Building a Cashless Society Sep 05 2020 This open access book tells the story of how Sweden is becoming a virtually cashless society. Its goal is to improve readers' understanding of what is driving this transition, and of the factors that are fostering and hampering it. In doing so, the book covers the role of central banks, political factors, needs for innovation, and the stakeholders involved in developing a cashless ecosystem. Adopting a historical standpoint, and drawing on a unique dataset, it presents an academic perspective on Sweden's leading role in this global trend. The global interest in the future of cash payments makes the Swedish case particularly interesting. As a country that is close to becoming a cashless economy, it offers a role model for many other countries to learn from - whether they want to stimulate or reduce the use of cash. This highly topical book will be of interest to politicians, researchers, businesses, financial service providers and payment service providers, as well as fintech start-ups, regulators and other authorities.

Ittelson empowers non-financial managers by clearly and simply demonstrating how the balance sheet, income statement and cash flow statement work together to offer a "snapshot" of any company's financial health. Every term is defined in simple, understandable language. Every concept is explained with a basic, straightforward transaction example. And with the book's uniquely visual approach, you'll be able to see exactly how each transaction affects the three key financial statement of the enterprise. Two new major sections with nine new chapters were added to this revised second edition of Financial Statements, simply the clearest and most comprehensive introduction to financial reporting available.
