[Chinese Martial Arts Training Manuals](#) Apr 27 2022 Secret training manuals, magic swords, and flying kung fu masters—these are staples of Chinese martial arts movies and novels, but only secret manuals have a basis in reality. Chinese martial arts masters of the past did indeed write such works, along with manuals for the general public. This collection introduces Western readers to the rich and diverse tradition of these influential texts, rarely available to the English-speaking reader. Authors Brian Kennedy and Elizabeth Guo, who coauthor a regular column for Classical Fighting Arts magazine, showcase illustrated manuals from the Ming Dynasty, the Qing Dynasty, and the Republican period. Aimed at fans, students, and practitioners, the book explains the principles, techniques, and forms of each system while also placing them in the wider cultural context of Chinese martial arts. Individual chapters cover the history of the manuals, Taiwanese martial arts, the lives and livelihoods of the masters, the Imperial military exams, the significance of the Shaolin Temple, and more. Featuring a wealth of rare photographs of great masters as well as original drawings depicting the intended forms of each discipline, this book offers a multifaceted portrait of Chinese martial arts and their place in Chinese culture.

[The Visual Made Verbal](#) Sep 01 2022 Verbal descriptions of life have been around for centuries, but the digital age has made access to those descriptions even

more important. Dr. Joel Snyder, an audio description pioneer, has created a book and website offering the first overview of the field, including its history, application to a range of genres, description of training techniques, and list of resources. Audio description brings the visual world to life, making theater productions, television shows, films, visual art and events accessible to people who are blind or have low vision. Describers employ succinct, vivid, imaginative words to convey visual images those with sight take for granted. Although countries worldwide have taken up the cause, the United States has fallen short on research and institutions to study the field. Dr. Snyder's book helps fill in some of those gaps. "For decades, Joel Snyder has combined his astonishing command of language with his keen attention to detail to create word pictures that stir the mind's eye, especially for patrons of the arts whose physical eyes cannot see. [...] His book has been long-awaited, and no doubt will become the standard for prospective audio describers around the world." -Kelsey Marshall, Founding Director of Accessibility, The John F. Kennedy Center for the Performing Arts, Washington, DC Dr. Joel Snyder is known internationally as one of the world's first "audio describers," a pioneer in the field of audio description, making theater events, museum exhibitions, and media accessible to people who are blind or have low vision. Since 1981, he has introduced audio description techniques in 36 states and D.C. and in 35 countries. He holds a PhD in accessibility audio description from the Universitat Autònoma de Barcelona. Dr. Snyder's company, Audio Description Associates, LLC (www.audiodescribe.com) uses audio description to enhance a wide range of arts projects including video and film, museum exhibitions, and live events. As Director of Described Media for the National Captioning Institute, he supervised the production of descriptions for Sesame Street and dozens of feature films and nationally broadcast television; his descriptions can be heard at Smithsonian Institution exhibits, the Getty Museum, the Albright-Knox Gallery, and throughout the country at National Park Service visitor centers. As Director of the American Council of the Blind's Audio Description Project (www.acb.org/adp), Dr. Snyder voiced description for network coverage of President Obama's inauguration in 2009 and 2013, and recently produced the first-ever audio-described tour of The White House. The ADP website is the nation's principal provider of information and resources on audio description.

Private History in Public May 17 2021 In small community museums, truck stops, restaurants, bars, barbershops, schools, and churches, people create displays to tell the histories that matter to them. Much of this history is personal: family history, community history, history of a trade, or the history of something considered less than genteel. It is often history based on the historical record, but also based on feelings, beliefs, and memory. It is neglected history. Private History in Public is about those history exhibits that complicate the public/private dichotomy, exhibits that serve to explain communities, families, and individuals to outsiders and tie insiders together through a shared narrative of historical experience. Tammy S. Gordon looks beyond the large professionalized museum exhibits that have dominated scholarship in museum studies and public history and offers a new way of understanding the broad spectrum of exhibition types in the United States.

Managing a Community Oral History Project Sep 20 2021 The third book in the five-volume Community Oral History Toolkit takes the planning steps outlined in Volume 2 and puts them into action. It provides the practical details for turning your plans into reality and establishes the basis for guiding your project through the interviews to a successful conclusion. Project managers are given concrete, useful advice on how to manage people, money, technology, publicity, and administrative tasks from the beginning to the end of the project. Volume 3 outlines details for developing the necessary forms to properly administer a community oral history project (sample forms provided). The authors advise how to recruit volunteers and interviewees and provide helpful tips for conducting thorough interview and transcription training sessions and how to make arrangements for the life and safety of the project once the interviews are complete.

A Short History of (Nearly) Everything Paranormal Jun 05 2020 This is the most entertaining and broad survey of the paranormal ever made, combining forgotten lore, evidence from parapsychological experiments and the testament of scientists, archaeologists, anthropologists, psychologists, physicists and philosophers, and also quite a few celebrities. Exploring the possibility that paranormal phenomena may be - and that some most likely are - objectively real, this travelogue through the twilight zone of human consciousness is both scientifically rigorous and extremely entertaining.

Sociologist's Training Manual for Historians Nov 03 2022 Zito has put together a powerful sociological and historical primer targeted to novices and the knowledgeable alike. Are the writers of texts sociologists or historians? How do you judge? How do you combine sociology and history in one text? Are there guidelines for writing a socio-historical work? This book answers these questions and others through a dynamic analysis of two current socio-historical texts. Dr. Zito surgically applies two standards: one sociological which lucidly defines and uses such concepts as ideal type, power or "macht," and social structure. Second, the historical approach defines and uses concepts such as periodization, historical imagination and the role of mathematical probability in the outcome of historical events. Zito's final chapter illuminates the strengths and weaknesses of both studies and arrives at revelatory conclusions.

The Child Protection Practice Manual Jul 27 2019 Around 85 children die each year in the UK due to abuse or neglect. A number of these deaths are later deemed preventable because the child involved was known to either social services or to a health professional. Cases such as those of Baby P and Victoria Climbié highlighted the failings of these organisations, ones set up to safeguard children. It is the responsibility of every health professional worldwide to identify and respond to child abuse and yet that very responsibility is both emotionally and strategically challenging. *The Child Protection Practice Manual: Training practitioners how to safeguard children* equips professionals with the ability to recognise a child at risk and the knowledge of how to work with a child already suffering abuse. Practical advice is offered on how to navigate the multi-disciplinary processes. Fictional case studies and exercises immerse the reader in scenarios. Building on this, the authors lead readers through learning points, recommendations, and legislation. With new definitions in child protection ranging from child sexual exploitation, gang violence, radicalisation and internet bullying through to female genital mutilation, witchcraft and spirit possession, honour based violence and forced marriage, this book will be a valuable resource for qualified paediatricians and those in training, as well as professionals who have contact with children such as GPs, nurses, health visitors, social workers, midwives, teachers, lawyers, and community workers.

How to Be a Spy May 29 2022 During World War II, training in the black arts of covert operation was vital preparation for the 'ungentlemanly warfare' waged by the Special Operations Executive (SOE) against Hitler's Germany and Tojo's Japan. Reproduced here is the most comprehensive training syllabus used at SOE's Special Training Schools (STSs) showing how agents learnt to wreak maximum destruction in occupied Europe and beyond. The training took place in country houses and other secluded locations ranging from the Highlands of Scotland to Singapore and Canada. An array of unconventional skills are covered - from burglary, close combat and silent killing through to propaganda, surveillance and disguise - giving insight into the workings of one of World War II's most intriguing organizations. Denis Rigden's introduction sets the documents in its historical context and includes stories of how these lessons were put into practice on actual wartime missions.
