The Columbia History of American Television Aug 15 2021 Richly researched and engaging, *The Columbia History of American Television* tracks the growth of TV into a convergent technology, a global industry, a social catalyst, a viable art form, and a complex and dynamic reflection of the American mind and character. Renowned media historian Gary R. Edgerton follows the technological progress and increasing cultural relevance of television from its prehistory (before 1947) to the Network Era (1948-1975) and the Cable Era (1976-1994). He considers the remodeling of television's look and purpose during World War II; the gender, racial, and ethnic components of its early broadcasts and audiences; its transformation of postwar America; and its function in the political life of the country. In conclusion, Edgerton takes a discerning look at our current Digital Era and the new forms of instantaneous communication that continue to change America's social, political, and economic landscape.

Changes of Time Warner Company by taking into consideration the developments and trends in the motion picture industry Sep 16 2021 Studienarbeit aus dem Jahr 2017 im Fachbereich BWL - Unternehmensführung, Management, Organisation, , Sprache: Deutsch, Abstract: The Motion Picture industry is a continuously and rapidly changing industry due to technical advancements or industry trends guiding the film industry into a certain direction. Particularly innovation and the power of customer demand are the main triggers for the swaying trends in the film industry. The steadily growing motion picture industry is becoming more and more important based on the popularity across the population. In 2016 the global box office revenue reached its peak of about 38 billion U.S. dollars and experts are now predicting a further increase to about 50 billion U.S. dollar in 2020. Nowadays the motion picture industry belongs to one of the fastest growing industries around the world while India is the largest film market in the world, followed by China and the U.S. Hence it is absolutely necessary for companies that are engaged in the film industry to react according to external trends efficiently and in an adequate manner in order to remain competitive. This paper begins with a general historic overview in order to give an insight into the most important events in the motion picture industry. Afterwards there will be a theoretical part including a general description of the function of merger and acquisitions that have been implemented in the particular company and motion picture example. In the main part the paper addresses the major changes the motion picture industry is surrounded by. These can be on the one hand developments that has been emerged over time or on the other hand trends that are currently shifting the motion picture into a certain direction. Subsequently there will be a description of the Time Warner profile and its most recent data. Based on the changing industry trends in the motion picture, Time Warner as a company has to adapt its business operations according to the industry environment. These company shifts are highlighted in the following and analyzed with a special focus on the internal reorganization process of the company. At the end there will be a summary about the essence of the text and a review of the most important changes that have been made in the motion picture industry and at Time Warner in particular.

Also, there is an outline of the topic, which includes a list of all Key Numbers in that topic. Headnotes are collected by jurisdiction or court and filed according to the West Key Number System®.

Wealth Creation in the World's Largest Mergers and Acquisitions Oct 29 2022 This book highlights research-based case studies in order to analyze the wealth created in the world's largest mergers and acquisitions (M&A). This book encourages cross fertilization in theory building and applied research by examining the links between M&A and wealth creation. Each chapter covers a specific case and offers a focused clinical examination of the entire lifecycle of M&A for each mega deal, exploring all aspects of the process. The success of M&A are analyzed through two main research approaches: event studies and financial performance analyses. The event studies examine the abnormal returns to the shareholders in the period surrounding the merger announcement. The financial performance studies examine the reported financial results of acquirers before and after the acquisition to see whether financial performance has improved after merger. The relation between method of payment, premium paid and stock returns are examined. The chapters also discuss synergies of the deal-cost and revenue synergies. Mergers and acquisitions represent a major force in modern financial and economic environment. Whether in times of boom or bust, M&As have emerged as a compelling strategy for growth. The biggest companies of modern day have all taken form through a series of restructuring activities like multiple mergers. Acquisitions continue to remain as the quickest route companies take to operate in new markets and to add new capabilities and resources. The cases covered in this book highlights high profile M&As and focuses on the wealth creation for shareholders of acquirer and target firms as a financial assessment of the merger's success. The book should be useful for finance professionals, corporate planners, strategists, and managers.
