over the last decade with new chapters on offshore sourcing and CSR and product management in addition to considerable revisions to existing chapters to highlight changes in online retailing and e-tail logistics, retail branding, retail security, internationalisation and the

fashion supply chain. This edition will also be supported by a collection of online teaching materials to help tutors spend less time preparing and more time teaching.

Linear Algebra II Jan 19 2022

This book is the second of two volumes on linear algebra for graduate students in mathematics, the sciences, and economics, who have: a prior undergraduate course in the subject; a basic understanding of matrix algebra; and some proficiency with mathematical proofs. Both volumes have been used for several years in a one-year course sequence, Linear Algebra I and II, offered at New York University's Courant Institute. The first three chapters of this second volume round out the coverage of traditional linear algebra

topics: generalized eigenspaces, further applications of Jordan form, as well as bilinear, quadratic, and multilinear forms. The final two chapters are different, being more or less self-contained accounts of special topics that explore more advanced aspects of modern algebra: tensor fields, manifolds, and vector calculus in Chapter 4 and matrix Lie groups in Chapter 5. The reader can choose to pursue either chapter. Both deal with vast topics in contemporary mathematics. They include historical commentary on how modern views evolved, as well as examples from geometry and the physical sciences in which

Academic Library

Management Nov 17 2021

What does successful academic library management look like in the real world? A team of editors, all administrators at large research libraries, here present a selection of case studies which dive deeply into the subject to answer that question. Featuring contributions from a range of practicing academic library managers, this book spotlights

case studies equally useful for LIS students and current managers; touches upon such key issues as human resource planning, public relations, financial management, organizational culture, and ethics and confidentiality; examines how to use project management methodology to reorganize technical services, create a new liaison service model, advance a collaborative future, and set up on-the-spot mentoring; discusses digital planning for archives and special collections; rejects "one size fits all" solutions to common challenges in academic libraries in favor of creative problem solving;

The Past Before Us Jan 07 2021
The claim that India--uniquely among civilizations--lacks historical writing distracts us from a more pertinent question: how to recognize the historical sense of societies whose past is recorded in ways very different from European conventions. Romila Thapar, a distinguished scholar of ancient India, guides us through a panoramic survey of the historical traditions of North India, revealing a deep and sophisticated consciousness of history embedded in the diverse body of classical Indian literature. The history recorded in such texts as the Ramayana and the Mahabharata is less

concerned with authenticating persons and events than with presenting a picture of traditions striving to retain legitimacy amid social change. Spanning an epoch from 1000 BCE to 1400 CE, Thapar delineates three strains of historical writing: an Itihasa-Purana tradition of Brahman authors; a tradition composed mainly by Buddhist and Jaina monks and scholars; and a popular bardic tradition. The Vedic corpus, the epics, the Buddhist canon and monastic chronicles, inscriptional evidence, regional accounts, and literary forms such as royal biographies and drama are all scrutinized afresh--not as sources to be mined for factual

shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing

the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes?
