The Achievement of Education Dec 18 2021 As pertinent today as when it was initially published by Harper and Row in 1983, this book derives from the author's more than fifteen years as an educator. It seeks a moderate course through the same chaotic American educational scene, by making a claim for the primacy of philosophy over empirical studies. It places psychology and sociology in their secondary roles as important in shedding light on areas that have already been philosophically explicated. The content is aimed most specifically at student teachers, particularly in the foundations and philosophy of education, though of interest and value to practicing teachers, administrators and supervisors. Interests, growths and needs are taken into account when curriculum is being considered. Freedom and discipline are examined when social control is analyzed.

Raising Boys' Achievement In Secondary Schools Jan 19 2022 "Boys' achievement has attracted great attention in recent years in many countries. This comprehensive book based on sound research in schools provides practical insights into how the achievement of boys and girls can be raised. It reminds us that it is not all boys or no girls who underachieve. It demonstrates the respective roles of teaching and learning, school culture and social factors. No easy answers but excellent ideas backed by evidence from authoritative, thorough researchers with a firm basis in schools." Judy Sebba, Professor of Education, University of Sussex "Teachers will find this book invaluable. It is based on quality research which actually evaluates the impact of the various strategies suggested for raising boys' achievement. What is more, in contrast to many of the more 'quick-fix' works in this field, the authors' discussion and analysis is measured and nuanced, and supported by an in-depth understanding of the wealth of theory and research around gender and achievement. It provides a welcome and weighty contribution to an ever-controversial debate." Becky Francis, London Metropolitan University In this important book, the authors evaluate different approaches and advocate practical, evidence-based strategies, which have the potential to promote boys' as well as girls' achievements. The approaches are discussed within the context of inclusivity, acknowledging the diverse needs and interests of different boys and the invisibility and continuing disadvantage of some girls. The book begins and ends with reflections from students of their own school experiences, and makes practical recommendations for the future. This book draws upon empirical research and work initiated as part of the DFES project on Raising Boys' Achievement. It brings together theoretical and practical issues, and reflects upon the construction of the debate about boys' apparent under-achievement from the perspectives of girls as well as boys. The authors critically explore notions of under-achievement and 'value added', and consider how useful the concept of the 'gender gap' is in advancing the debates. Raising Boys' Achievement in Secondary Schools is key reading for undergraduate and postgraduate Education students, PGCE students, headteachers, senior managers within schools and local education authorities, and policy makers.

Primer on Large-Scale Assessments of Educational Achievement Dec 06 2020 To improve their education systems, countries around the world have increasingly initiated national large-scale assessment programs or participated in international or regional large-scale

assessment studies for the first time. Well-constructed large-scale assessments can provide credible information on student achievement levels, which, in turn, can promote better resource allocation to schools, stronger education service delivery, and improved learning outcomes. The World Bank developed this Primer on Large-Scale Assessments of Educational Achievement as a firststop resource for those wanting to understand how to design, administer, analyze, and use the results from these assessments of student achievement. The book addresses frequently asked questions from people working on large-scale assessment projects and those interested in making informed decisions about them. Each chapter introduces a stage in the assessment process and offers advice, guidelines, and country examples. This book also reports on emerging trends in large-scale assessment and provides updated information on regional and international large-scale assessment programs. DIRK HASTEDT, Executive Director of the International Association for the Evaluation of Educational Achievement (IEA) “ A special feature of the publication is that it not only gives an overview of technical specifications, but also includes examples from around the world on how countries are conducting large-scale assessments, what they found, and how the results were used. With this perspective, the Primer on Large-Scale Assessments of Educational Achievement is an excellent and easy-to-read publication to get a comprehensive overview of large-scale assessments and how and why they are conducted. † ? SILVIA MONTOYA, Director of UNESCO Institute for Statistics (UNESCO UIS) “ If you are responsible for learning assessment in a country and are searching for a comprehensive, yet readable, guide on large-scale assessment, this is your book. Extremely well structured and written, this primer is easy to follow, and makes points clearly and concisely. It is an excellent resource that explores the steps for a good large-scale assessment with examples from all international large-scale assessment programs. † ? ANDREAS SCHLEICHER, Director for the Directorate of Education and Skills and Special Advisor on Education Policy to the Organization for Economic Cooperation and Development ’ s (OECD) Secretary-General “ Many countries have joined international educational assessments to benchmark quality, equity, and efficiency in their education systems. But what does it take to design and implement those efforts well and to draw value from this to help students learn better, teachers teach better, and schools to work more effectively? This Primer on Large-Scale Assessments of Educational Achievement helps policy makers and their technical teams to find answers to these questions. † ? ANDREI VOLKOV, Director of the Institute for Public Strategy, Moscow School of Management SKOLKOVO “ In 2008, when the Russia Education Aid for Development (READ) Program was launched, we determined its main goal as the improvement of the quality of basic education. Today, the READ Program keeps setting trends as the largest Russian initiative promoting educational assessment. Approaches developed within the READ Program, from building institutional and expert capacity to influencing educational reforms, have proven their efficacy in many countries. The Primer on Large-Scale Assessments of Educational Achievement brings together in a practical format the best experience and case studies in conducting assessments under the READ Program. An especially important feature of the book is an integrated capacity building component, which makes it a practical tutorial ready for use in different cultural contexts. Through this book, we hope that our collective experience gathered during READ will be widely shared, bringing us closer to achievement of the Sustainable Development Goal on education. † ? evelopment Goal on Education. † ?
