**Now the Chips Are Down** Nov 03 2022 The

story of a pioneering microcomputer: its

beginnings as part of a national Computer

Literary Project, its innovative hardware, and its

creative uses. In 1982, the British Broadcasting

Corporation launched its Computer Literacy

Project, intended "to introduce interested adults

to the world of computers and computing." The

BBC accompanied this initiative with television

programs, courses, books, and software—an

early experiment in multi-platform education.

The BBC, along with Acorn Computers, also

introduced the BBC Microcomputer, which

would be at the forefront of the campaign. The

BBC Micro was designed to meet the needs of

users in homes and schools, to demystify

computing, and to counter the general

pessimism among the media in Britain about

technology. In this book, Alison Gazzard looks at

the BBC Micro, examining the early capabilities

of multi-platform content generation and

consumption and the multiple literacies this

approach enabled—not only in programming and

software creation, but also in accessing

information across a range of media, and in “do-

it-yourself” computing. She links many of these

early developments to current new-media

practices. Gazzard looks at games developed for

the BBC Micro, including Granny's Garden, an

educational game for primary schools, and Elite, the seminal space-trading game. She considers the shift in focus from hardware to peripherals, describing the Teletext Adapter as an early model for software distribution and the Domesday Project (which combined texts, video, and still photographs) as a hypermedia-like experience. Gazzard's account shows the BBC Micro not only as a vehicle for various literacies but also as a user-oriented machine that pushed the boundaries of what could be achieved in order to produce something completely new.

**Handbook of Enemy Ammunition: German Ammo for Guns, etc., Italian Grenade, etc., Hungarian Mine** May 05 2020

These handbooks were issued to all field units in contact with the enemy in Europe and Africa, and were intended for use by all personnel to help them recognise enemy ammunition. Specialist personnel were then trained to handle and disarm/destroy the ammunition so found. Each pamphlet covers a number of items, and this issue covers German ammunition for guns and howitzers (7.5cm., 7.62cm Russian, 105cm., 15cm and 21 cm shell), the Tellermine and its fuses, the Italian SRCM handgrenade and hollow charge 75.27 shell, plus the Hungarian variable pressure mine. See also the other pamphlets in this series: Handbooks 1-15 are published separately by Naval and Military Press.

Handbook of Enemy Ammunition: German Rockets, Gun and Mortar Ammunition Jul 07 2020 These handbooks were issued to all field units in contact with the enemy in Europe and Africa, and were intended for use by all personnel to help them recognise enemy

ammunition. Specialist personnel were then trained to handle and disarm/destroy the ammunition so found. Each pamphlet covers a number of items, and this issue covers a number of German fuses, together with descriptions of the Panzerfaust 30, some standard shells, and the new Wurfgrenate 15cm and 21cm "Stuka zu Fuss" rockets. There is also a description of the 30cm HE rocket, 4cm anti-aircraft shell, 8.8cm APCBC/T shell and the 12.8cm anti-aircraft shell for the biggest anti-aircraft gun to see use by the Germans.
