Hundreds of thousands of pianos are bought and sold each year, yet most people buy a piano with only the vaguest idea of what to look for as they make this major purchase. The Piano Book evaluates and compares every brand and style of piano sold in the United States. There is information on piano moving and storage, inspecting individual new and used pianos, the special market for Steinways, and sales gimmicks to watch out for. An annual supplement, sold separately, lists current prices for more than 2,500 new piano models.

Guide to the Study of United States Imprints Apr 29 2022 This book provides a basic guide to the study of the printed matter which has been produced in the United States. The great bulk of research in this field has occurred during the last half century, yet no comprehensive attempt has been made to record it. Recognizing the need for an up-to-date guide to such investigations, G. Thomas Tanselle has compiled a listing of the principal material dealing with printing and publishing in this country. In his introduction Mr. Tanselle surveys the research which has attempted to trace the history of printing and publishing in America from its inception to the present and explains how this material can be utilized effectively. In nine carefully arranged categories he covers bibliographies of imprints of particular localities; bibliographies of works in particular genres; listings of all editions and printings of works by individual writers; copyright records; catalogues of auction houses, book dealers, exhibitions, institutional libraries, and private collections; retrospective book-trade directories; studies of individual printers and publishers; general studies of printing and publishing; and checklists of secondary material. From the mass of material, an appendix selects 250 titles. Although the work is arranged so that the reader may easily locate relevant sections, a comprehensive index provides further aid in finding individual items. "A successful checklist," writes the author, "is not merely a work to be consulted for information but also a nucleus around which additional information can be gathered in a meaningful way; it provides a framework into which the community of workers in a field can place further references in an organized fashion." *Guide to the Study of United States Imprints* is a reference tool designed to serve both as a guide to research and as a practical manual for use in identifying, cataloguing, and recording printed matter. It will be of enormous value to scholars in American literature, history, and bibliography, to librarians, typographers, and bibliophiles, and to antiquarian book dealers and book collectors.

**From Evidence to Action** Mar 05 2020 Cash transfers have become a key social protection tool in developing countries and have expanded dramatically in the last two decades. However, the impacts of cash transfers programmes, especially in Sub-Saharan Africa, have not been substantially documented. This book presents a detailed overview of the impact evaluations of these programmes, carried out by the Transfer Project and FAO's From Protection to Production project. The 14 chapters include a review of eight country case studies: Kenya, Ghana, Ethiopia, Zambia, Zimbabwe, Lesotho, Malawi, South Africa, as well as a description of the innovative

research methodologies, political economy issues and good practices to design cash transfer programmes. The key objective of the book is to enhance the understanding of these development programmes, how they lead to a broad range of social and productive impacts and also of the role of programme evaluation in the process of developing policies and implementing programmes.

**Taking a Multisectoral One Health Approach : A Tripartite Guide to Addressing Zoonotic Diseases in Countries** Feb 25 2022 The 2018 FAO-OIE-WHO (Tripartite) zoonoses guide, "Taking A Multisectoral, One Health Approach: A Tripartite Guide to Addressing Zoonotic Diseases in Countries" (2018 TZG) is being jointly developed to provide member countries with practical guidance on OH approaches to build national mechanisms for multisectoral coordination, communication, and collaboration to address zoonotic disease threats at the animal-human-environment interface. The 2018 TZG updates and expands on the guidance in the one previous jointly-developed, zoonoses-specific guidance document: the 2008 Tripartite "Zoonotic Diseases: A Guide to Establishing Collaboration between Animal and Human Health Sectors at the Country Level", developed in WHO South-East Asia Region and Western Pacific Region. The 2018 TZG supports building by countries of the resilience and capacity to address emerging and endemic zoonotic diseases such as avian influenza, rabies, Ebola, and Rift Valley fever, as well as food-borne diseases and antimicrobial resistance, and to minimize their impacts on health, livelihoods, and economies. It additionally supports country efforts to implement WHO International Health Regulations (2005) and OIE international standards, to address gaps identified through external and internal health system evaluations, and to achieve targets of the Sustainable Development Goals. The 2018 TZG provides relevant country ministries and agencies with lessons learned and good practices identified from country-level experiences in taking OH approaches for preparedness, prevention, detection and response to zoonotic disease threats, and provides guidance on multisectoral communication, coordination, and collaboration. It informs on regional and country-level OH activities and relevant unisectoral and multisectoral tools available for countries to use.
