[Rapid Excavation and Tunneling Conference 2013 Proceedings](#) Oct 22 2019 Every two years, industry leaders and practitioners from around the world gather at the Rapid Excavation and Tunneling Conference (RETC), the authoritative program for the tunneling profession. This comprehensive book includes more than 100 papers from industry experts, highlighting their most recent projects and sharing real-world experiences that will keep you up to date on the latest tunneling trends and technologies.

[Advances in Computing, Communication and Control](#) Jul 19 2019 This book constitutes the refereed proceedings of the International Conference on Advances in Computing Communications and Control, ICAC3 2011, held in Mumbai, India, in January 2011. The 84 revised full papers presented were carefully reviewed and selected

from 309 submissions. The papers address issues such as AI, artificial neural networks, computer graphics, data warehousing and mining, distributed computing, geo information and statistical computing, learning algorithms, system security, virtual reality, cloud computing, service oriented architecture, semantic web, coding techniques, modeling and simulation of communication systems, network architecture, network protocols, optical fiber/microwave communication, satellite communication, speech/image processing, wired and wireless communication, cooperative control, and nonlinear control, process control and instrumentation, industrial automation, controls in aerospace, robotics, and power systems.

Managing Salinization Nov 15 2021 Salinization of soils is a major threat to irrigated agriculture and counteracts the targets of costly public infrastructure investments. In this study, salinization is regarded as the outcome of an institutional arrangement which impedes the effective implementation of well-known and well-established control measures be they technical, managerial or economic. In public irrigation systems neither the management units nor the farmers are offered any incentives towards the control of high groundwater levels and salinization if the management units are embedded in a highly centralized non-market institutional setting. The author answers the question under which conditions management units and irrigators are active in halting and reversing the process of salinization.

Software Engineering Oct 02 2020 This is the most authoritative archive of Barry Boehm's contributions to software engineering. Featuring 42 reprinted articles, along with an introduction and chapter summaries to provide context, it serves as a "how-to" reference manual for software engineering best practices. It provides convenient access to Boehm's landmark work on product development and management processes. The book concludes with an insightful look to the future by Dr. Boehm.

Psychiatric Vulnerability, Mood, and Anxiety Disorders Aug 12 2021 This volume looks at classic and novel methods currently used by researchers to understand mood and anxiety disorders and foster precision medicine. Chapters in this book cover topics such as how the sucrose preference succeeds or fails as a measurement of anhedonia; fear conditioning in laboratory rodents; animal models for mania; rodent models for studying the impact of variation in early life mother-infant interactions on mood and anxiety; and prediction of susceptibility/resilience toward animal models of PTSD. In the Neuromethods series style, chapters include the kind of detail and key advice from the specialists needed to get successful results in your laboratory. Comprehensive and cutting-edge, accommodating the novel views on how the neurobiology of psychiatric disorders should be reconceptualized, *Psychiatric Vulnerability, Mood, and Anxiety Disorders: Tests and Models in Mice and Rats* is a valuable resource for all researchers interested in learning more about this important and developing field.

Cardiovascular Disease Sep 13 2021 The two volumes of *Cardiovascular Disease: Methods and Protocols* provide comprehensive coverage of both basic and advanced approaches to the study and characterization of cardiovascular disease. In Volume 1: Genetics and Volume 2: Molecular Medicine, highly experienced cardiovascular researchers describe in detail the most important techniques in molecular medicine that are employed in genetic, molecular, cellular, structural, and physiological studies of cardiovascular disease.

Computerworld May 09 2021 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide.

Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Advances in Usability, User Experience, Wearable and Assistive Technology Aug 20 2019 This book addresses emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interactions with products, services and

systems and focuses on finding effective approaches for improving the user experience. It also discusses key issues in designing and providing assistive devices and services for individuals with disabilities or impairment, offering them support with mobility, communication, positioning, environmental control and daily living. The book covers modeling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Further topics include virtual reality, digital environments, gaming, heuristic evaluation and forms of device interface feedback (e.g. visual and haptic). Based on the AHFE 2020 Virtual Conference on Usability and User Experience, the AHFE 2020 Virtual Conference on Human Factors and Assistive Technology, the AHFE Virtual Conference on Human Factors and Wearable Technologies, and the AHFE 2020 Virtual Conference on Virtual Environments and Game Design, held on July 16–20, 2020, it provides academics and professionals with an extensive source of information and a timely guide to tools, applications and future challenges in these fields.

The Ultimate Guide to Using ICT Across the Curriculum (For Primary Teachers) Jul 31 2020 WHEN IT COMES TO USING TECHNOLOGY IN THE CLASSROOM ARE YOU... ..a nervous beginner in need of tips for getting started? ...an expert user searching for some high-tech, creative activities? ...an ICT coordinator looking for advice on how to plan and implement your school provision? With the implementation of the new Primary Computing curriculum is the definitive guide to embedding ICT in all subjects across the primary school. From using digital cameras and Beebots to Twitter and mobile apps, the creative and up-to-date ideas in this book will motivate and engage your pupils and prepare them for the changing world of technology they are living in. As well as step by step instructions on how to use a variety of technologies effectively, this book covers e-safety and the digital child, planning and budgeting your provision and how to use technology to support children with special educational needs.

Software Engineering Mar 27 2020 This one-semester undergraduate course introduces software engineering. A detailed guide to processes and products, this new text provides all the essential information needed to develop software engineering skills. The book offers in-depth coverage of all fundamental topics and includes follow-up projects in an appendix for hands-on application. Each chapter is followed by a variety of open-ended problems that afford maximum flexibility in course use and encourage students to exhibit originality and judgment. An instructor's manual contains solutions to some of the problems, as well as suggested examinations and course schedules. There is also an extensive and easily accessible bibliography that provides opportunities for further study.

World Congress of Medical Physics and Biomedical Engineering 2006 Sep 01 2020 These proceedings of the World Congress 2006, the fourteenth conference in this series, offer a strong scientific program covering a wide range of issues and challenges which are currently present in Medical physics and Biomedical Engineering. About 2,500 peer reviewed contributions are presented in a six volume book, comprising 25 tracks, joint conferences and symposia, and including invited contributions from well known researchers in this field.
