Building a Validity Argument for a Listening Test of Academic Proficiency Jan 12 2021 Over the years, various approaches to validation have emerged in psychological and educational assessment research, which can be classified into traditional approaches and modern approaches. Traditional approaches view validity as a multicomponential concept including, for example, content, construct, and predictive validity, while modern approaches conceptualize it as a unitary concept evaluated through argumentation. Drawing on the modern approach, this book builds a validity argument for an International English Language Testing System (IELTS) listening test sample. The book provides some insights into the listening sub-skills that the test engages, the psychometric dimensionality of the test, variables that predict item difficulty parameters, bias across age, nationality, test experience, and gender, as well as predictive-referenced evidence of validity. A variety of techniques including the Rasch model and structural equation modelling are used to answer the research questions and to build a validity argument framework; this argument organizes the thematically related findings into a coherent treatment of the validity of the listening test. The book presents the first treatment of validity argument and related analytical tools in one volume and maps the psychometric/statistical analysis tools onto the validity argument framework. It also provides an extensive literature review of listening comprehension, validation, and psychometric modeling and proposes both methods for developing and validating self-assessment instruments and novel approaches to improving the quality of language assessments.

Teaching and Researching Chinese Second Language Listening Aug 19 2021 Teaching and Researching Chinese Second Language Listening focuses on Chinese L2 listening with theory and pedagogy at its heart. The objectives of the book are to recount the development of Chinese L2 listening pedagogy, to synthesize research on Chinese L2 listening, and to propose a Chinese L2 listening approach. This book is the first to bridge the gap between Chinese L2 and general L2 listening and develop a much-needed systematic teaching approach to Chinese listening based on research findings in L2 listening, the unique features of the Chinese language, and the distinctive characteristics of the Chinese L2 learner population. This book grounds Chinese L2 teaching in solid theories of L2 acquisition and teaching. The research-informed and evidence-based Chinese L2 teaching approach proposed in the book seeks to move beyond the traditional product-oriented approach to integrate form-, meaning-, process-, and learner-focused listening. This book also discusses Chinese L2 listening from learners' perspectives: heritage versus non-heritage learners and motivation. These are presented together with theory and teaching practice. The book is aimed at researchers, in-service teachers and students taking upper-level

undergraduate courses and postgraduate courses for programs in Chinese applied linguistics and teaching Chinese as a second language (TCSL). Chinese listening studies to date have mostly been published in the Chinese language, which severely limits their readership. This book is therefore written in English to fill the gap in current scholarship. Due to a large number of Chinese learners and the consequential booming programs in TCSL and CIE (Chinese international education), it is important to dedicate a book specifically to Chinese listening.

Practice Tests for B1 Preliminary for Schools (PET) (Volume 2) Jun 04 2020

Assessing Listening for Chinese English Learners Feb 10 2021 This book reports in detail the newly developed Communicative Listening Comprehension Test (CLCT) for the National College English Test (CET) of China. Following the principles of communicative testing in general and test construction approach proposed by Bachman and Palmer (1996) in particular, the project develops CLCT for CET-4 and CET-6. The research begins with the construction of frameworks of listening task characteristics and communicative listening ability. Subsequently, based on a survey of Chinese college students' English listening needs and an analysis of listening tasks in influential English listening course books and public tests, CLCT-4 and CLCT-6 test specifications are developed. Finally, sample papers are produced and a series of posteriori studies are conducted to examine the difficulty and usefulness of the newly developed notes-completion task type in two CLCT tests. As an example of successful integration of communicative testing theories and test construction practice, this research provides valuable insights into listening test development for other large-scale tests.

CALL for widening participation: short papers from EUROCALL 2020 Oct 28 2019

Despite the Covid-19 pandemic, the EUROCALL society succeeded in holding the 28th EUROCALL conference, EUROCALL2020, on 20-21 August as an online, two-day gathering. The transition process required to make this happen was demanding and insightful for everyone involved, and, in many ways, a logical consequence of the core content and purpose of EUROCALL. Who would be better suited to transform an onsite conference into an online event than EUROCALL? CALL for widening participation was this year's theme. We welcomed contributions from both theoretical and practical perspectives in relation to the many forms and contexts of CALL. We particularly welcomed longitudinal studies or studies that revisited earlier studies. The academic committee accepted 300 abstracts for paper presentations, symposia, workshops, and posters under this theme; 57 short papers are published in this volume. We hope you will enjoy reading this volume, the first one to reflect a one hundred percent online EUROCALL conference/Online Gathering.

Examining Listening Nov 21 2021 This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.
