[Witness](#) Oct 04 2022 Witness is an anthology comprising 40 critical essays from an international cast of researchers who engage with a complex set of questions concerning notions of witnessing and attestation in 20th- and 21st-century Western culture. The contributors provide insightful perspectives on the subject of witnessing and suggest how this vital yet relatively unexplored concept lends itself to a wide range of media and subject areas. The essays critically reconsider existing scholarly tendencies which focus on historical evidence and the witness' vocalization of true remembrance. They do this by establishing important links with canonical texts, images, and voices within a theoretical and interpretive framework where questions of mediation, memorization, and representation are addressed.

Orchestrating the Instruments of Power Sep 03 2022 National security, a topic routinely discussed behind closed doors by Washington's political scientists and policy makers, is believed to be an insider's game. All too often this highly specialized knowledge is assumed to place issues beyond the grasp—and interest—of the American public. Author D. Robert Worley disagrees. The U.S. national security system, designed after World War II and institutionalized through a decades-long power conflict with the Soviet Union, is inadequate for the needs of the twenty-first century, and while a general consensus has emerged that the system must be transformed, a clear and direct route for a new national security strategy proves elusive. Furnishing the tools to assist in future national security reforms, *Orchestrating the Instruments of Power* articulates and synthesizes the concepts of America's economic, political, and military instruments of power.

Time Series Analysis with Python Cookbook Feb 02 2020 Perform time series analysis and forecasting confidently with this Python code bank and reference manual **Key Features** Explore forecasting and anomaly detection techniques using statistical, machine learning, and deep learning algorithms Learn different techniques for evaluating, diagnosing, and optimizing your models Work with a variety of complex data with trends, multiple seasonal patterns, and irregularities **Book Description** Time series data is everywhere, available at a high frequency and volume. It is complex and can contain noise, irregularities, and multiple patterns, making it crucial to be well-versed with the techniques covered in this book for data preparation, analysis, and forecasting. This book covers practical techniques for working with time series data, starting with ingesting time series data from various sources and formats, whether in private cloud storage, relational databases, non-relational databases, or specialized time series databases such as InfluxDB. Next, you'll learn strategies for handling missing data, dealing with time zones and custom business days, and detecting anomalies using intuitive statistical methods, followed by more advanced unsupervised ML models. The book will also explore forecasting using classical statistical models such as Holt-Winters, SARIMA, and VAR. The recipes will present practical techniques for handling non-stationary data, using power transforms, ACF and PACF plots, and decomposing time series data with multiple seasonal patterns. Later, you'll work with ML and DL models using TensorFlow and PyTorch. Finally, you'll learn how to evaluate, compare, optimize models, and more using the recipes covered in the book. A Country of Words Jul 01 2022 "Few lives reflect their times as much as the life of Abdel Bari Atwan. Born in a refugee camp in Gaza in 1950, he left aged seventeen and has since become one of the world's foremost commentators on the Middle East." "In this memoir, Atwan recounts with humour and honesty his extraordinary journey. He depicts both the horror of camp massacres and the unexpected consequences of Britain's involvement in the region - such as when a British paratrooper fell from the sky with his sizeable parachute and everyone in his mother's village got new silk trousers." "Alongside the trials and tribulations of displacement, Atwan relates the culture shock of moving to 1970s London and shows London's famous Edgware Road in an entirely new light." "Atwan shares his many extraordinary encounters, including tea with Margaret Thatcher, a weekend with Osama bin Laden, intimate meetings with Yasser Arafat, and the row between Colonel Gaddafi and the Shah of Iran that earned him his first journalistic break." "But his is also a touching, personal story, never more so than when he describes taking his British-born children to meet his family, who still live in a camp surrounded by barbed wire."--BOOK JACKET.

Performing Prose Feb 25 2022 In *Performing Prose*, authors Chris Holcomb and M. Jimmie Killingsworth breathe new life into traditional concepts of style. Drawing on numerous examples from a wide range of authors and genres, Holcomb and Killingsworth demonstrate the use of style as a vehicle for performance, a way for writers to project themselves onto the page while managing their engagement with the reader. By addressing style and rhetoric not as an editorial afterthought, but as a means of social interaction, they equip students with the vocabulary and tools to analyze the styles of others in fresh ways, as well as create their own. Whereas most writing texts focus exclusively on analysis or techniques to improve writing, Holcomb and Killingsworth blend these two schools of thought to provide a singular process of thinking about writing. They discuss not only the benefits of conventional methods, but also the use of deviation from tradition; the strategies authors use to vary their style; and the use of such vehicles as images, tropes, and schemes. The goal of the authors is to provide writers with stylistic "footing": an understanding of the ways writers use style to orchestrate their relationships with readers, subject matter, and rhetorical situations. Packed with useful tips and insights, this comprehensive volume investigates every aspect of style and its use to present an indispensable resource for both students and scholars. *Performing Prose* moves beyond customary studies to provide a refreshing and informative approach to the concepts and strategies of writing.

Aligning Ends, Ways, and Means Aug 02 2022 After four decades of relative stability in national security strategy, American behavior has been erratic in search of a new and sustainable role on the world stage. Rather than facing an ideologically driven great power alliance, the new threat appears to be emanating from failed or failing states. And rather than preparing to deter, and if necessary, defeat, a military super power the United States has entered into long, costly, and uncertain nation building efforts that are falling out of favor with the American public facing a deep recession. Nation building efforts in Iraq and Afghanistan have exposed an imbalance in the capabilities of the departments and agencies and an inability to achieve a unity of effort, a whole of government effort. High level commissions recommend a reallocation of resources to achieve a new balance in the instruments of power and major reorganizations to affect a better orchestration of the instruments. Others are completely redefining national security. Traditionally, threats to national security were military problems with military solutions. What were considered issues of foreign policy -- including pandemics and environmental degradation -- are increasingly cast as national security matters. They are not military problems with military solutions. A national security strategy aligns ends, ways, and means. Finding a new alignment must take place in an environment of a deep and wide recession, partisan gridlock, and uncertainty about the very meaning of national security. This book presents the reader with the information necessary to engage in an informed debate on national security strategy and the system that supports it.
