Management of complementary platform-based software products Apr 29 2020 The concept of platforms emerges in an increasing number of industries and affects customers' changing expectations, industries themselves, and new technologies' availability. Today, most platforms act as a technical foundation and distribution channel for complementary software products. Organizations can join platforms and use them to develop and distribute software products. They become complementors on the platforms. Platforms influence the motivations as well as the organization and affects software products of the complementors. Among other things, when using platforms, complementors must accept the platforms' specifications (for example, the technologies to be used). These requirements lead to additional work for complementors. The effort for complementors increases if software products are to be offered in parallel on multiple platforms. This publication examines how platforms affect organizations that use multiple platforms. It gives organizations recommendations for action on how to accommodate the platforms' influence.

Discretion and the Quest for Controlled Freedom Oct 24 2019 Looking at discretion broadly as the exercise of controlled freedom, this edited volume introduces insights from a range of social sciences perspectives. Traditionally, discussions of discretion have drawn on legal notions of the appropriate exercise of legitimate authority specified by legislators. However, empirical and theoretical studies in the social sciences have extended our understanding of discretion, moving us beyond a narrow legal view. Contributors from a range of disciplines explore the idea of discretion and related notions of freedom and control across social and political practices and in different contexts. As this complex and important topic is discussed and examined, both total control and unconstrained freedom appear to be illusions.
