Pavement Management Applications Using Geographic Information Systems May 04 2020 TRB's National Cooperative Highway Research Program (NCHRP) Synthesis 335: Pavement Management Applications Using Geographic Information Systems examines the state of the practice and knowledge of pavement management systems (PMS) using geographic information systems (GIS) and other spatial technologies, and discusses how the technologies have been combined to enhance the highway management process. The synthesis reviews the principal issues related to PMS data collection, integration, management, and dissemination; applications of spatial technologies for map generation and PMS spatial analysis; and implementation-related issues, including approaches used for integrating PMS and GIS and the different tools used to support pavement management decisions.

Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Microinteractions Oct 01 2022 It's the little things that make the difference between a good digital product and a great one. In this insightful book, author Dan Saffer shows you how to design microinteractions: the small details that exist inside and around features. How do you turn on mute? How do you know you have a new email message? How can you change a

setting? These moments can change a product from one that's tolerated into one that's treasured. Learn how to create effective and enjoyable microinteractions by using triggers, rules, loops and modes, and feedback.
