Permanent Campaigning in Greece in Times of Crisis Jun 28 2022 This book investigates the phenomenon of permanent campaigning in Greece over the last decade. It explores the political communication strategies of three recent successive Greek prime ministers from 2012 until the early months of 2022 to deal with economic, migration and pandemic crises, from a permanent campaigning perspective. Moreover, it evaluates and measures, for the first time, their permanent campaign strategies using the *Access Free English Home Language Paper 2 November 2010 Memo Free Download Pdf*

proposed framework of Lilleker and Joathan (2020) and the three following indicators: capacity building and strategy, paid and owned media and earned media. The need for presidents to communicate with public opinion and their dependence on public support is anything but new. The difference in the case of the permanent campaign is that the campaign tools, methods, techniques and personnel follow the elected leader in office in order to back his constant efforts to retain or even increase public approval as well as advance their re-

election prospects. This book aims to extend the research on the permanent campaigning in European parliamentary systems and will be of interest to political communication and campaigning students and researchers.

North Korea, 2009-2012 Dec 23 2021 North Korea continues to be a country of great concern internationally, where future developments are uncertain, especially as a result of the succession to the leadership of Kim Jong-un following the death of Kim Jong-il. It is also a country which is relatively unknown

and relatively little studied. This book provides a comprehensive, detailed survey of economic and political developments in the last few years. As such it provides many insights into the current trends which are likely to shape the country's future direction.
Fiscal Monitor, April 2018 Oct 28 2019 This report discusses fiscal trends in policies aimed at reducing fiscal vulnerabilities and boosting medium-term growth, recent fiscal developments and the fiscal outlook in advanced economies, emerging markets, and low-income developing countries; recent trends in government debt and analysis of changes in fiscal balances,

revenue, and spending; potential fiscal risks; and growth from the fiscal policies. It also describes how digitalization can help governments improve implementation of current policy and widen the range of policy options, and opportunities and risks for fiscal policy, including improvements in policy implementation, the design of future policy, and how digitalization can create opportunities for fraud and increase government vulnerabilities.

This volume argues that policies are not simply coercive, constraining or confined to static texts; rather, they are productive, continually contested and able to create new social and semantic spaces and new sets of relations. Anthropologists do not stand outside or above systems of governance but are themselves subject to the rhetoric and rationalities of policy. Planning for Tall Buildings

Jan 24 2022 In a time of recession, the challenge of building and planning for tall buildings has become even more complex; the economics of development, legislative and planning frameworks, and the local politics of development must be navigated by those wishing to design and construct new tall buildings which fit within the fabric of their host cities. This book is a timely contribution to the debate about new tall buildings and their role and effect on our cities. It is divided into two

main parts. In part one, the relationship between tall buildings and planning is outlined, followed by an exploration of the impacts that construction of tall buildings can have. It focuses, in particular, on the conservation debates that proposals for new tall buildings raise. The first part ends with an analysis of the way in which planning strategies have evolved to deal with the unique consequences of tall buildings on their urban locations. The second part of the book focuses on seven examples of medium-sized cities dealing with planning and conservation issues, and implications that arise from tall buildings. These have been

chosen to reflect a wide range of methods to either encourage or to control tall buildings that cities are deploying. The case studies come from across the western world, covering England (Manchester, Liverpool, Newcastle and Birmingham), Norway (Oslo), Ireland (Dublin) and Canada (Vancouver) and represent a broad spectrum of approaches to dealing with this issue. In drawing together the experiences of these varied cities, the book contributes to the ongoing debate about the role of the tall building in our cities, their potential impacts, and experiences of those who use and inhabit them. The conclusions outline how cities

Since terrorism became a global national security issue in the new millennium, all governments have wrestled with its effects. Yet strong measures against terrorism have often made the root causes of the problem worse, while weak responses have invited further attack. In response, this book explains how governments can construct and execute the most effective strategies to combat

terrorism—and how they can manage the consequences of those acts of terrorism they cannot prevent. It provides an overview of the complex problem of terrorism and offers a guide to shaping solutions to fit the unique structures and processes of governments. These issues and their solutions are demonstrated in six case studies. The book's value lies in its holistic treatment of what governments can do to protect their societies, with the ultimate goal of reducing terrorism from the global security threat it is today to a national-level criminal problem. Written by a team of experts, the book offers a concise but complete course

Lobbying in the European

Parliament Aug 26 2019 This book explains when and how interest groups are influential in the European Parliament, which has become one of the most important lobbying venues in the EU. Yet we know little about the many ways in which interest groups and lobbyists influence parliamentary politics. The author offers insights on four key cases of lobbying, based on the analysis of EU documents, lobbying letters, and 150 interviews. She argues that

lobbying success depends on a number of factors, most notably the degree of counter-lobbying, issue salience, and committee receptiveness.

These factors are brought together in the framework of “Triple-I” - interests, issues, and institutions - to determine the success or failure of lobbying. This book will be of use to students and scholars interested in EU politics and governance, EU decision-making, and interest group politics, along with policy-makers and practitioners.

While the recovery in advanced economies is softening, many emerging market and developing economies have experienced a significant

economic slowdown, and some large countries show signs of distress. Global risk aversion has risen, and commodity prices have continued to fall since the April 2015 Fiscal Monitor. The weaker outlook and concerns about the ability of policymakers to provide an adequate and swift policy response have amplified downward risks and clouded global prospects. According to this issue of the Fiscal Monitor, the challenging environment calls for a comprehensive policy response to boost growth and reduce vulnerabilities. With the increase of oil revenues, it goes on to look at how the funds have broadened their asset classes and their institutional development. Debate over the transparency of sovereign wealth funds has highlighted various global practices. Recently, organisational measures have been introduced for calculating possible risks from non-commercial investment incentives of funds, whose politically-driven investment strategies are viewed as potentially a major threat to the national security of their host countries.

This book analyzes Islamic terror abductions over the last 30 years in the Middle East (Lebanon, Syria, Iraq, Iran, Yemen, and Saudi Arabia), Asia (Afghanistan, Pakistan, India, and the Philippines), Africa (the Maghreb, the Sahel regions, and Somalia), and in Russia as a part of the Russian-Chechen conflict. Discussion also focuses on the abduction by Hizballah of Israeli soldiers, the Second Lebanon War of 2006, the Mumbai terror attack (2008), the Chechen hostage crisis in Moscow and Beslan (2002 and 2004), the kidnapping of employees of the

The role of Iran as a state sponsor of terrorism, and its patronage of terror organizations that utilize the tactic of abduction to promote Iranian interests in Lebanon and Iraq, is highlighted throughout. Discussion focuses on the challenges faced by countries whose citizens have been abducted by Islamic terror organizations and their reactions to these challenges, and provides theoretical classifications of the phenomenon of terrorism in general and terror abduction in

Fiscal Monitor, April 2020

Jul 06 2020 Chapter 1 argues that fiscal policies are at the forefront of responding to the COVID-19 pandemic. Fiscal measures can save lives, protect the most-affected people and firms from the economic impact of the pandemic, and prevent the health crisis from turning into a deep long-lasting slump. A key priority is to fully accommodate spending on health and emergency services. Global coordination is for a universally low-cost vaccine and to support countries with limited health capacity. Transatlantic Relations in the 21st Century Apr 26 2022

This book offers an overview of the interface between European integration, transatlantic relations, and the

'rise of the rest' in the early 21st century. The collapse of the Soviet bloc opened up an era in which the drivers and perceived benefits of the US alliance among European countries have become more variegated and shifting. The proposition that the US remains at once an 'indispensable' and 'intolerable' nation in Europe is a key concept in the alliance, as the US remains inextricably tied to the continent through economic, military and cultural links. This work examines this complex subject area from many angles, including an analysis of the historical and cultural contexts of America's relations with Europe, as well

How fundamental is state terror to the maintenance of a neo-liberal social order? What are the features of counter-terrorism that render it so easily reducible to state terror? as a developing subject area throughout the world, journalism history is becoming a particularly vivacious field. As such, *How Journalism Uses History* argues that, if historical study of this kind is to achieve its full potential, there needs to be a fuller and more consistent engagement with other academics studying the past: political, social and cultural historians in particular, but also scholars working in politics, sociology, literature and linguistics. Contributors in this book discuss the core themes which inform history's relationship with journalism from a wide range of geographical and methodological perspectives.

They aim to create more ambitious conversations about using journalism both as a source for understanding the past, and for clarifying ideas about its role as constituent of the public sphere in using discourse and tradition to connect contemporary audiences with history. for the entirety of what the state owns and owes, offering a broader fiscal picture beyond debt and deficits. Most governments do not provide such transparency, thereby avoiding the additional scrutiny it brings. Better balance sheet management enables countries to increase revenues, reduce risks, and improve fiscal policymaking. There is some empirical evidence that financial markets are increasingly paying attention to the entire government balance sheet and that strong balance sheets enhance economic resilience. This issue of the Fiscal Monitor presents a new database that shows comprehensive estimates of

public sector assets and liabilities for a broad sample of 31 countries, covering 61 percent of the global economy, and provides tools to analyze and manage public wealth. Estimates of public wealth reveal the full scale of public assets and liabilities. Assets are worth US\$101 trillion or 219 percent of GDP in the sample. This includes 120 percent of GDP in public corporation assets. Also included are natural resources that average 110 percent of GDP among the large natural-resource-producing countries. Recognizing these assets does not negate the vulnerabilities associated with the standard measure of general

government public debt, comprising 94 percent of GDP for these countries. This is only half of total public sector liabilities of 198 percent of GDP, which also includes 46 percent of GDP in already accrued pension liabilities. Once governments understand the size and nature of public assets, they can start managing them more effectively. Potential gains from better asset management are considerable. Revenue gains from nonfinancial public corporations and government financial assets alone could be as high as 3 percent of GDP a year, equivalent to annual corporate tax collections across advanced economies. addition, considerable gains could be realized from government nonfinancial assets. Public assets are a significant resource, and how governments use and report on them matters, not just for financial reasons, but also in terms of improving service delivery and preventing the misuse of resources that often results from a lack of transparency.

The European Court of Human Rights and its Discontents Dec 31 2019 The European Court of Human Rights has long been part of the most advanced human rights regime in the world. However, the Court has increasingly drawn criticism,

with questions raised about its legitimacy and backlog of cases. This book for the first time brings together the critics of the Court and its proponents to debate these issues. The result is a collection which reflects balanced perspectives on the Court's successes and challenges. Judges, academics and policymakers engage constructively with the Court's criticism, developing novel pathways and strategies for the Court to adopt to increase its legitimacy, to amend procedures to reduce the backlog of applications, to improve dialogue with national authorities and courts, and to ensure compliance by member States. The solutions presented
