*Frank Wood's A-Level Accounting* Mar 30 2020 This new edition of Frank Wood's A-Level Accounting has been brought up-to-date with the latest syllabus changes and developments in the field. It covers the more advanced aspects of the syllabus and builds on a first-course in the subject, tackling the more advanced aspects of company accounting such as group accounts, and the basics of management accounting. As well as providing instruction and practice in the preparation of accounting information, the text stresses the need for students to understand the business reasons behind the accounting techniques. A continuing strength of the book is the large amount of question material provided for practice. Recent past questions from the main examining bodies are included, as well as a useful guide to examination technique at A-Level.

The Conservation of Cave 85 at the Mogao Grottoes, Dunhuang Dec 19 2021 The Mogao Grottoes, a World Heritage Site in northwestern China, are located along the ancient caravan routes—collectively known as the Silk Road—that once linked China with the West. Founded by a Buddhist monk in the late fourth century, Mogao flourished over the following millennium, as monks, local rulers, and travelers commissioned hundreds of cave temples cut into a mile-long rock cliff and adorned them with vibrant murals. More than 490 decorated grottoes remain, containing thousands of sculptures and some 45,000 square meters of wall paintings, making Mogao one of the world's most significant sites of Buddhist art. In 1997 the Getty Conservation Institute, which had been working with the Dunhuang Academy since 1989, began a case study using the Late–Tang dynasty Cave 85 to develop a methodology that would stabilize the deteriorating wall paintings. This abundantly illustrated volume is the definitive report on the project, which was completed in 2010.

Materials Technology in Steam Reforming Processes Jan 20 2022 Materials Technology in Steam Reforming Processes is a collection of papers that covers advancement in the various areas of studies in steam reforming processes. The title presents the studies of authors who are involved in the development of a particular process. The coverage of the text includes the fundamental aspects of the creep deformation of metals; factors affecting choice of materials and design of units for pressure steam reforming; and the research background of the thermalloy grades of chromium-nickel-iron heat-resisting alloys. The selection also covers corrosion problems on finned air-cooled heat exchanger tubing; and thermal insulation for steam-reforming plants. The book will be of great use to scientists, engineers, and technicians involved in materials science.

The GMO Deception Aug 03 2020 Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

*Hadrian's Wall* Nov 25 2019 From 1976 to 2000 English Heritage archaeologists undertook excavation and research on Hadrian's Wall. This book reports on these findings and includes the first publication, of the James Irwin Coates archive of drawings of Hadrian's Wall made in 1877-96.

*Manufacturing Facilities Design and Material Handling* Feb 09 2021 This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

**A Guide to Good Climbing Practice** Sep 16 2021 This guide gives authoritative advice on current tree climbing techniques which are both safe and effective. It has been updated to take into account advances in tree climbing equipment and techniques since 1999.

Incorporating the Work at Height Regulations 2005, Health and Safety Executive research and the latest techniques and equipment the all-new AA A Guide to Good Climbing Practice replaces the AA/FASTCo Guide to Good Climbing Practice (1999) and the AA/FASTCo Aerial Rescue Guidance Notes (1997). "The Guide sets out techniques and systems of work that can be considered as best practice guidance in arboriculture and helps anyone in the business meet their legal obligations." Dr Richard Nourish, Head of the Agriculture and Food Section, Health and Safety Executive.
