**God: A User's Guide** Jun 03 2020 Jesus spent decades in India. - Ethiopians, not Jews, are the real chosen people. - A religion in Iran predicted the Virgin Birth, hundreds of years before Christ. - Abraham was an Iraqi. - Lenin was a Saint. - Worms have souls. - There's no such thing as the Holy Trinity. - All religions are the same. These are not conspiracy theories – but the genuine beliefs of the some of the world's major religions. In God: A Users' Guide, broadcaster Sean Moncrieff takes us through the history and development of the twenty largest

religions in the world – in the process demonstrating that the truth is far more compelling than the fictional accounts. In the name of religion, millions have been killed, and millions have been saved. Political dynasties have been built on the back of religious belief, or been destroyed because of them. The history of religion is one of tyranny, betrayal, sacrifice, generosity and faith: where the same 'facts' have often brought believers to dramatically different conclusions. From religions which have a multiplicity of Gods, to religions which have no God at all, God: A Users' Guide demonstrates how the vast majority of the world's religions did not develop in isolation, but were influenced by already existing belief systems. We have far more in common than you might think.

**Lunar and Planetary Webcam User's Guide** Jan 29 2020 This book de-mystifies the jargon of webcams and computer processing, and provides detailed hints and tips for imaging the Sun, Moon and planets with a webcam. It demonstrates how inexpensive tools are revolutionizing imaging in amateur astronomy. Anyone with a modest telescope and a webcam can now obtain jaw-dropping lunar and planetary images to rival those taken with mid-range astronomical CCD cameras costing thousands of dollars. A glance through the images in this book shows just what spectacular results can be achieved by using a webcam with your telescope! Your scientific results will be sought by professional astronomers.

**User's Guide to Science and Belief** Aug 18 2021 Science and belief are both very important for us in our 21st century society, so is it really necessary to choose between them? The view that science and belief are in conflict is a major stumbling block for many students today, with further confusion fuelled by the ongoing debate in the press and media. Adding clarity to the situation, Michael Poole explores the interaction between science and religious belief, facing dilemmas and finding unexpected solutions. A substantially rewritten and updated account of a best selling book, the User's Guide to Science and Belief is a clear and concise introduction to the relationship between science and faith.

**A User's Guide to Postcolonial and Latino Borderland Fiction** Dec 10 2020 Why are so many people attracted to narrative fiction? How do authors in this genre reframe experiences, people, and environments anchored to the real world without duplicating "real life"? In which ways does fiction differ from reality? What might fictional narrative and reality have in common—if anything? By analyzing novels such as Arundhati Roy's *The God of Small Things*, Amitav Ghosh's *The Glass Palace*, Zadie Smith's *White Teeth*, and Hari Kunzru's *The Impressionist*, along with selected Latino comic books and short fiction, this book explores the peculiarities of the production and reception of postcolonial and Latino borderland fiction. Frederick Luis Aldama uses tools from disciplines such as film studies and cognitive science that allow the reader to establish how a fictional narrative is built, how it functions, and how it defines the boundaries of concepts that appear susceptible to limitless interpretations. Aldama emphasizes how postcolonial and Latino borderland narrative fiction authors and artists use narrative devices to create their aesthetic blueprints in ways that loosely guide their readers' imagination and emotion. In *A User's Guide to Postcolonial and Latino Borderland Fiction*, he argues that the study of ethnic-identified narrative fiction must acknowledge its active

engagement with world narrative fictional genres, storytelling modes, and techniques, as well as the way such fictions work to move their audiences.

**The Vixen Star Book User Guide** Sep 06 2020 This book is for anyone who owns, or is thinking of owning, a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high tech, computer-driven, Go-To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system, with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface, first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward, and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go-To telescopes for the consumer amateur astronomer market, Chen offers a treasury of technical information. His advice, tips, and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions.
